

WeManage
PROCUREMENT

WeManage is an eProcurement solution that helps you overcome obstacles to drive transparency and good governance in your Procure-to-Pay processes.

With our cloud-based SaaS system, empower your team to secure and strengthen every step of your procurement system anytime and anywhere.

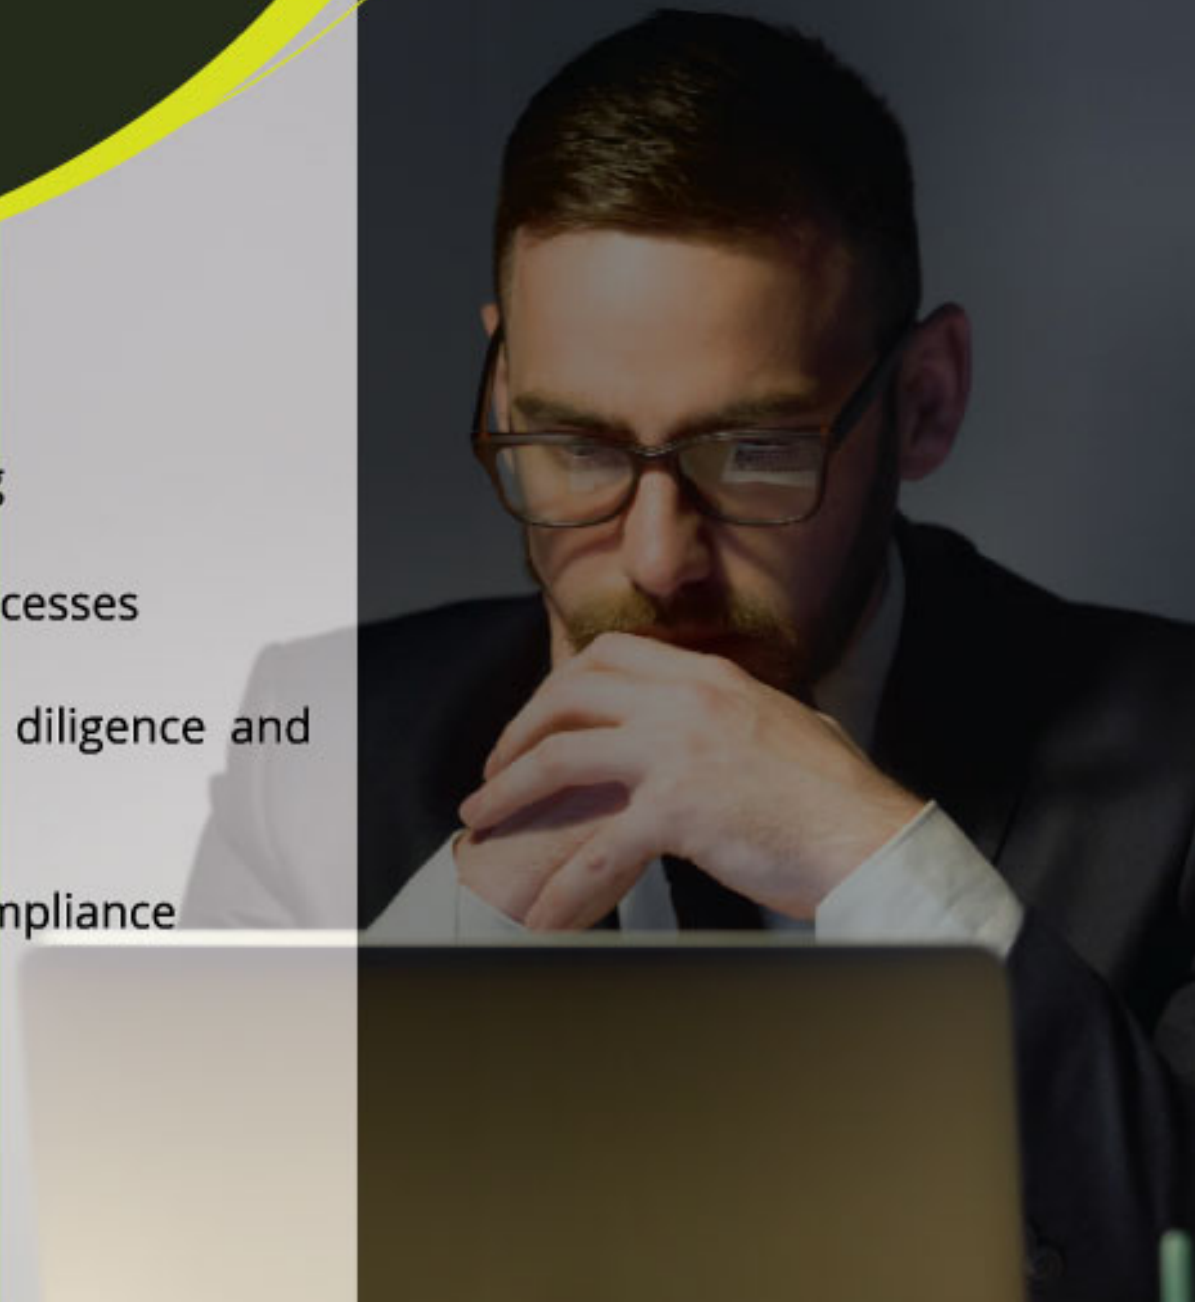

Who Can Benefit?

Procurement Officers & Managers looking to strengthen governance and compliance in their procurement processes

We See Your Challenges

- ▶ Leakages from maverick spending
- ▶ Inefficient manual purchasing processes
- ▶ Hard to trace procurement due diligence and sourcing decisions
- ▶ Inadequate evidence for audit compliance
- ▶ High Information security risks

Ensure good governance with compliance-focused process flows

Promote transparency with comprehensive audit trails

Benefits of e-Procurement

Increase efficiency with automated approval workflows and delegations

Boost data-driven decision making with automatic analytics and reports

Drive profitability via prudent procurement practices

Improve strategic purchases with spend analysis

Commit to security and confidentiality, certified with ISO 27001

Strengthen due diligence with collaborative pre-qualifications and evaluations

High Governance Procurement Discipline

WeManage Procurement focuses on compliance and governance for procure-to-pay operations.

ISO 27001: 2013 Certified

- Professional team members certified in Information Security Management Systems (ISMS), trained to handle confidential data during implementation and support.

Monitoring & Alerts

- Continuous monitoring and reminders of process cycle times and critical milestones. Reduces need for manual oversight and assists in compliance to service level agreements (SLA).

Spend Analysis

- High level data insights to manage purchase wastage and generate ideas for continuous improvements.

Robust Infrastructure

- Flexible hosting options (On-Premise or Private Cloud)
- Hosted on one of the world's most secure cloud platforms – Microsoft Azure – with more than 100 certifications and 35 compliance offerings.

Decision Logs

- Purchase decisions and sourcing evaluations are logged for audit validation.
- Supports transparency and third-party validation services
