Understand usage patterns so you can drive adoption!

Today's Office 365 professionals are tasked with understanding what is being used and what is not being used to better understand adoption patterns.

Whether it is managing a classic SharePoint deployment, controlling Groups deployments, or monitoring OneDrive adoption, tyGraph for SharePoint has what you need to understand both activity and content.

TYGRAPH FOR SHAREPOINT

Customize reports and dashboards in Power BI Augment tyGraph with your AD and HRIS data.

tyGraph for SharePoint is deployed into Power BI allowing you to augment the data model with your own data and build your own custom reports.

Our team of experts are available to guide you through the process or we can build reports for you with our concierge service.
