Var Group Microsoft Information Protection Quick Start

Join an immersive experience designed for security leaders and IT teams to protect and govern data.

Strengthen your security strategy with Microsoft

As your organization expands and evolves in its digital estates, with new apps, data and devices, having an integrated approach to security is more important than ever..

Designed for today's security leaders, the Var Group Microsoft Information Protection Quick Start focuses on learning the specific needs of your organization and develops a strategic plan based on the approaches recommended by Microsoft experts to protect and manage data.

This service includes an initial assessment to understand the current strategy in data governance, implementation of Microsoft Information Protection services and training on the job to IT Teams.

What you will get of the service

Focused service dedicated to your security needs.

Clarity on how Microsoft can help you improve your data management situation.

Apply Implementations of Office 365 AIP and DLP services within your organization.

VARGROUP
inspiring innovation

"If security is made difficult, people could work around the problem. With Microsoft, we get native functionality, visibility into our operating environment, and simplicity for all employees."

Simon Hodgkinson, BP Group Chief Information Security
