

The AI Navigator That Knows Your Business

Unlock decisions—not just documents.

PromptX transforms fragmented content into federated, actionable intelligence, powered by AI & built for trust, speed, and scale.

You're Surrounded by Data - but Starved for Answers

70%

of enterprise knowledge remains unused

12+ hours

lost each week Spent searching for answers that already exists

6 in 10 users

abandon tools like CoPilot or Gemini due to lack of collaboration and cross platform support

MEET PROMPTX

PromptX unifies your data across SharePoint, Google Drive, email, cloud, and legacy systems into a single Enterprise Knowledge System. With AI-Powered Search, users ask plain-language questions and get context-aware, traceable answers instantly. Files, emails, and URLs are auto-ingested and converted into smart Knowledge Cards with tags and entity recognition. With adaptive prompts, split chats, workspaces, and agents, workflows are streamlined. PromptX runs on any cloud or hybrid setup, integrates any LLM or search engine, and offers enterprise-grade controls—SSO, permissions, audit trails, and AI governance.

HOW PROMPTX HELPS

Consolidate

Unite fragmented files, chats, and systems

Discover

Ask plain-language questions get verifiable answers

Collaborate

Share insights securely in workspaces

Automate

Use agents and smart prompts to drive workflows

From Search to Strategy: What PromptX Enables

- Unify content into a single, searchable intelligence layer
- Natural language Q&A with citations
- Auto-convert files, emails & URLs into reusable Knowledge Cards
- Agent & split-chat powered workflow automation
- Secure, role-based collaboration with collections, annotations, & coordinated workspaces
- Entity-aware processing of docs and URLs
- Auto-tag, summarize, and version content
- Integrate with your existing stack - cloud-agnostic and model-flexible

KEY CAPABILITIES

That Turn Information Into Intelligence

- Conversational AI Search** : Understands typos, intent, context, and synonyms
- Contextual & Traceable Discovery** : Returns answers with citations and metadata
- Semantic Enrichment & Structuring** : Applies tags, classes, and entity recognition
- Multi-Modal Ingestion & Federation** : Ingests docs, chats, emails, URLs (live & batch) and connects systems without duplication
- Adaptive Prompting & Automation** : Role-based prompts + scoped AI actions with escalation logic
- Collaborative Workspaces** : Curate, annotate, and share in secure, role-based environments
- Slack & Teams Integration** : Bring PromptX into your daily workflow with no context switching
- Cloud-Agnostic, API-First Architecture** : Works anywhere, integrates with any LLM
