

# UDT Copilot DataGuard: Data Safe. AI Ready.

## Empower AI with Confidence. Protect What Matters Most.

As organizations accelerate their adoption of Microsoft Copilot and other AI solutions, the need for robust data protection and compliance is becoming critical. **UDT Copilot DataGuard** is a structured enablement program designed to help you configure essential security and compliance guardrails before deploying AI.

Data Protection & AI Security Foundations		
Features	Description	
<b>Data Loss Prevention</b>	Implement comprehensive DLP policies across Microsoft 365 – including Exchange Online, SharePoint Online, OneDrive for Business, and Teams – to prevent unauthorized sharing of sensitive data such as PII, ePHI, or financial records.	
<b>Information Protection</b>	Enforce consistent classification and protection using Sensitivity Labels and Auto-Labeling. Empower users with training to ensure adoption and proper handling of sensitive content.	
<b>AI Data Security Posture Management</b>	Classify and protect AI inputs and outputs. Enable continuous monitoring to detect and mitigate leakage risks across AI workflows.	
Why It Matters		
<b>Visibility &amp; Control</b> Gain insights into where sensitive data lives and how it flows through your environment.	<b>AI-Ready Security Posture</b> Build a foundation that supports secure and compliant AI adoption.	<b>Enforce Protection Standards</b> Ensure consistent data governance across your digital estate.
Solution Benefits		
<b>Mitigate Data Loss Risks</b> Prevent accidental or malicious data exposure before AI is introduced.	<b>Expert-Led Enablement</b> Partner with UDT and Microsoft to assess your environment, configure protections, and prepare for AI deployment.	<b>Enable Regulatory Compliance</b> Align AI initiatives with HIPAA, GDPR, FERPA, and other regulatory frameworks without introducing new vulnerabilities.

## Begin Your AI Deployment with Security from the Start

Don't wait for a breach. Start your AI deployment on the right path with security and compliance measures already in place. **Take control now with UDT Copilot DataGuard.**
