

Analysis and Roadmap for Power BI Jumpstart in 1 day

UST's team of experienced consultants will work closely with you to understand the business challenges and data landscape. We'll evaluate the technology stack at your premises and find a solution that will get your analysis running smoothly.

Furthermore, we will provide you with inputs on how to best leverage the existing data to uncover the hidden patterns with maximum benefit and with minimal investment.

Highlights

- Exemplifying UST's capabilities and success stories.
- Identifying both functional and technical pain points within the business.
- Aim to evaluate existing BI solutions against Microsoft capabilities. (if the objective is to improve existing solutions).
- Engage business stakeholders in brainstorming on business objectives and identify gaps through comparisons.
- Provide a summary of the assessment and outline the steps for deploying the BI stack that maximizes the business potential through the existing data.
