

SOC on Azure Sentinel

4 hours workshop

*Insights on a SOC service based
on Azure Sentinel SIEM Technology*

SOC on Azure Sentinel

Var Group provides a 1to1 workshop for companies interested in learning more about features and benefits of **SOC** services **on Azure Sentinel** technology and it describes how companies can implement these services in their business. In this workshop we will describe benefits and enhancements provided by a Managed Security Service based on this technology, which allows a company to anticipate evolving threats.

The aim of the workshop is to explain how SOC service helps to detect, analyse and respond to threats against monitored environment and to gain knowledge about Azure Sentinel.

The main themes of the workshop include:

What is a SOC (Security Operation Center) and why it is important

How Azure Sentinel is easily implemented in companies which use Microsoft cloud environment

Why Azure Sentinel empowers SOC service with its functionalities

Which threat models can be detected using our use cases

How does Azure Sentinel works (both for on premises sources and cloud sources)

Which remediations can be implemented to automatically respond to threats using Azure Sentinel Playbooks
