

UniSystems Collaboration in a Modern Workplace with Teams

Make collaboration a productivity advantage

A UniSystems Work from anywhere solution offering, utilizing Office 365 tools (Microsoft Teams, Azure AD, OneDrive and SharePoint, Exchange online). Companies proactively embracing secure collaboration and high-productivity remote-working practices will achieve a competitive advantage in challenging times.

Office 365 tools can provide solutions for any remote working, collaboration and knowledge sharing demands. The workplace has never been as connected and ubiquitous as with Office 365. **Uni Systems** can help you transform opportunities Office 365 provides to concrete proven, work practices, providing a secure workplace accessible from anywhere, anytime.

Why collaboration anywhere matters?

- Coordinate team, actions and plans in a distributed manner; location should not be a factor.
- Achieve team coordination, control and efficiency from anywhere.
- Create and access document assets, files, emails and communications from a single point, anywhere, anytime.
- Cope with changing work habits, by creating an anywhere, anytime workplace.

Why

- Empower your workforce for the anywhere, anytime era.
- Provide high quality services to customers, irrespectively of workforce location.
- Be able to cope with the increasing customer demand for electronic-based remote services.
- Be productive, no matter the workforce location.

What

Leverage Office 365 now

- Organize and coordinate multi-channel collaboration by deploying **MS Teams and OneDrive**
