Deployment Ready in WVD Native:
Deploy and scale virtualized Windows desktops and apps on Azure

Windows Virtual Desktop is a comprehensive desktop and app virtualization service running in the cloud.

Windows Virtual Desktop

WVD, is the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows 10, optimizations for Office 365 ProPlus, and support for Remote Desktop Services (RDS) environments. Deploy and scale your Windows desktops and apps on Azure in minutes, and get built-in security and compliance features:

- Provide your users with the only multi-session Windows 10 desktop virtualized in the cloud that's highly scalable, always up to date, and available on any device.
- Deliver the best Office 365 ProPlus experience, with multi-session virtual desktop scenarios to provide the most productive virtualized experience for your users.
- Migrate your Remote Desktop Services (RDS) environment with simplified management and deployment experience on Azure.
- Quickly virtualize and deploy modern and legacy desktop apps to the cloud in minutes with unified management in the Azure portal.

With Uni Systems, you can take advantage of everything Windows Virtual Desktop has to offer

- Full life cycle services with readiness analysis, assessment, design, implementation and support
- Vast experience in delivering virtualized workloads for applications and desktops
- More than 1000 customers and an established user base of over 60000 virtualized endpoints (CEE)
- Complementary Managed Service offerings can increase your time to innovation, leaving the burden of maintenance and operations to the best.

Migration to the cloud

- Optimize your cloud experience
- Lower your costs for your Windows desktops and apps
- Complete environment and resources to migrate apps, data and infrastructure at your own pace
- Extended security updates for your Windows 7 virtual desktop on Azure with Windows Virtual Desktop
- App compatibility assistance when deploying Windows 10 and Windows 10 multi-session with Windows Virtual Desktop.

Secure & Productive Virtual Desktop Experience on Azure

- Deploy a complete, intelligent solution
- Enhance creativity and collaboration for everyone
- Shift to Microsoft 365 and get Office 365, Windows 10, and Enterprise Mobility + Security

Modernize the Workplace

- Give remote and field workers the same desktop experience as office workers, with fast, seamless, one-click access to work
- Bring intelligence into the workday by proactively organizing workflows and presenting what you need, when you need it
- Keep your applications in your on-premises datacenter, then burst into the cloud when computing demand spikes
- When access to systems apps and data is only needed for a limited time, a pay-as-you-go service gives you flexibility and cost savings

Uni Systems with 15+ years of experience in delivering and managing virtualized desktops and applications, can guide you down a path that shows economic value and return on a WVD investment, favorable scale, performance, and user experience with WVD, simplified and more secure means to monitor and manage user workspaces.
