

# Chat with your organizational knowledge

## One AI search tool. Multiple applications.

### Tailor Your Assistants

Configure topic-expert agents in Slack, Zendesk, Salesforce, and Teams without coding. Choose their knowledge sources from Unleash's 70+ integrations.

### ChatGPT experience with your company knowledge

Get answers based on your company's documentation. Experience a ChatGPT interface where the source of truth is your company's unique data.

### Don't compromise on Security

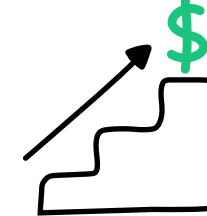

Unleash uses advanced resource-level permissions and connects to identity services such as Okta, Firebase, and Azure. Use an AI tool without risking your data. We don't train LLMs on your data.

## Optimize your company's efficiency across departments

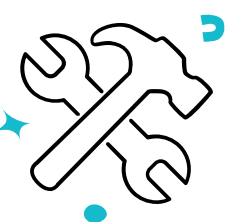

### Customer support

Create assistants for cases in Salesforce or Zendesk tickets. Unleash reads the reviewed ticket and provides a suggested response for your agent.

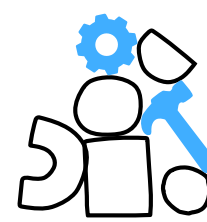

### Sales teams

Get answers based on product documentation by asking Unleash. Cut down hours of waiting for answers.

### Operations

Get an overview of the company's knowledge gaps and optimize efficiency by removing manual search.

### R&D

Find answers based on your GitHub readme files and assist new members in learning company procedures faster.

## You are in good company

## Loved by customers
