

Varyence Managed Cybersecurity Services

Secure Your Business with Proactive Threat Detection and Expert Cyber Protection

We provide 24/7 monitoring, rapid incident response, and tailored solutions to protect your business on Microsoft Azure and beyond.

Focus on your goals while we safeguard your data, applications, and infrastructure from ransomware, cyberattacks, and compliance risks.

Key Benefits for your Business

- **24/7 Protection:** Continuous monitoring by a qualified security team.
- **Reduced Risk:** Prevent data breaches, ransomware, and compliance violations.
- **Rapid Response:** Minimize downtime with quick incident resolution.
- **Cost Efficiency:** Lower IT management costs with managed services.
- **Business Continuity:** Ensure operational resilience with backups and disaster recovery.

Our Engagement Process

STRATEGY DEVELOPMENT

Create customized security and compliance programs.

ONGOING SUPPORT

Provide continuous monitoring, updates, and incident response.

ASSESSMENT

Analyze your environment to identify risks and gaps.

IMPLEMENTATION

Deploy advanced security measures tailored to your needs.

Let's discuss how our experts and experience will ensure your competitive edge and growth.

Services We Provide

- **Cloud Security**
Protect sensitive data and applications in Microsoft Azure, AWS, and GCP.
- **Identity & Access Management (IAM)**
Control and audit access to sensitive systems.
- **Security Event & Incident Management (SEIM)**
Real-time threat detection and response.
- **Security Awareness Training**
Educate your team to prevent security risks.
- **Application Security**
Minimize breach risks with robust app protection.
- **Penetration & Security Testing**
Identify vulnerabilities before they're exploited.
- **Encryption & Data Loss Prevention**
Protect sensitive data from loss or theft.
- **Security Advisory Services**
Expert guidance on best practices and compliance.
- **Anti-Malware Protection**
Defend against malware and data theft.
- **Managed Firewall Security**
Block unauthorized access and malicious activity.
- **Virtual CISO Services**
Strategic leadership to align security with business goals.

What You'll Get

- **Proactive Threat Detection:** Identify and mitigate risks with real-time monitoring and advanced analytics.
- **24/7 Security Operations:** Benefit from a dedicated team of cybersecurity professionals.
- **Comprehensive Protection:** Secure cloud, applications, and data across Azure, AWS, and GCP environments.
- **Customized Security Programs:** Tailored strategies for compliance, incident response, and risk management.

Why Varyence?

"Their deliverables' high quality and speed distinguish them from other providers. Their expertise in identity management is outstanding."

— CEO, Cybersecurity Software Company, USA
