Unit4 ERP

Flexible ERP capabilities built to plan, manage and optimize complex resources

Unit4 ERP is an adaptable and easy-to-use suite of capabilities built to help service-centric organizations improve their productivity, resilience, and ability to adapt at speed.

With capabilities designed to serve the specific needs of service centric industries, Unit4 ERP has been built on the latest technology to ensure your finance and HR teams have the right tools to support your business now, and in the future.

> **"People work differently today… Unit4 is focused on making ERP the enabler of employee experience, which means integrating people processes and HCM to create one seamless digital experience across the organization."**
>
> **David Wilson**
> Xperience4U Conference, CEO, Fosway Group

Tackle the challenges of a changing world.

With Unit 4 ERP you can…

Embed agility to adapt and grow
Gain continuous access to new features, enable teams to easily adjust structures, and benefit from data-driven insights to find opportunities for growth.

Maintain stability while you innovate
Automatically align to your industry and ERP best practice to remain secure and compliant, automate processes, and integrate external data to maintain governance.

Gain clarity to optimize resources
With powerful AI-supported processes, budgeting and people planning, you can manage complex financial models and projects to make the right decisions for your business.

UNIT4
In business for people

"Unit4 ERP is an example of the new modular ERP application with a focus on the people experience across an organization. The product covers financial processes, time and billing, HR processes, and analytics and operations, so organizations can scale as needed much quicker than in the past."

Mickey North-Rizza
Program Vice President, Enterprise Applications and Digital Commerce, IDC,
IDC Link: Unit4 Announces ERPx, a Modern and Modular ERP System

Unit4's next-generation smart ERP
By combining our mid-sized experience – with a relentless focus on people – onto an industry-leading cloud platform, we've built finance and HR solutions to be just right 4U.

Capabilities for your industry - unifying multiple business processes – built for your industry, region and size.

User experience for all users - powerful for pros, lightweight for everyone, automated whenever possible, and accessible across multiple devices.

Modern cloud platform - for enhanced performance and agility, easier extension to external data, ability to build your own apps or use an expanding community of contributors.

Elevate your business with Unit4 ERP
Deliver increased visibility and control in the following areas:

Finance
Incorporates a top-tier, global accounting system designed for organizations that constantly face internal and external demands for change.

The system delivers a fully integrated range of financial functions, including general ledger, accounts payable and accounts receivable, comprehensive budgeting and planning, asset management, reporting and other dedicated tools.

Projects
Provides a complete solution FOR the management of the entire project cycle from the project creation, to final invoice and project closedown.

Enables effective utilization of resources and tight management control on all aspects of the project, including project budgeting, people planning, forecasting, time & expense management, revenue recognition, project billing and timely reporting.

Procurement
Developed for organizations that need to regulate costs and streamline their procurement practices without sacrificing control.

Provides a fully integrated solution for procurement that supports, automates and standardizes all phases of the purchasing cycle – from requisitioning to paying vendors. Covers contract management, purchasing, order fulfilment, and invoice reconciliation and payment.

Core HR and Payroll
Designed for organizations that need to manage frequent business change and need HR and Payroll tightly linked to the Project Life Cycle, General Ledger and Accounts Payable.

The solution enables effective employee and absence management along with seamless integration of payroll with all critical HR data.

Business Intelligence and Reporting (Fundamentals)
Built for organization that need relevant and timely business information to make informed tactical and strategic decisions, Unit4 ERP empowers users with a virtually unlimited number of possibilities to retrieve, process and report or analyze the information they need to support their role.

With Unit4 ERP you gain great information extraction tools, overlaying a remarkably flexible and rich structure, which can change as the organization requires it. In Unit4 ERP, all enquiry, analysis and reporting tools are integral parts of the application.

Deep Integration with Planning and HCM
The unified platform allows smooth integration with other core Unit4 products. Integrate with Unit4 FP&A and use real-time project data to update business forecasts and increase accuracy.

Integrate with Unit4 HCM to strategically structure and recruit based on project needs and track employee engagement, performance and skill levels to understand and prevent issues that might affect project outcomes.
