Overview

Valdyr.io is a next-generation compliance automation platform that helps startups become audit-ready in days, not months. Built for speed, simplicity, and security, Valdyr.io supports SOC 2, ISO 27001, CMMC, and other major frameworks without requiring deep compliance expertise.
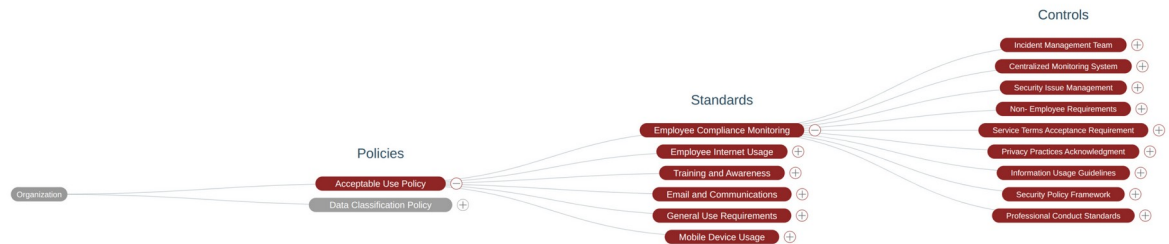

Why Startups Use Valdyr.io

- **Go from Zero to Audit-Ready Fast**: Launch a tailored compliance program with Valdyr Wayfinder in under 24 hours.

- **No Consultants Required**: Simple workflows, plain-English guidance, and real-time AI assistance—no need for third-party advisors.

- **No More Painful Questionnaires:** Your vault indexes every aspect of your corporate compliance, and it's searchable using human language. No more digging for answers to process client security questionnaires.

- **Private by Design**: Your data stays in your secure compliance vault—never shared with external AI providers.

- **Budget-Friendly**: A cost-effective alternative to Drata or Vanta—ideal for seed and early-stage startups.

- **Scalable with Your Growth**: Start simple, grow into complex frameworks as your organization matures.

Core Features of Valdyr Wayfinder

- **Simplified Setup**: Guided setup powered by tailored language models—get audit-ready from scratch in a day.

- **Compliance-as-Code Engine**: Turn internal policies into machine-readable, enforceable controls.

- **Real-Time Gap Detection**: Instantly identify missing controls, outdated policies, or coverage issues.

- **Compliance Forest**: Visualize how controls, risks, and frameworks connect in one interactive map.

- **Cross-Framework Mapping**: One policy, many frameworks. Reduce duplication across SOC 2, ISO 27001, and more.
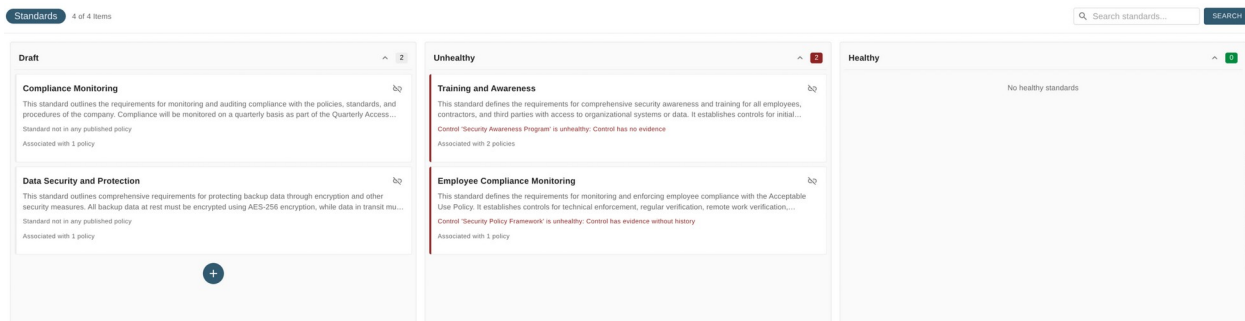

Ideal Use Cases

- Organizations looking for a proven corporate compliance structure

- B2B SaaS startups preparing for enterprise procurement

- Founders needing SOC 2 Type I or II to close deals

- Portfolio support teams at accelerators or VCs

- Seed-to-Series B companies navigating first-time audits

Hello! I'm your AI assistant. I can help you find information about your company's standards, policies, and processes. What would you like to know?

Please describe our facilities policy

The Facilities Policy exists to ensure the safety, security, and operational efficiency of organizational facilities by defining standards and procedures for critical infrastructure and systems. This policy outlines the guidelines for managing physical barriers, surveillance systems, security personnel, access control systems, emergency systems, water leak prevention, HVAC maintenance, fire suppression, and emergency power.

Who is the facilities manager?

John Foreman

Your Startup. Audit Ready. Simple.
