

OPTIMIZED APPS & MODERN INSIGHTS WITH PowerBI & AZURE

PROBLEMS & OPPORTUNITIES

- Executive reports lacked visualization and easy to use interface
- Lack of data authentication and security model
- Optimize performance of Client Azure applications

STRATEGIC SOLUTIONS

- End user analysis with documentation and prioritization of findings
- Architectural analysis of current data model
- UX envisioning session to define Power BI dashboards and reports
- Architectural assessment of Azure applications

BUSINESS IMPACT

- Implemented SSO authentication across environments
- Design and execution of data model and Power BI dashboards for company consumption
- Training of end users on Power BI dashboard capabilities
- Identify performance optimizations for Azure platform
