

The AI Navigator That Knows Your Business

Say Goodbye To Information Silos And
Hello To Intelligent Knowledge Retrieval.

PromptX At A Glance

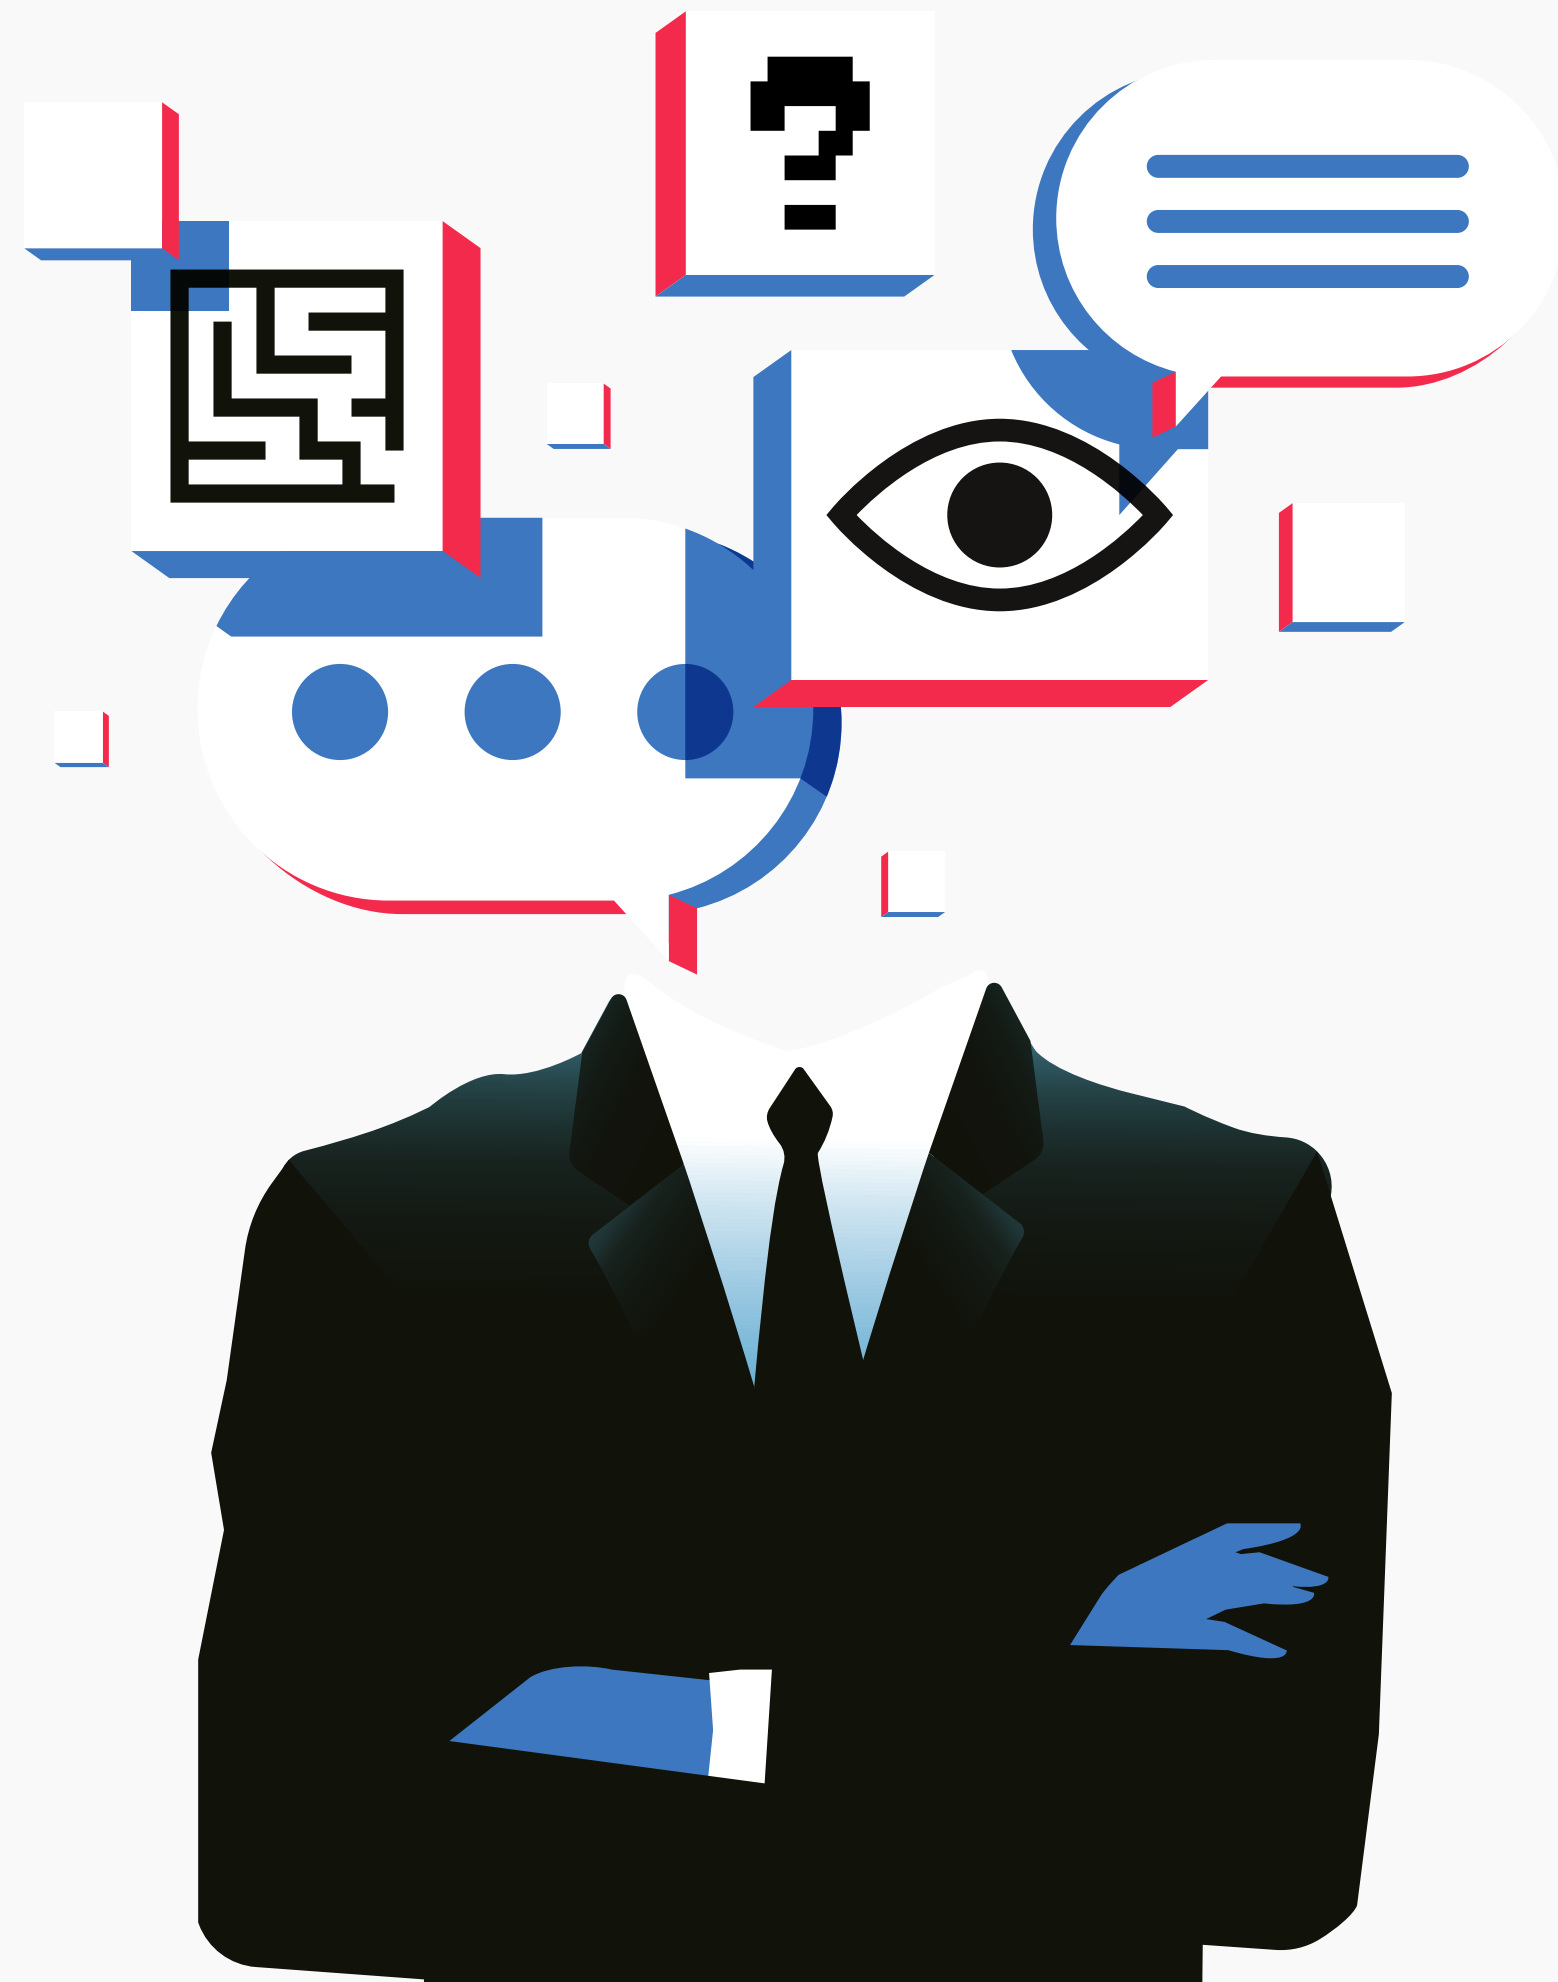

PromptX – Your AI Navigator for Enterprise Intelligence

PromptX is more than just an AI assistant—it's a modular, enterprise-ready AI Navigator designed to revolutionize how organizations access and act on knowledge. With AI-powered search, adaptive orchestration, and document-level security, PromptX ensures seamless information discovery, automates insight extraction, and drives intelligent workflows across systems, departments, and domains. By eliminating knowledge silos and enhancing decision-making, PromptX empowers enterprises to search less, know more, and act faster.

The Problem We Solve

Unlocking Hidden Knowledge: The Enterprise Challenge

Key Statistics

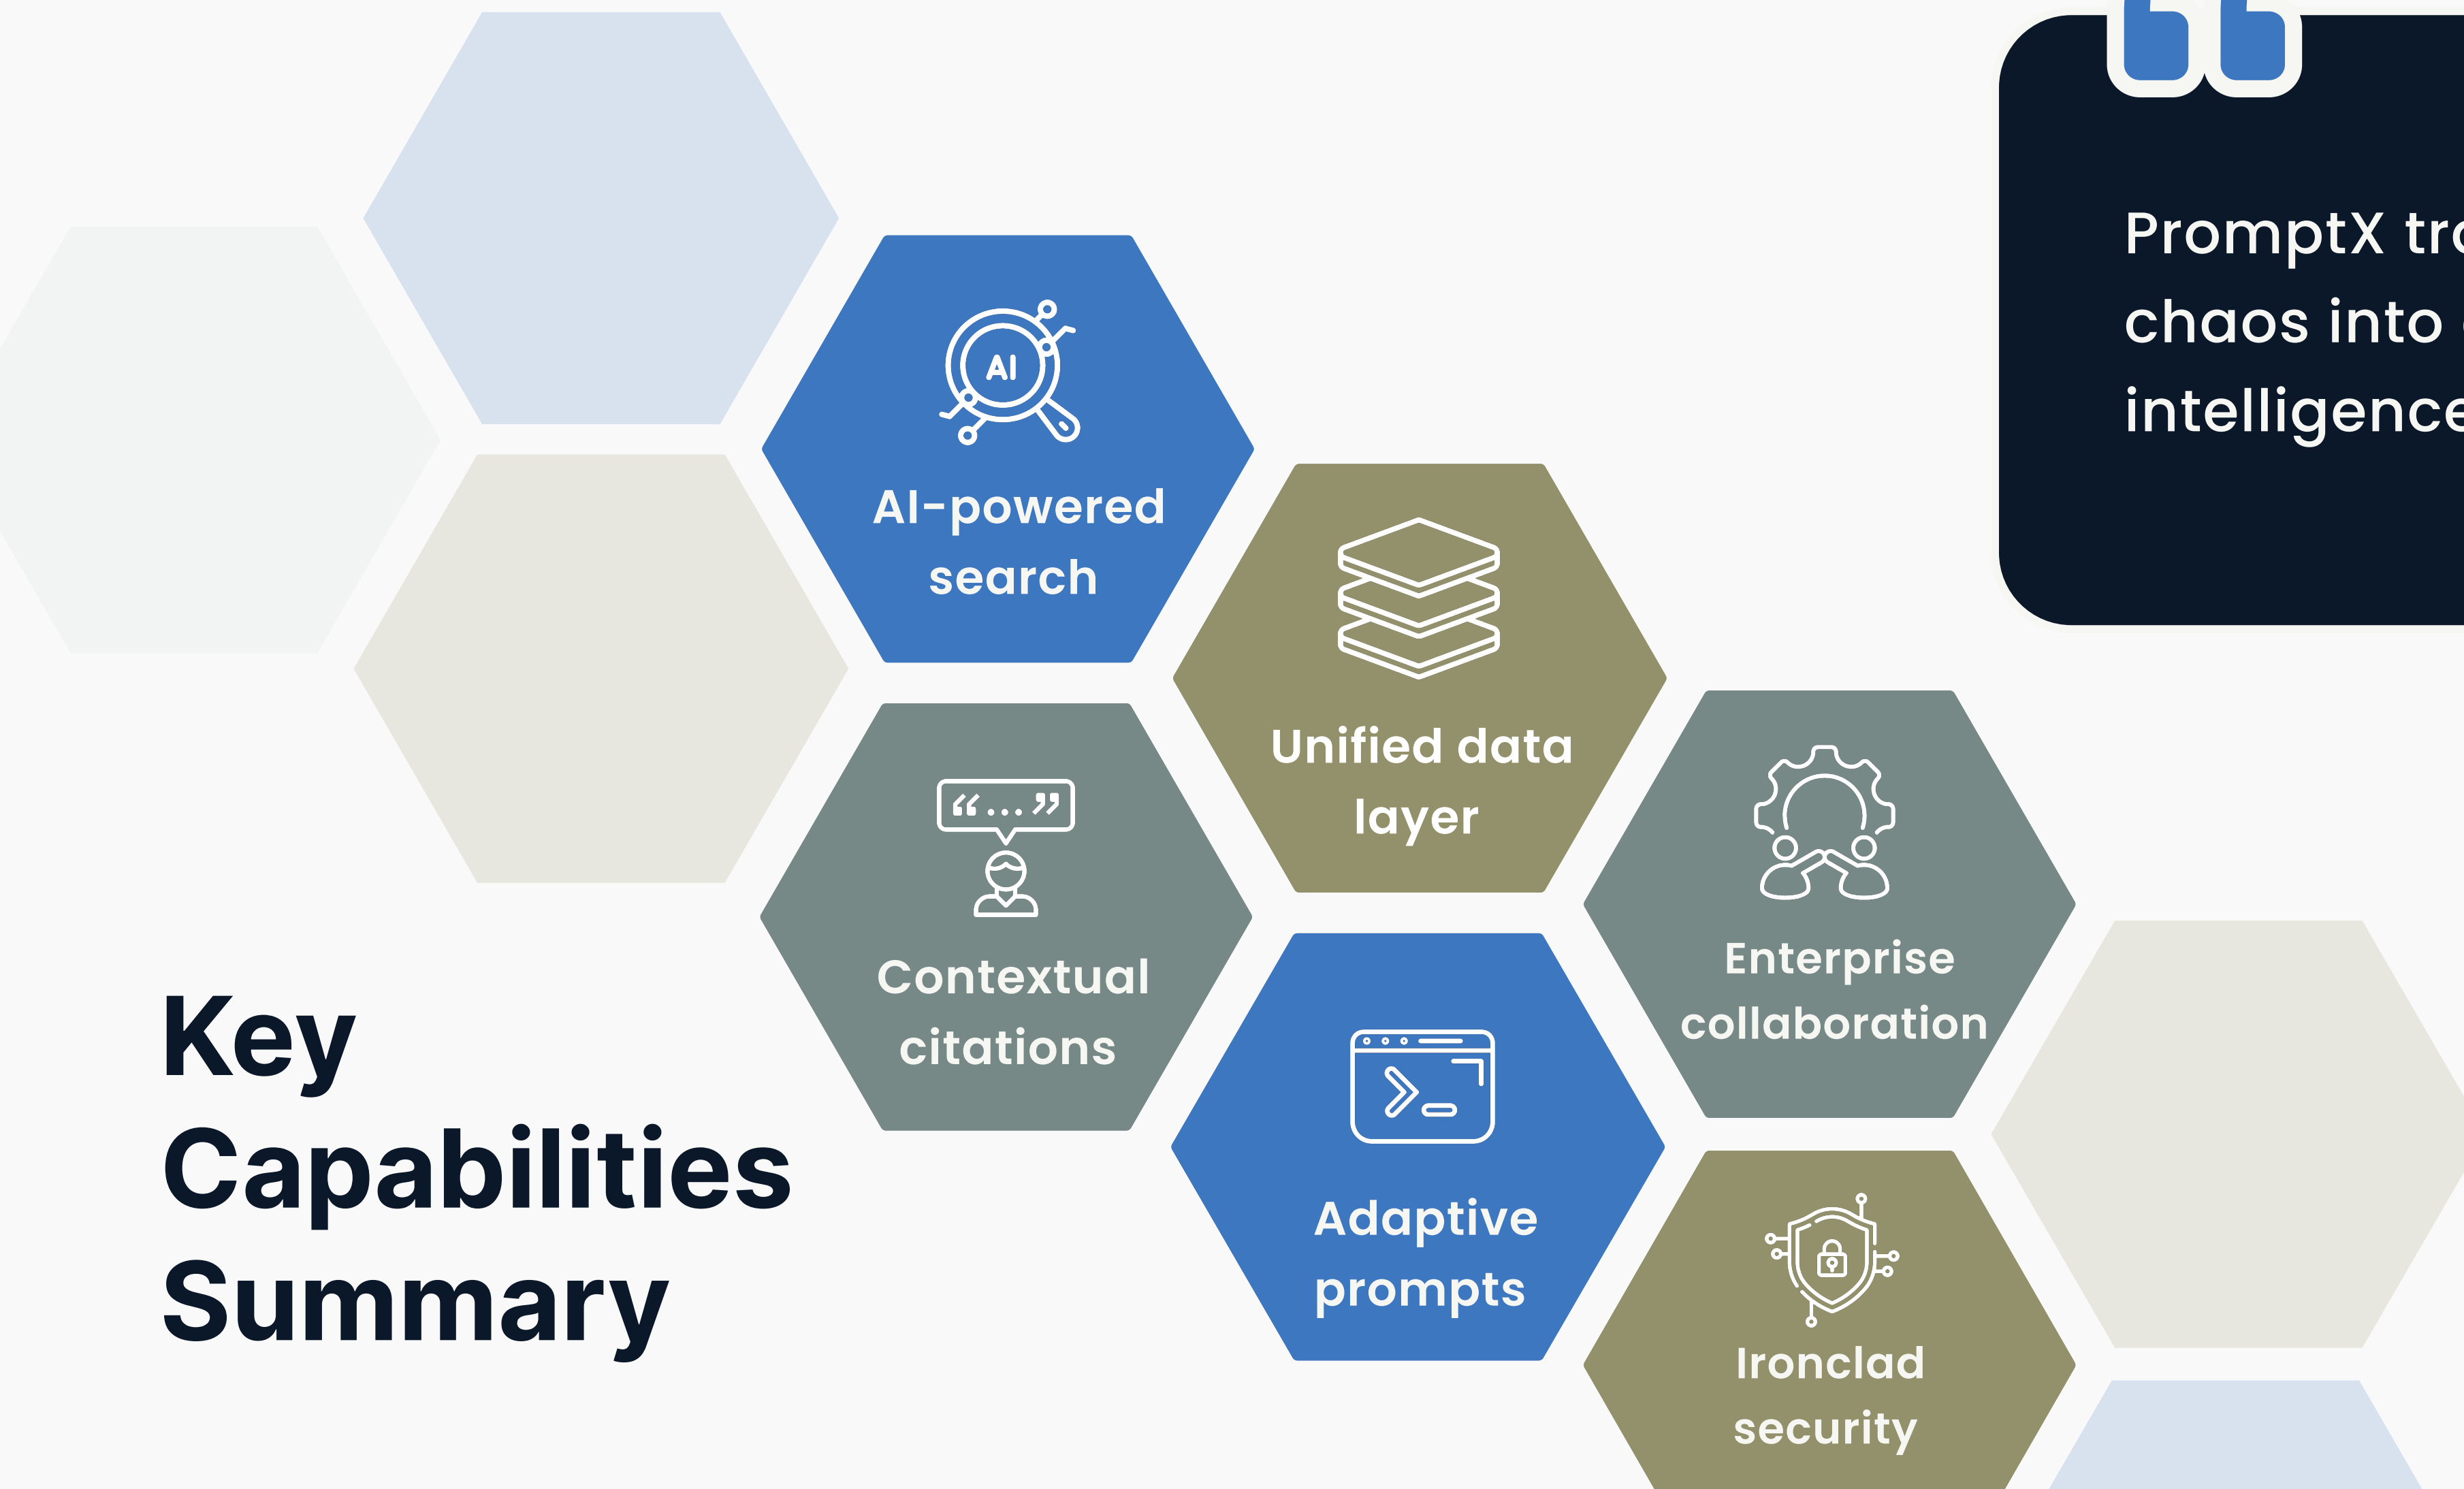

- 70% of enterprise knowledge is underutilized.
- Employees spend 20–30% of their time just searching for information.

Friction Points

- ☑ Inefficient keyword-based search tools
- ☑ Siloed knowledge across systems
- ☑ Disconnected collaboration workflows
- ☑ Delayed decision-making

What PromptX Enables Intelligence, Everywhere You Work

Key Capabilities Summary

“

PromptX transforms enterprise data chaos into contextual, actionable intelligence.

”

Deep Dive Into Key Capabilities

01: AI-Powered Search with Adaptive Prompt Library & Split-Chat Pathways

Short Summary

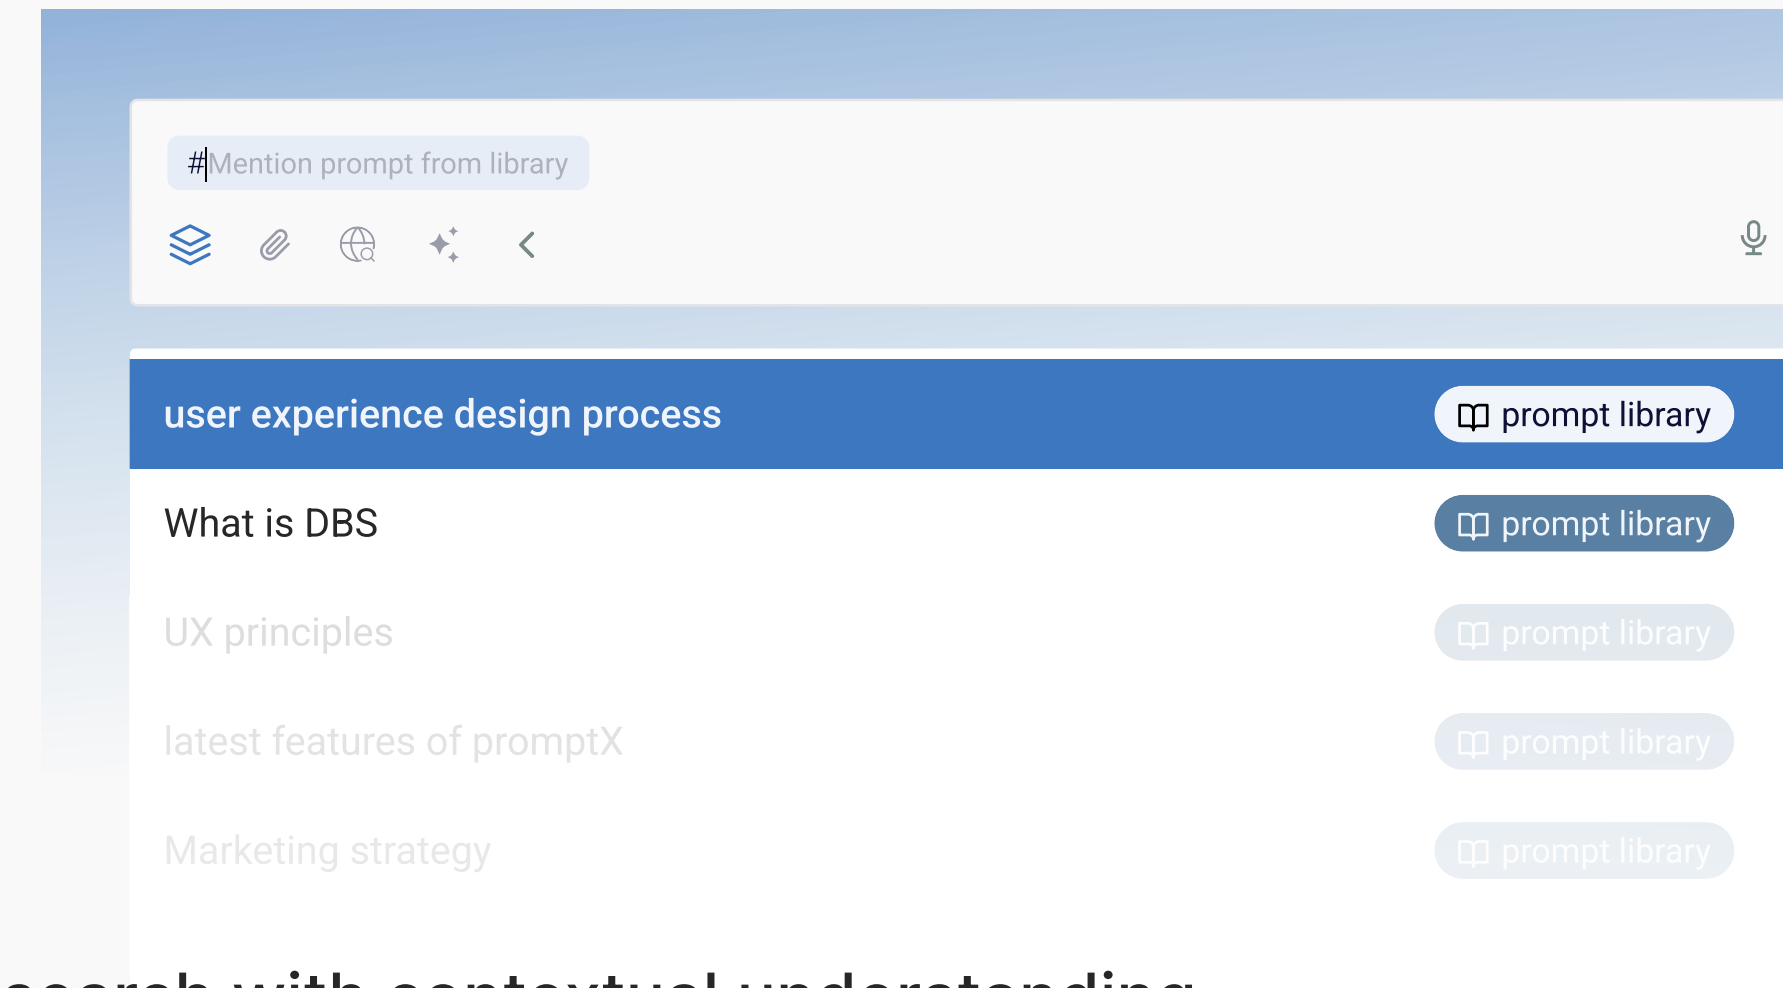

Accelerate enterprise decisions with AI-powered search that understands business-specific context, intent, and terminology. PromptX's evolving prompt library and split-chat capabilities help users refine questions, explore multiple scenarios, and drive efficient, accurate insights.

Business Outcome

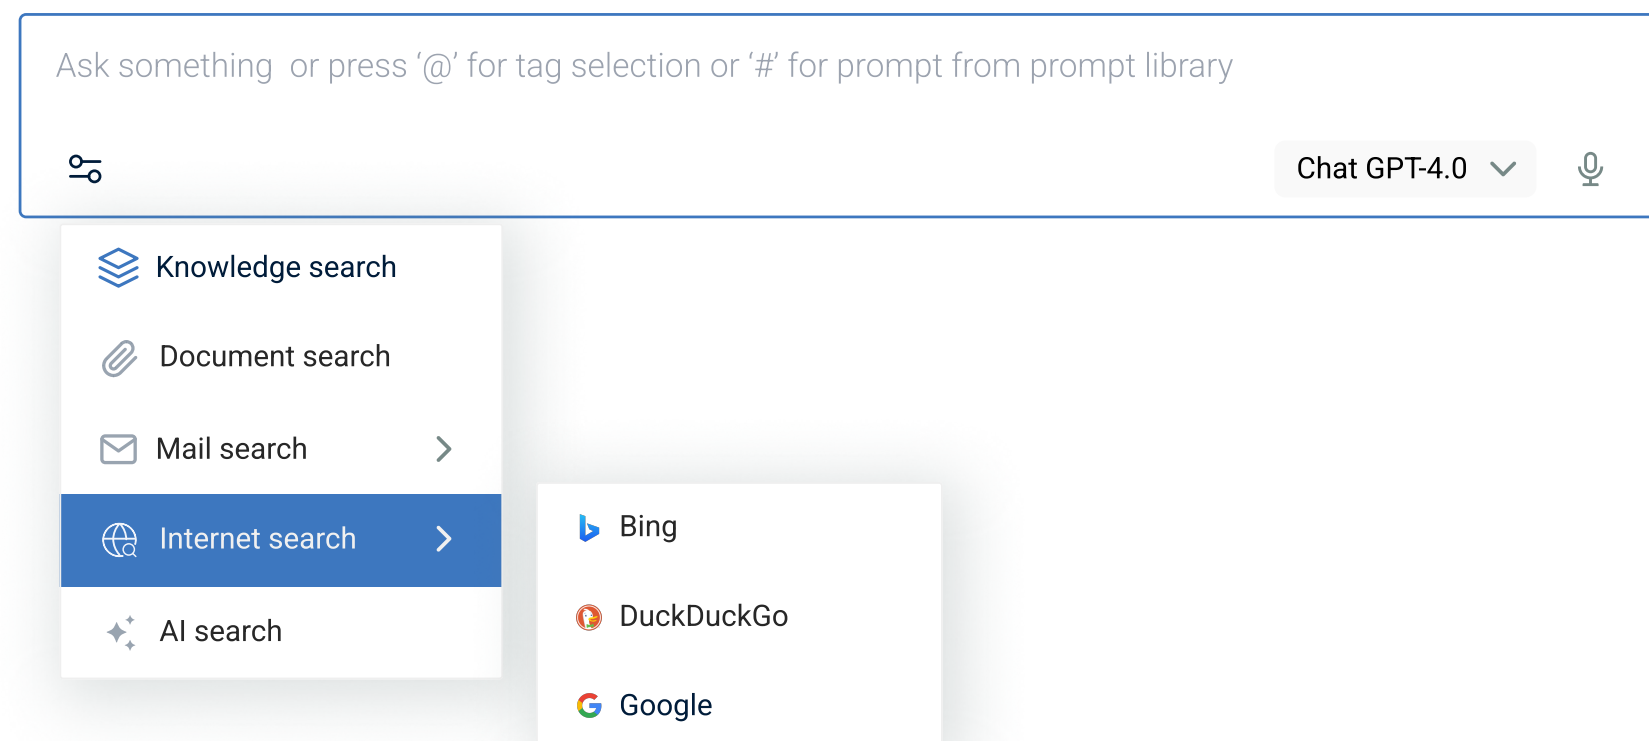

Cuts down search time, enhances decision-making accuracy, and boosts productivity through guided, traceable insights. Enables richer, scenario-based exploration and standardizes enterprise workflows through evolving, domain-specific prompts.

Key Features

- ✓ Human-like, semantic search with contextual understanding
- ✓ Role-aware, adaptive prompt suggestions that evolve with use
- ✓ Pre-built & customizable prompt libraries for every function and domain
- ✓ Split-Chat Pathways to explore alternate scenarios while preserving context
- ✓ Multi-format search (text, documents, voice, images)
- ✓ Source citations for trust and traceability
- ✓ Workflow automation through guided prompts and smart suggestions
- ✓ Prompt Library Management to curate and share across teams

02: Unified Knowledge Stack with Contextual Discovery

Key Features

- ✓ Centralized repository for saved responses and documents
- ✓ Unified search across files, emails, databases, and systems
- ✓ External search integration (Google, Bing, DuckDuckGo) with full citations
- ✓ AI-driven indexing and categorization for rapid retrieval
- ✓ Contextual recommendations based on user queries
- ✓ Automatic extraction of key insights from multiple sources
- ✓ Relationship mapping across structured and unstructured content
- ✓ Real-time sync with internal and external knowledge sources
- ✓ Transparent citations for source credibility

Short Summary

Empower teams with a centralized, federated knowledge layer that combines saved enterprise responses, real-time internal content, and trusted external search results. PromptX delivers precision-ranked, context-aware insights—backed by citations and business relevance.

Business Outcome

Improves knowledge accessibility and research accuracy by unifying internal content and trusted web sources into a single contextual search. Teams make faster, better-informed decisions—without switching platforms or losing traceability.

03: Semantic Enrichment & Unified Ingestion

Turn raw content into a federated , richly tagged knowledge layer-without moving a single byte.

What It Delivers

Named Entity Recognition & Semantic Tagging

Auto-labels people, organizations, financial/legal entities and custom domain terms.

Taxonomy-Aligned Classification

Applies industry-standard labels for precise filtering and governance.

Multi-Modal Ingestion Engine

Crawls PDFs, Office docs, emails, URLs and chat logs with consistent metadata.

Cross-Platform Knowledge Federation

Connects live to SharePoint , Slack, CRMs and legacy systems- no duplication required.

External Search Integration

Simultaneously invoke Google, Bing or DuckDuckGo as an additional knowledge source, fully provenance-tracked.

Strategic Impact

Unified Knowledge Stack Architecture

Combines all enterprise data into a single, searchable, federation layer.

Cross-Platform & Legacy System Integration

Leverages existing tools and infrastructure with zero disruption.

Outcome

A single, explainable knowledge graph that breaks down silos and surfaces hidden insights in real time.

04 : Team Collaboration with Granular Permissions

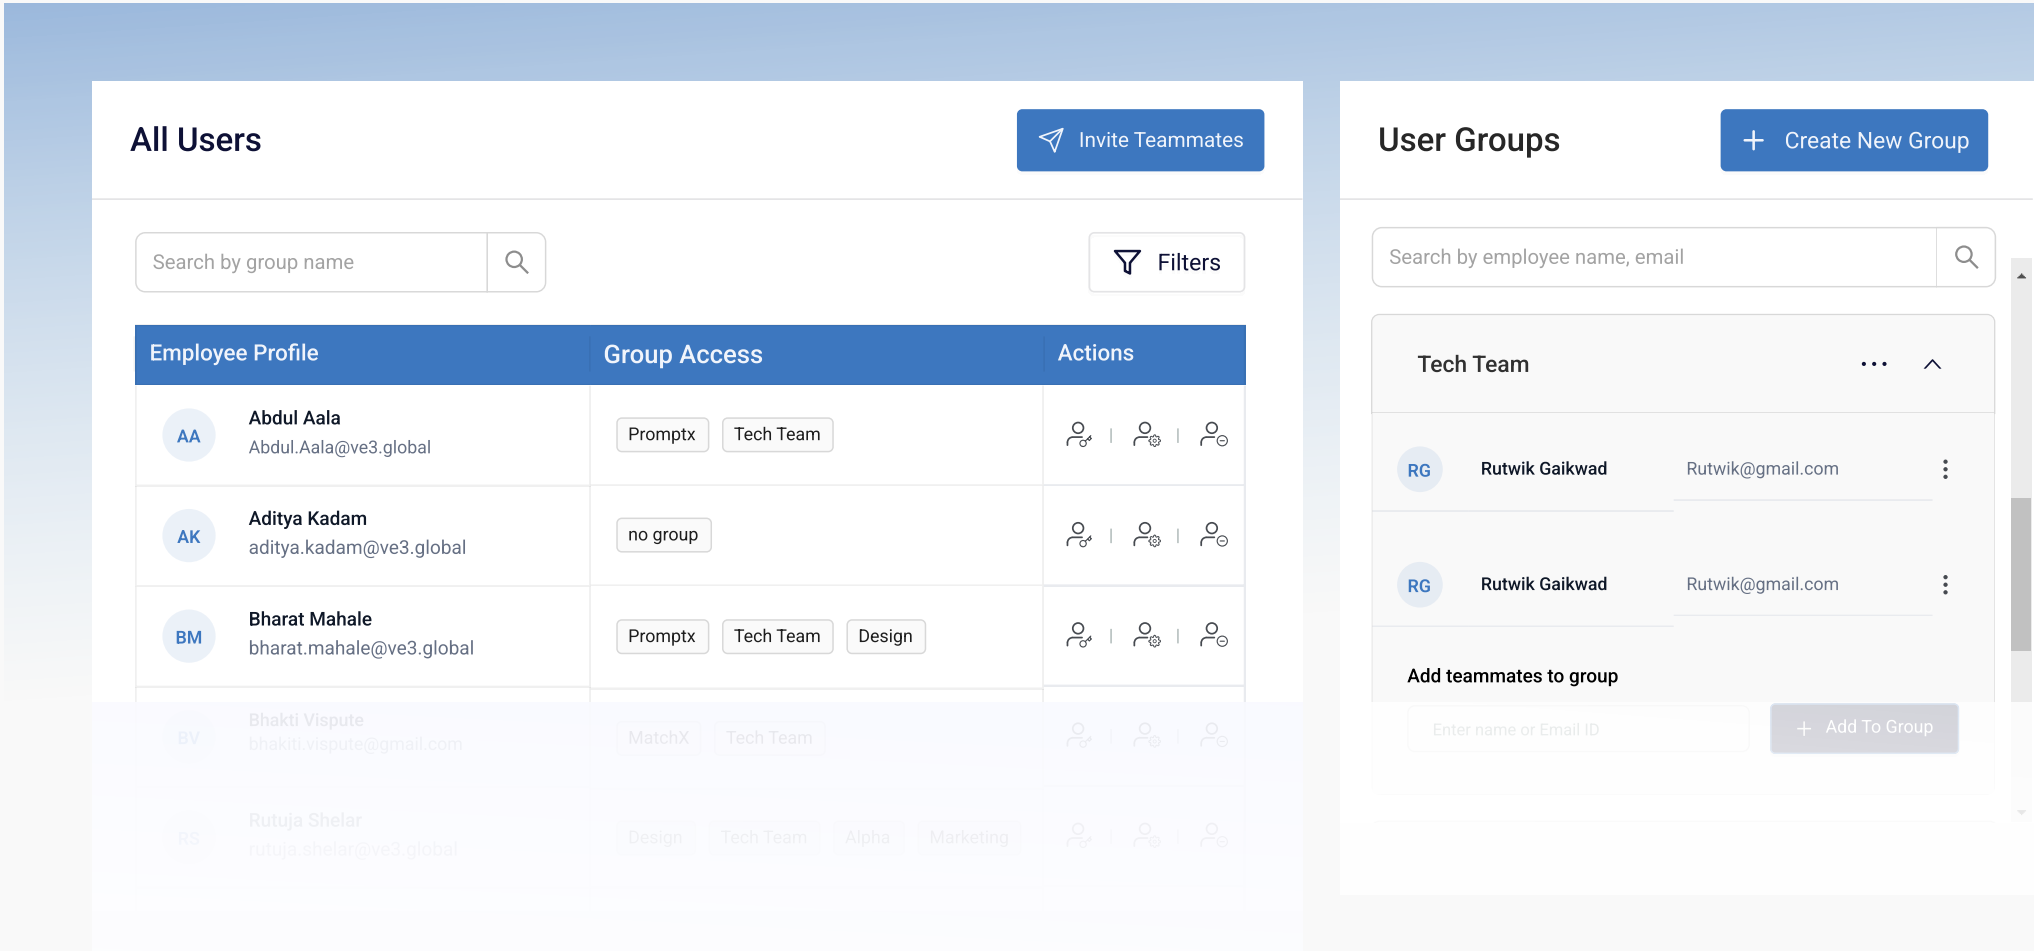

Short Summary

Enable teams to collaborate seamlessly within secure, AI-powered knowledge hubs that support co-creation while ensuring enterprise-grade security, compliance, and controlled access.

Business Outcome

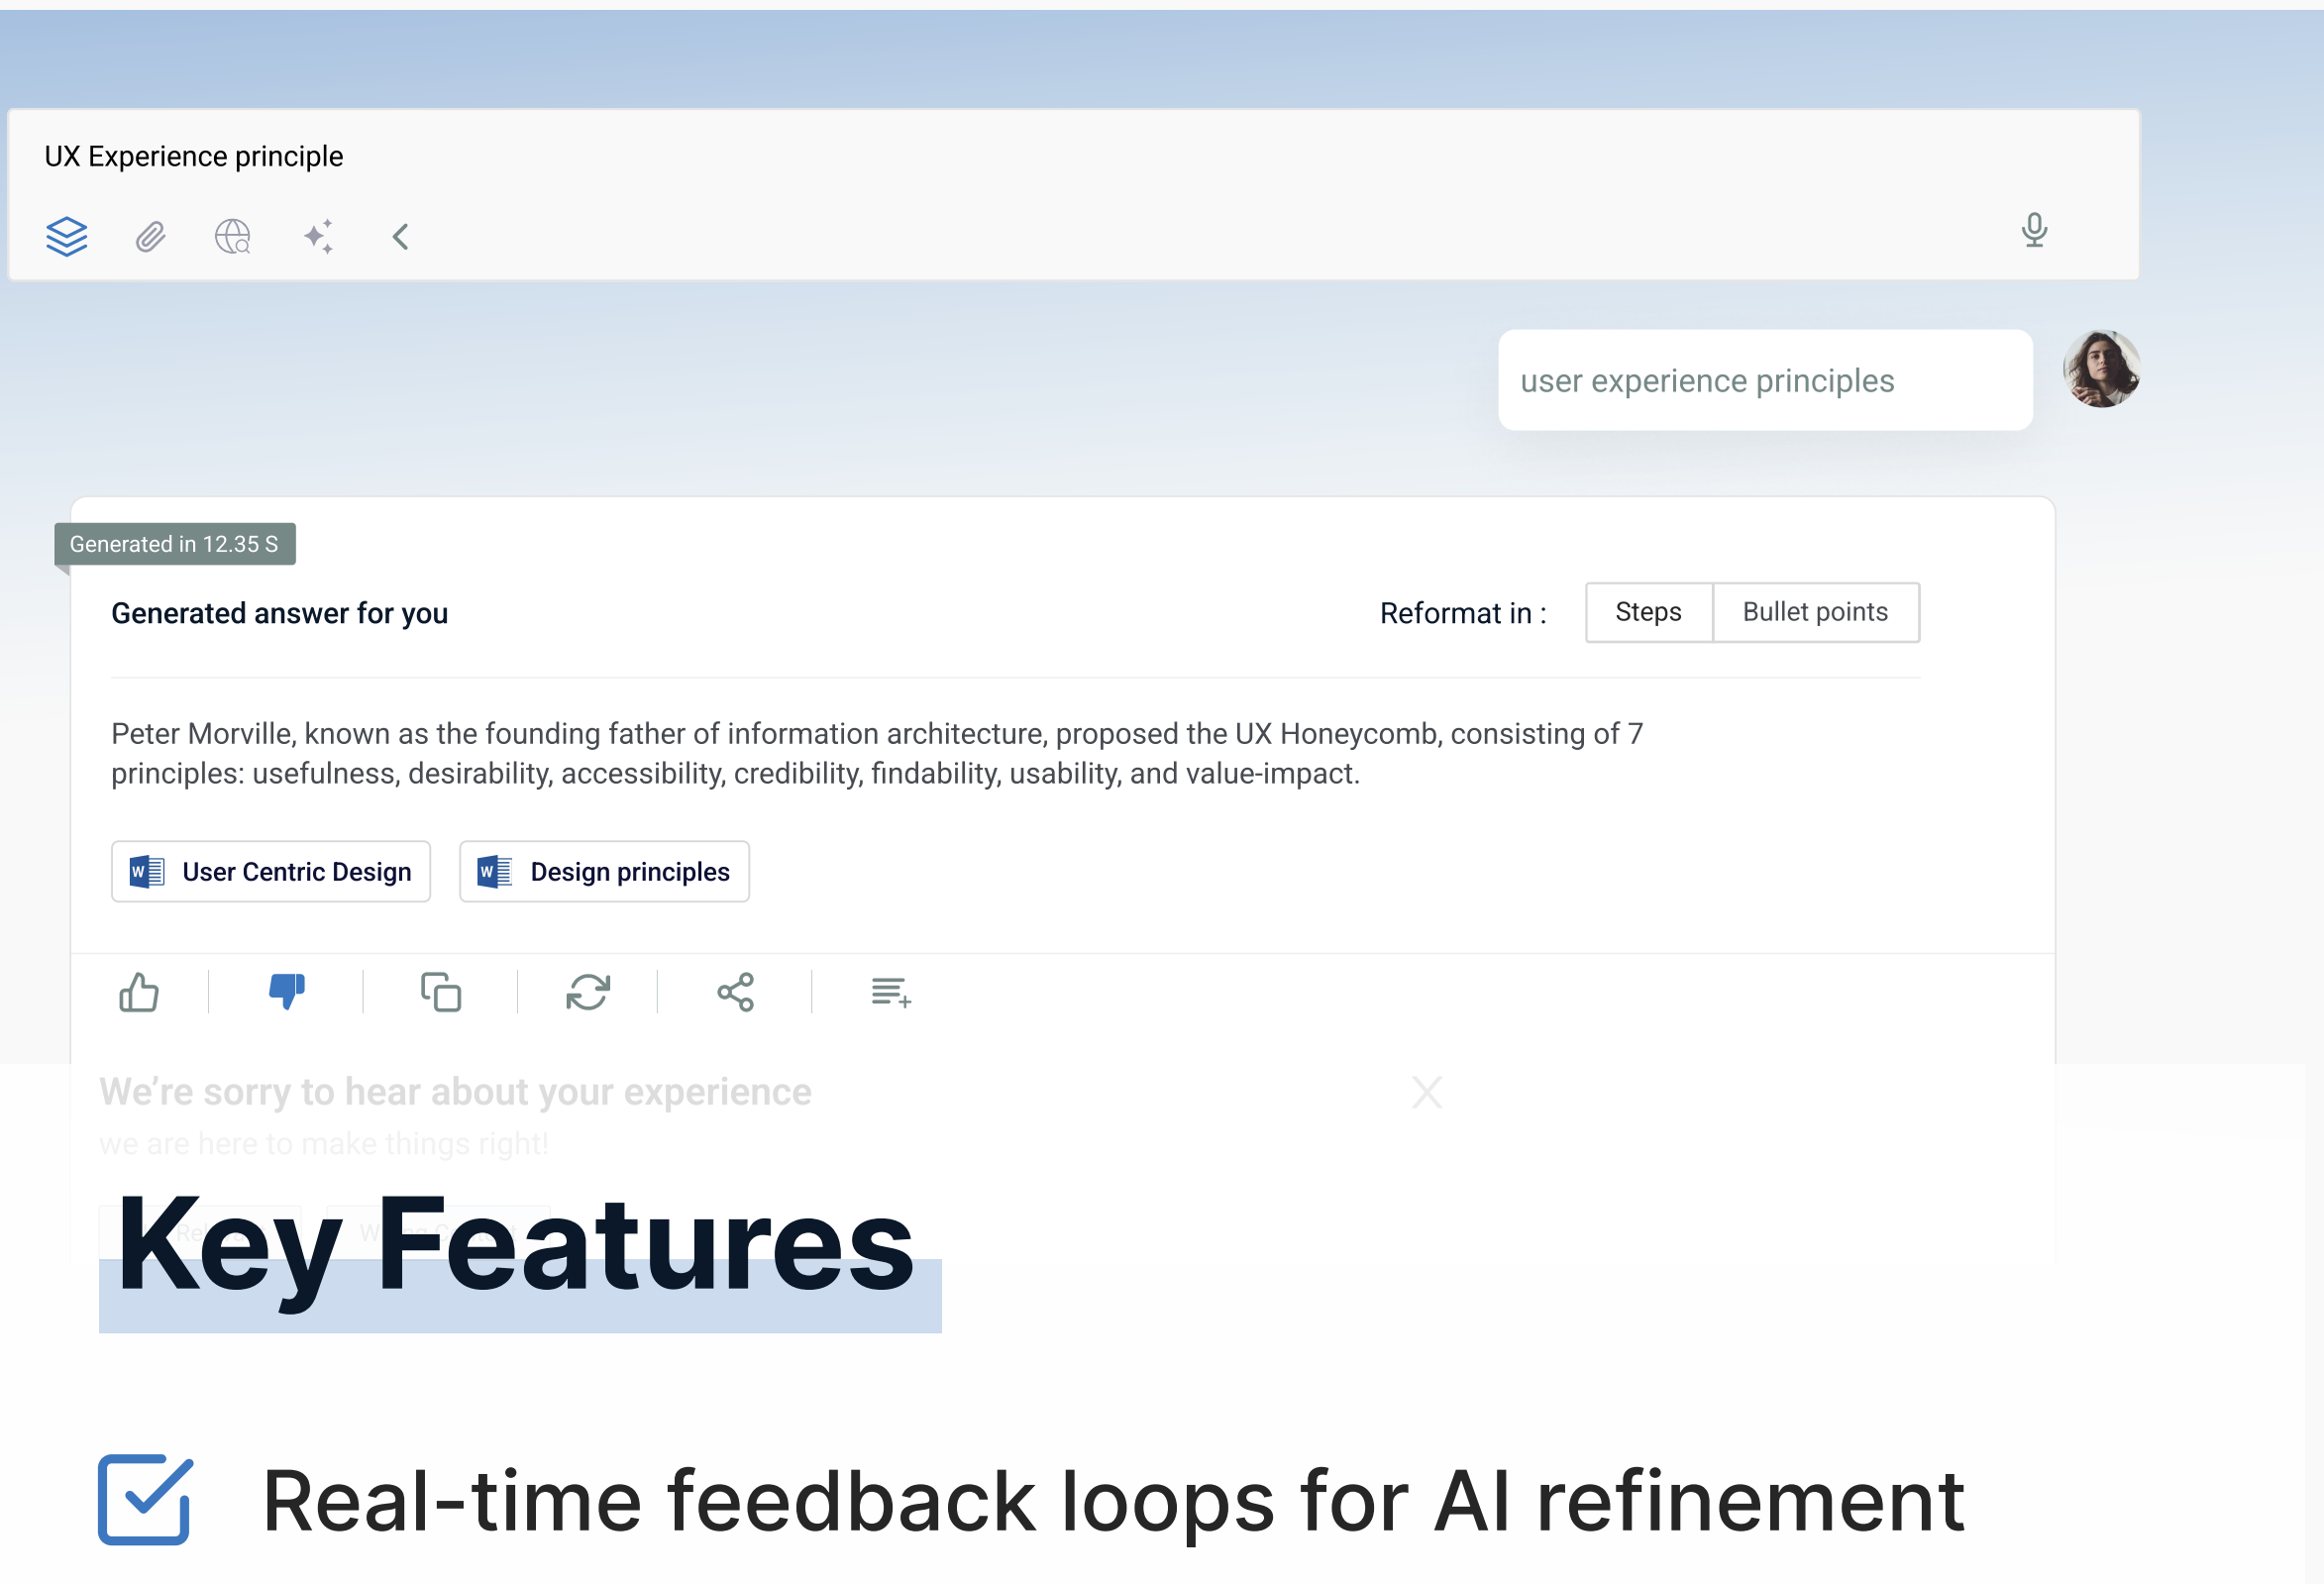

Boosts productivity and knowledge retention by enabling structured team collaboration while safeguarding sensitive business information and ensuring compliance with security standards.

Key Features

- ✓ Secure, shared workspaces with role-based access controls
- ✓ Document-level security and end-to-end encryption
- ✓ Real-time document collaboration and knowledge sharing
- ✓ Integrated task management and workflow automation
- ✓ Compliance with GDPR, HIPAA, and other regulatory standards

05 : Self-Improving AI through Feedback

Key Features

- ✓ Real-time feedback loops for AI refinement
- ✓ User-driven corrections and knowledge updates
- ✓ Adaptive learning to improve response accuracy
- ✓ Performance analytics for AI optimization

Short Summary

Continuously evolve AI performance through user feedback and learning models.

Business Outcome

Ensures AI accuracy and relevance by constantly improving based on enterprise-specific needs.

06 : Dashboards & System Intelligence

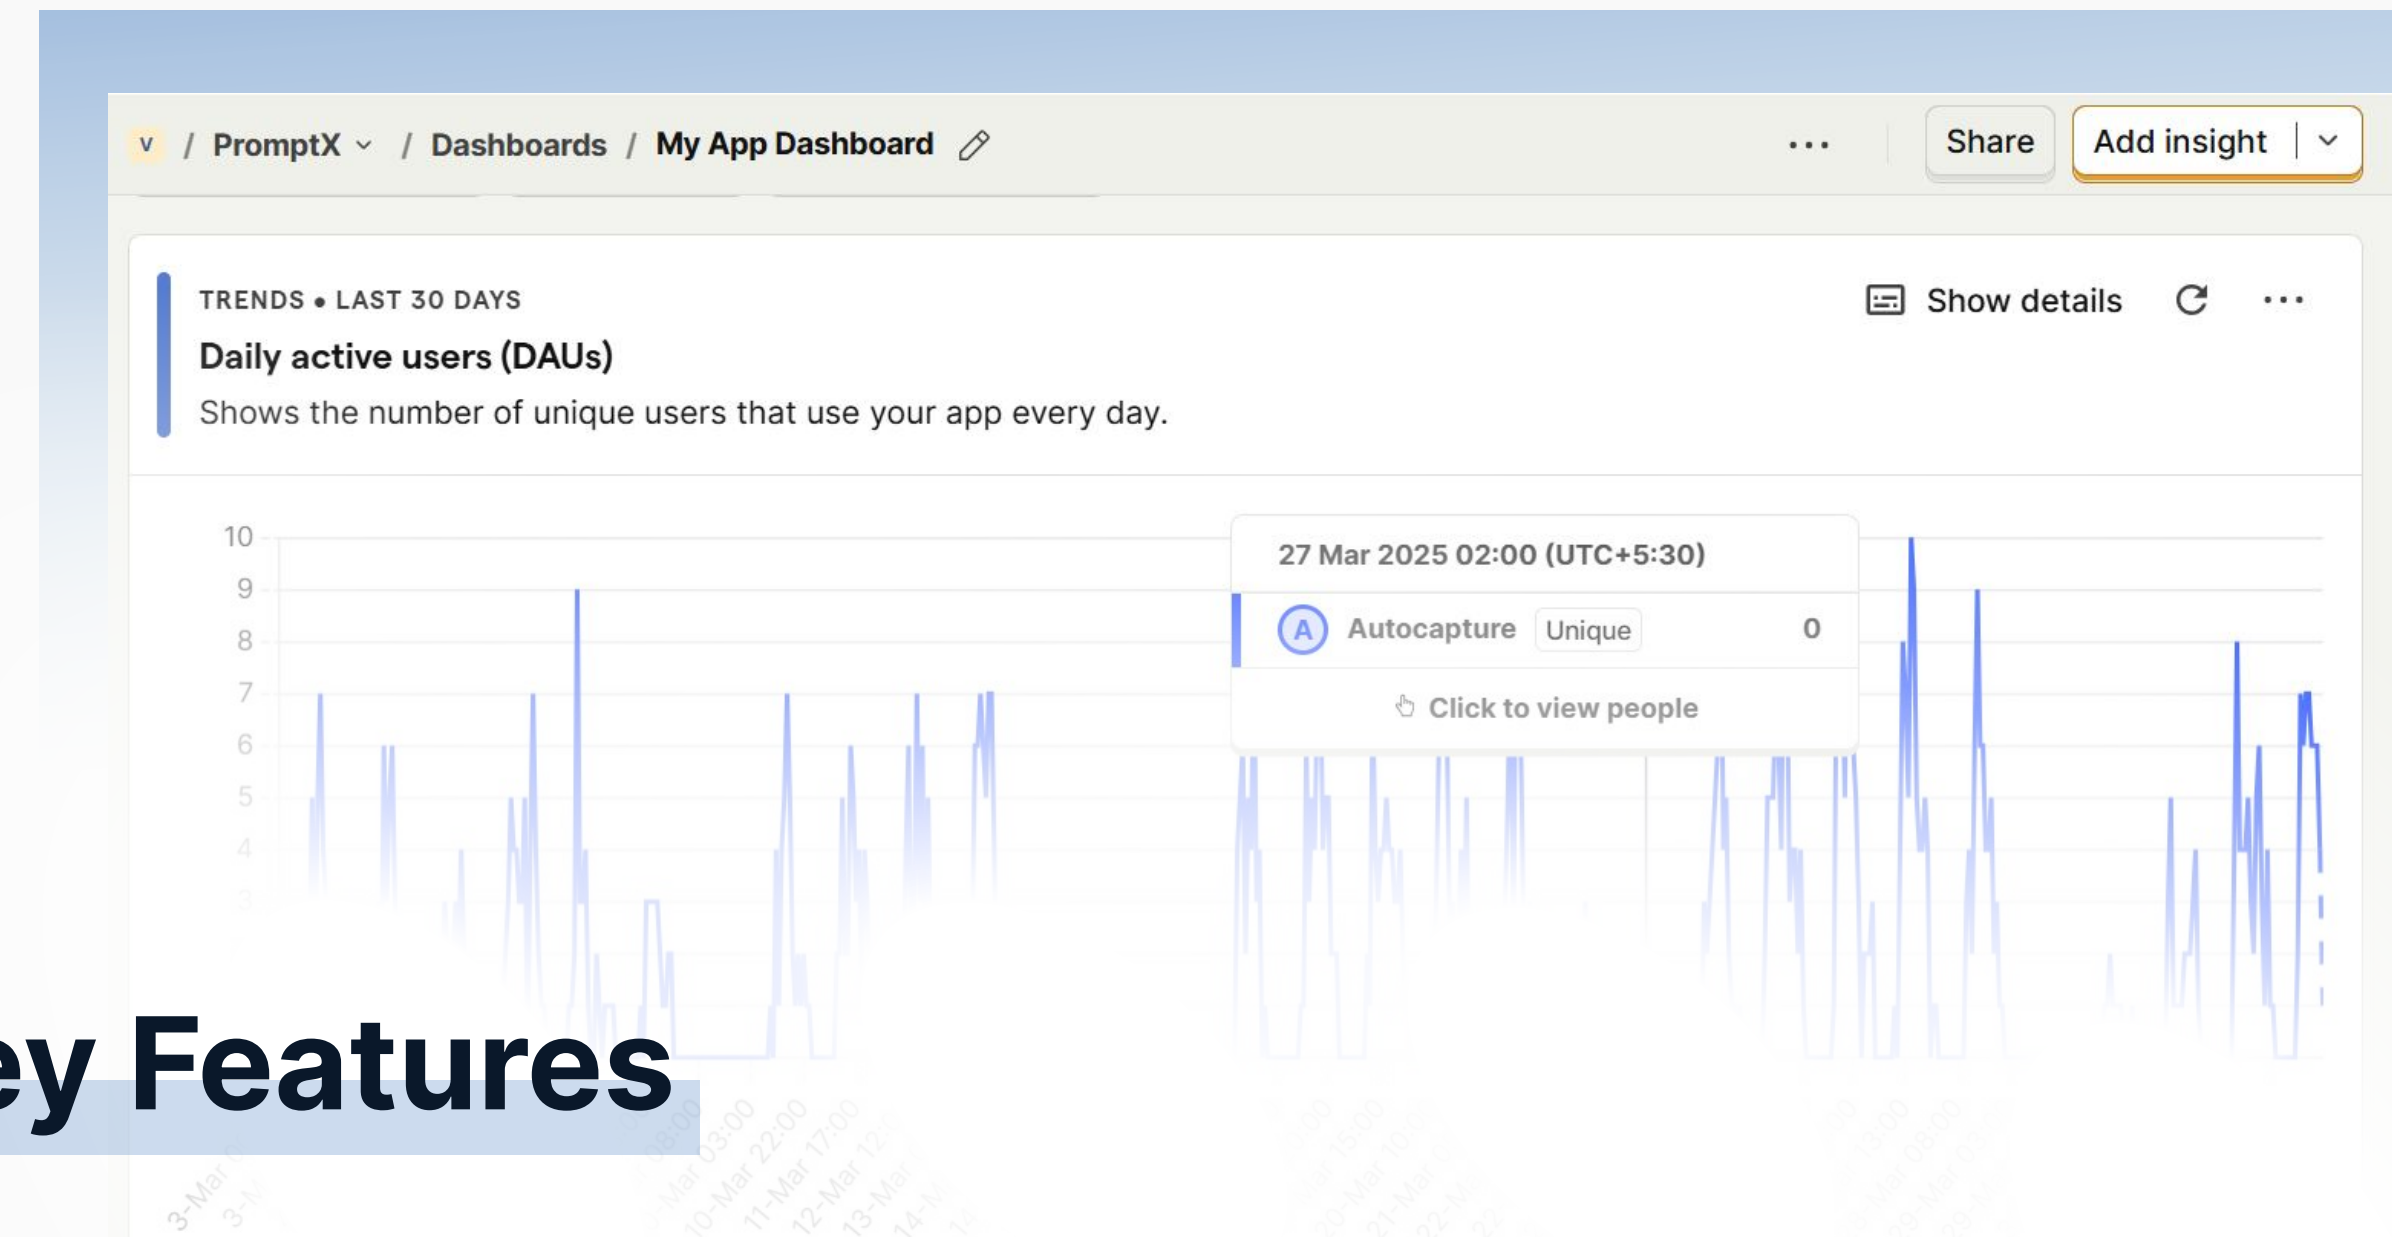

Short Summary

PromptX delivers more than answers—it delivers intelligence about the intelligence. AI-powered dashboards surface insights on usage, accuracy, and system health—ensuring transparency, trust, and continual optimization across users, prompts, and AI agents.

Business Outcome

Gives leaders and technical teams full visibility into PromptX performance and reliability—ensuring safe, accurate, and explainable AI usage. Drives trust, governance, and smarter decision-making with measurable insights.

Key Features

- ✓ Real-time analytics on usage, search patterns, and agent workflows
- ✓ Split-chat tracking to visualize scenario exploration and interaction depth
- ✓ Role-based dashboard views by team, domain, or function
- ✓ Risk and governance monitoring: hallucination, bias, and retrieval errors
- ✓ Model observability: grounding scores, entity coverage, QA benchmarks
- ✓ Evaluation metrics: BLEU, ROUGE, BERTScore, readability & RAGAS QA
- ✓ Custom dashboards with trigger alerts and underutilized feature flags
- ✓ Health monitoring for integrations, APIs, and platform stability

07 : Model Flexibility & Workflow Automation

Key Features

- ✓ Support for OpenAI, Mistral, Claude, & internal AI models
- ✓ Pre-configured industry-specific models(finance,healthcare,legal,etc.)
- ✓ Easily switch between models without disrupting workflows
- ✓ Custom AI training based on enterprise data
- ✓ Workflow automation tailored to business needs
- ✓ Hybrid AI approach-combine multiple models for enhanced accuracy
- ✓ Compliance-aligned AI solutions for regulated industries
- ✓ Seamless integration with existing enterprise applications & data sources

Short Summary

Unlock the full potential of AI by choosing the right model for your needs and tailoring AI capabilities to fit industry-specific workflows, regulatory requirements, and unique use cases. Seamlessly integrate and switch between models to deliver optimized, compliance-aligned AI experiences.

Business Outcome

Empowers organizations with flexible, highly relevant AI experiences, optimizing efficiency, cost-effectiveness, and compliance across industries while enabling seamless integration and model adaptation.

08 : Cloud-Agnostic Architecture & Enterprise Security

Deploy anywhere, connect any LLM or search engine – & lock down access with enterprise –grade controls.

What It Delivers

Cloud-Agnostic Deployment

AWS, Azure, GCP, hybrid or on-prem.

Model-Flexible Integration

Plug in OpenAI, Mistral, Claude or fine-tuned internal LLMs.

Fine-Grained Permissions & Audit Logs

Document-level ACLs, custom roles/groups, full interaction monitoring.

Compliance by Design

GDPR, ISO 27001, NHS DSPT and global standards.

Real-Time Guardrails & Prompt Injection Defense

Active filters for hallucinations, bias, toxicity and adversarial attacks.

Strategic Impact

Cloud-Agnostic & Model-Flexible Design

No vendor lock-in—future-proof and extensible.

Enterprise-Grade Security & Governance

Built-in compliance, auditability and risk controls.

Outcome

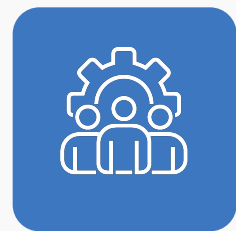

Enterprise confidence with robust, scalable deployment and bullet-proof security.

09: Embedded AI Agents & Extensibility

Bring AI assistants and PromptX services directly into your tools and workflows.

What It Delivers

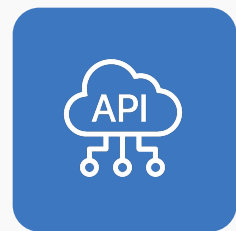

Agent Framework & Role-Based Assistants

Build scoped bots (HRBot, LegalBot, FinanceBot...) with dedicated memory, access controls and hand-off logic.

Slack, Teams & Embedded Experience

Native integrations let users query, retrieve and co-author answers inside Microsoft Teams, Slack or any web portal.

API-First Architecture & SDK Integration

Secure REST APIs and SDKs for search-as-a-service, prompt chaining, real-time retrieval and agent orchestration.

Strategic Impact

Intelligent Workforce Extension

Department-specific assistants reduce support load and speed up routine tasks.

No-Code & Pro-Dev Friendly

Citizen developers can embed AI via low-code SDKs while engineers leverage full APIs.

Outcome

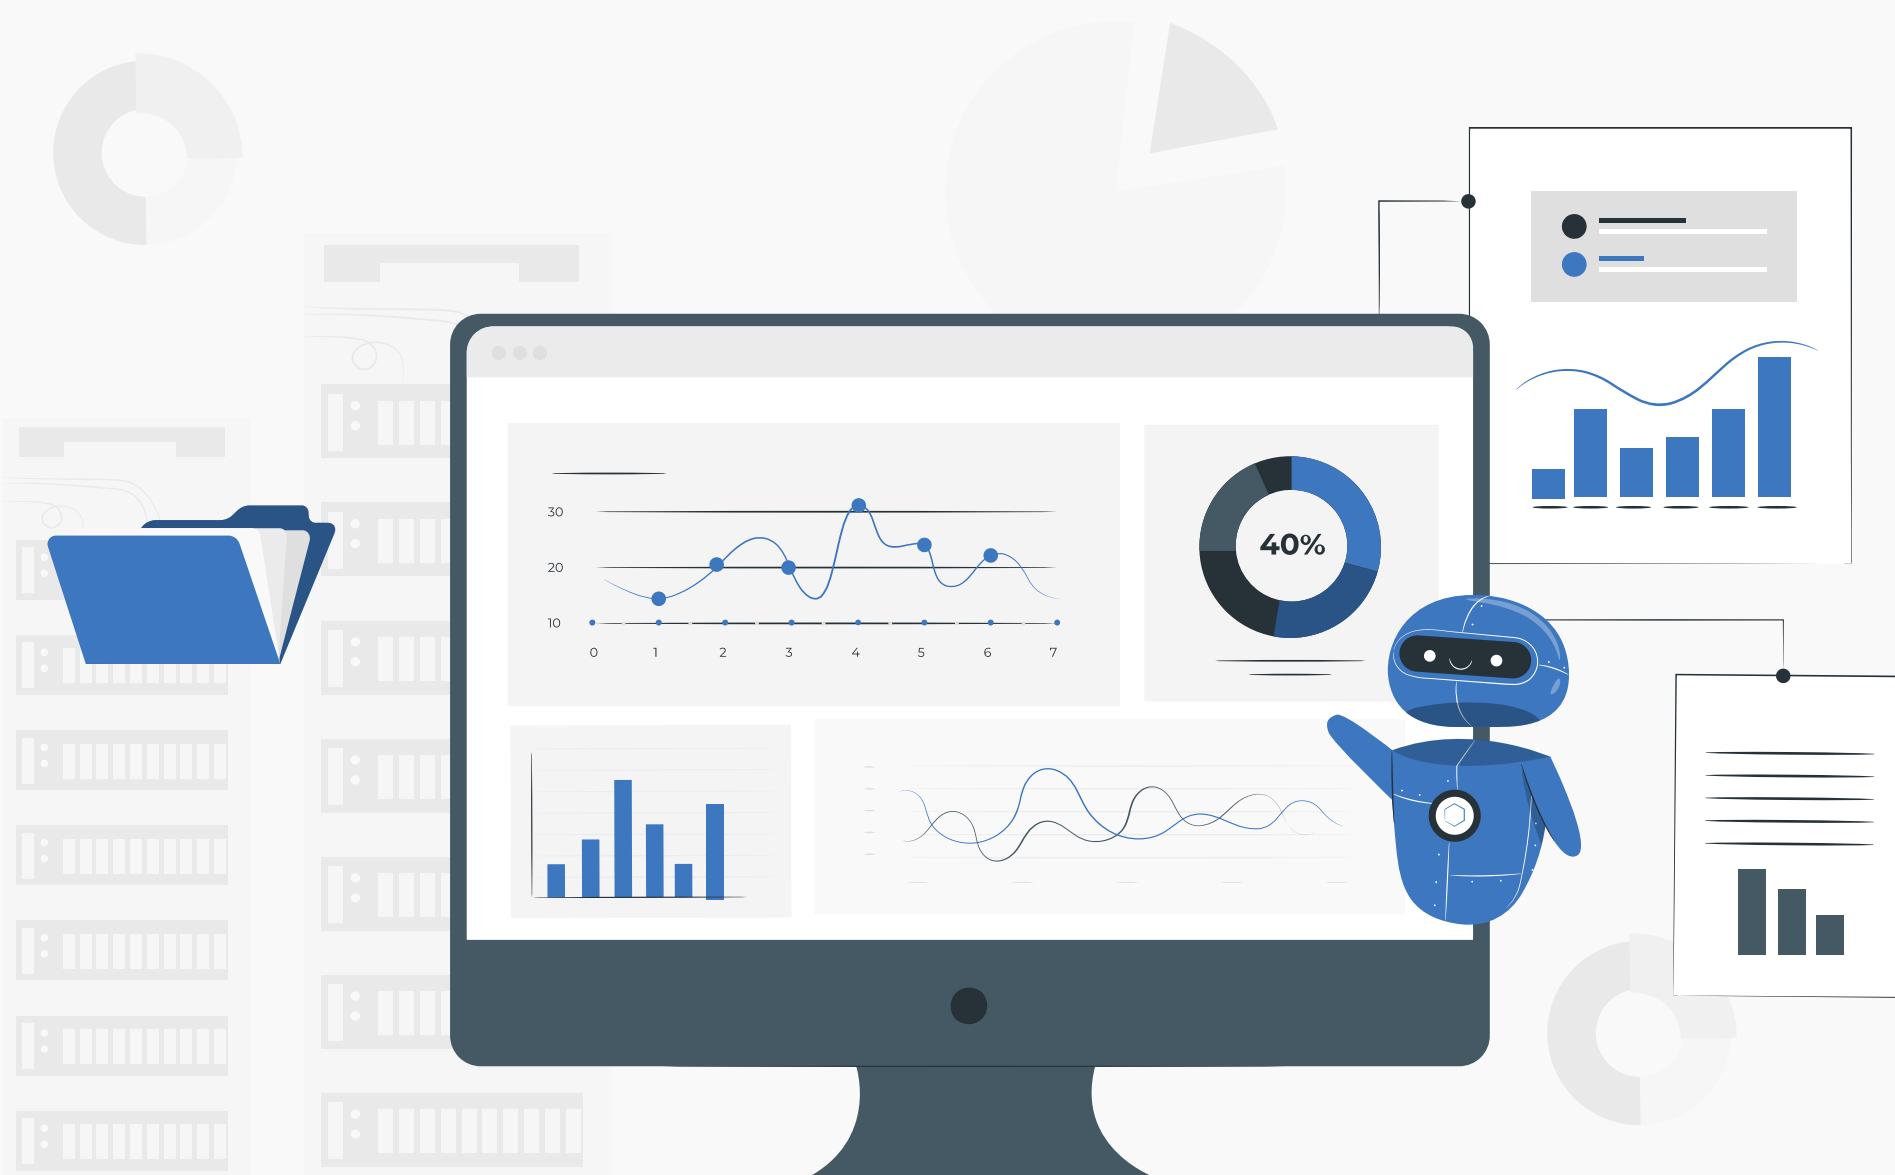

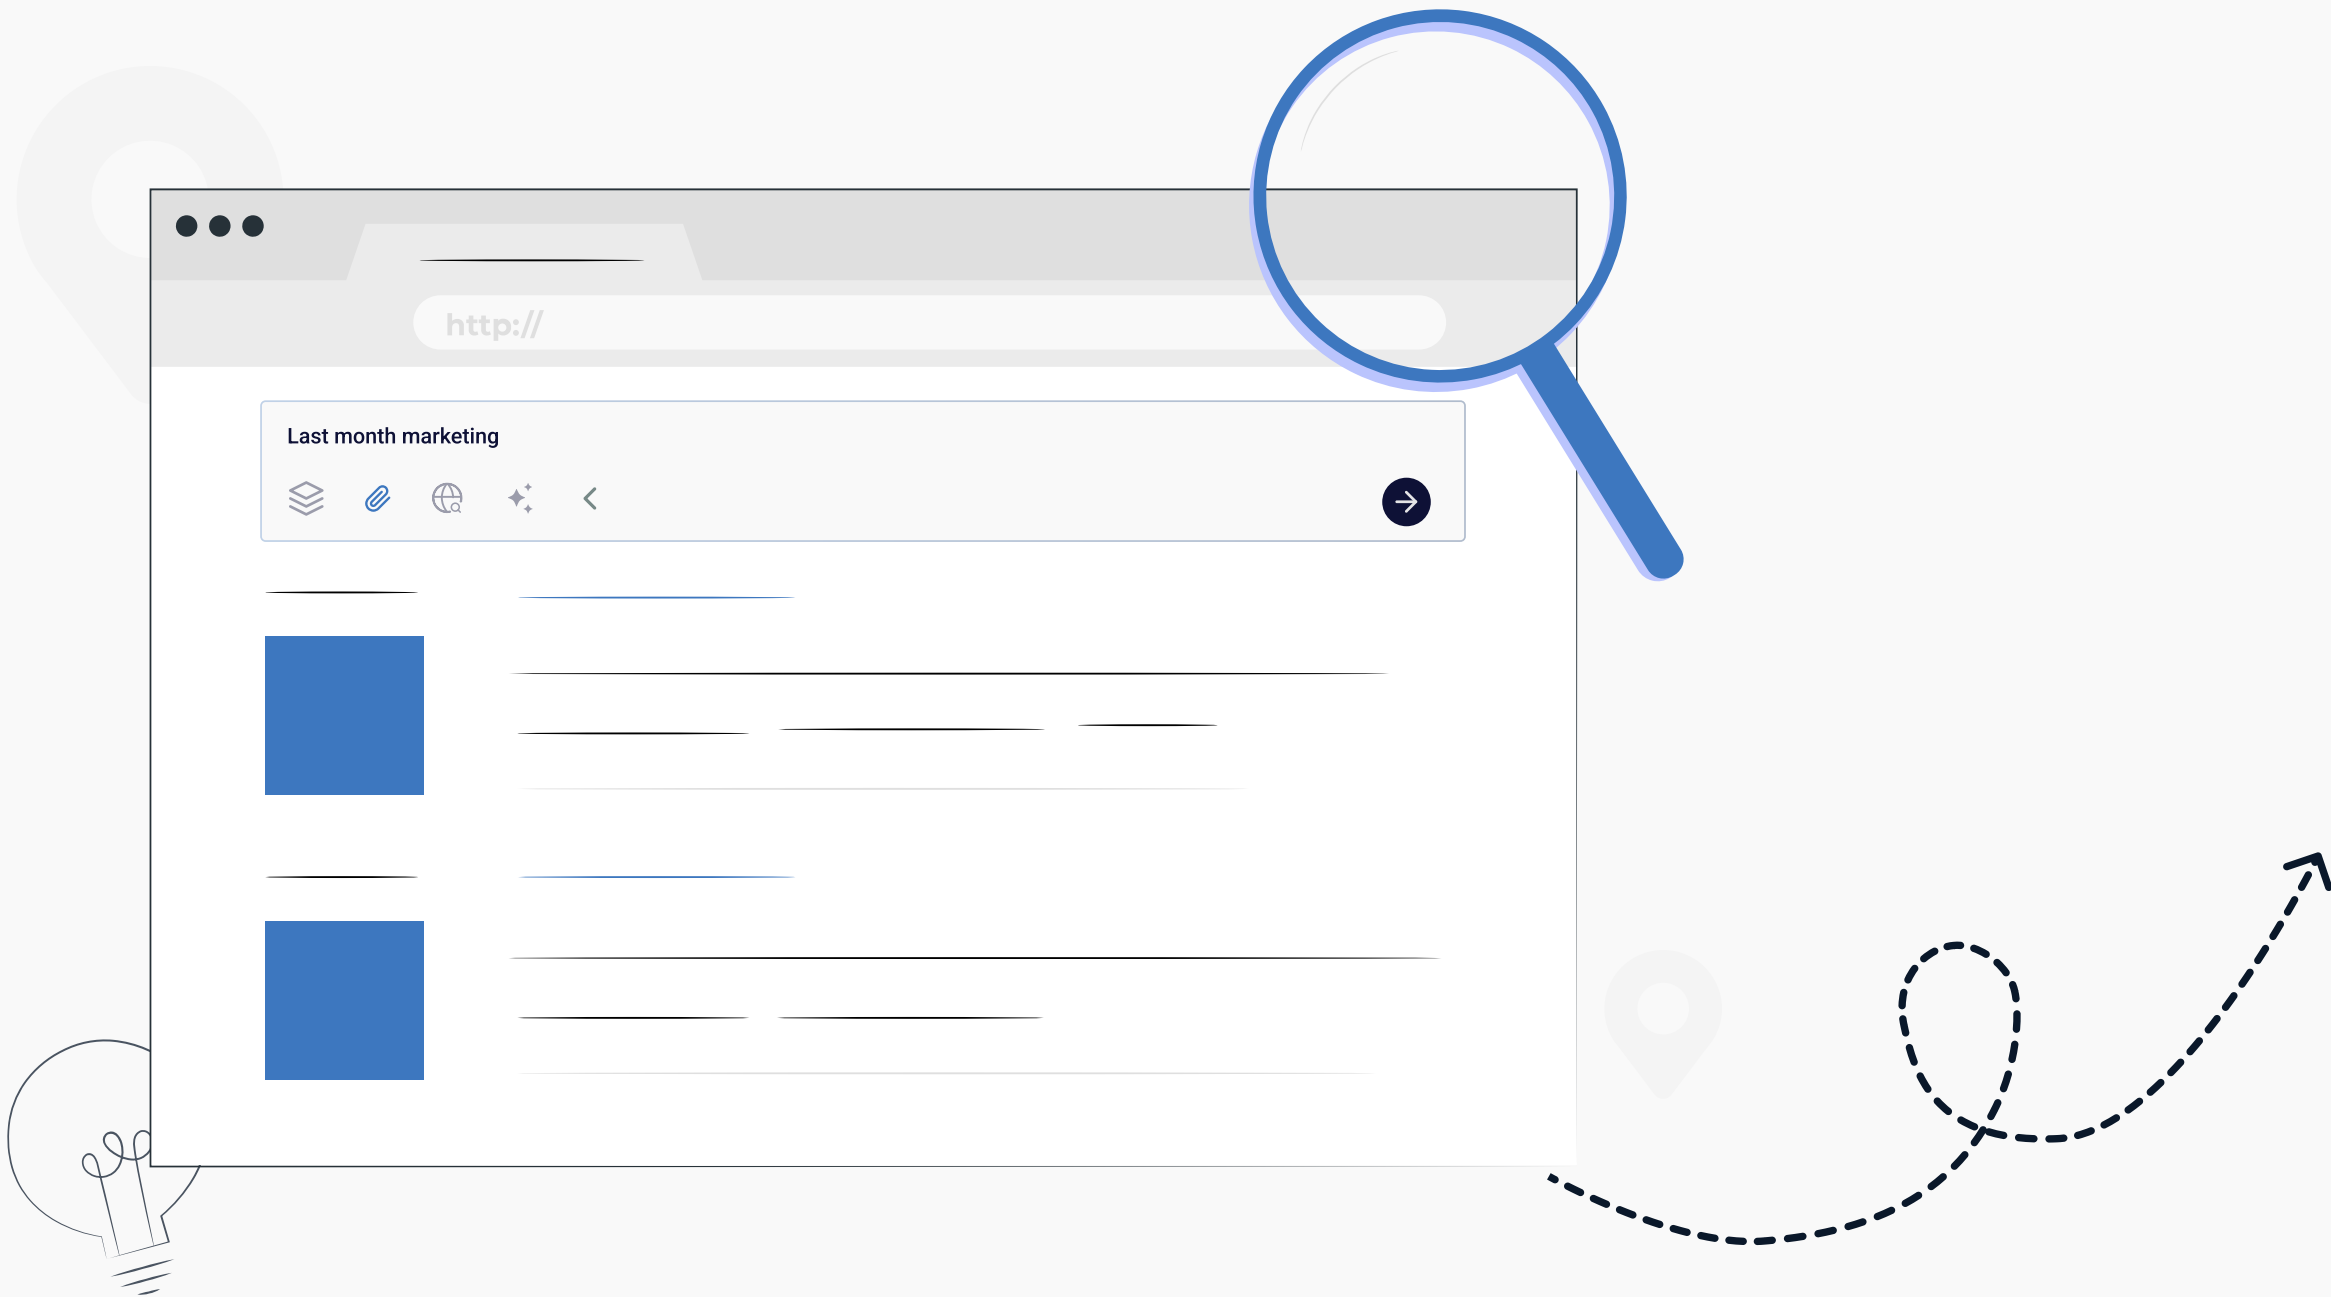

A truly embedded AI layer —your teams get insights and automation where they already work, driving adoption and ROI.

Product In Action

Searching in action

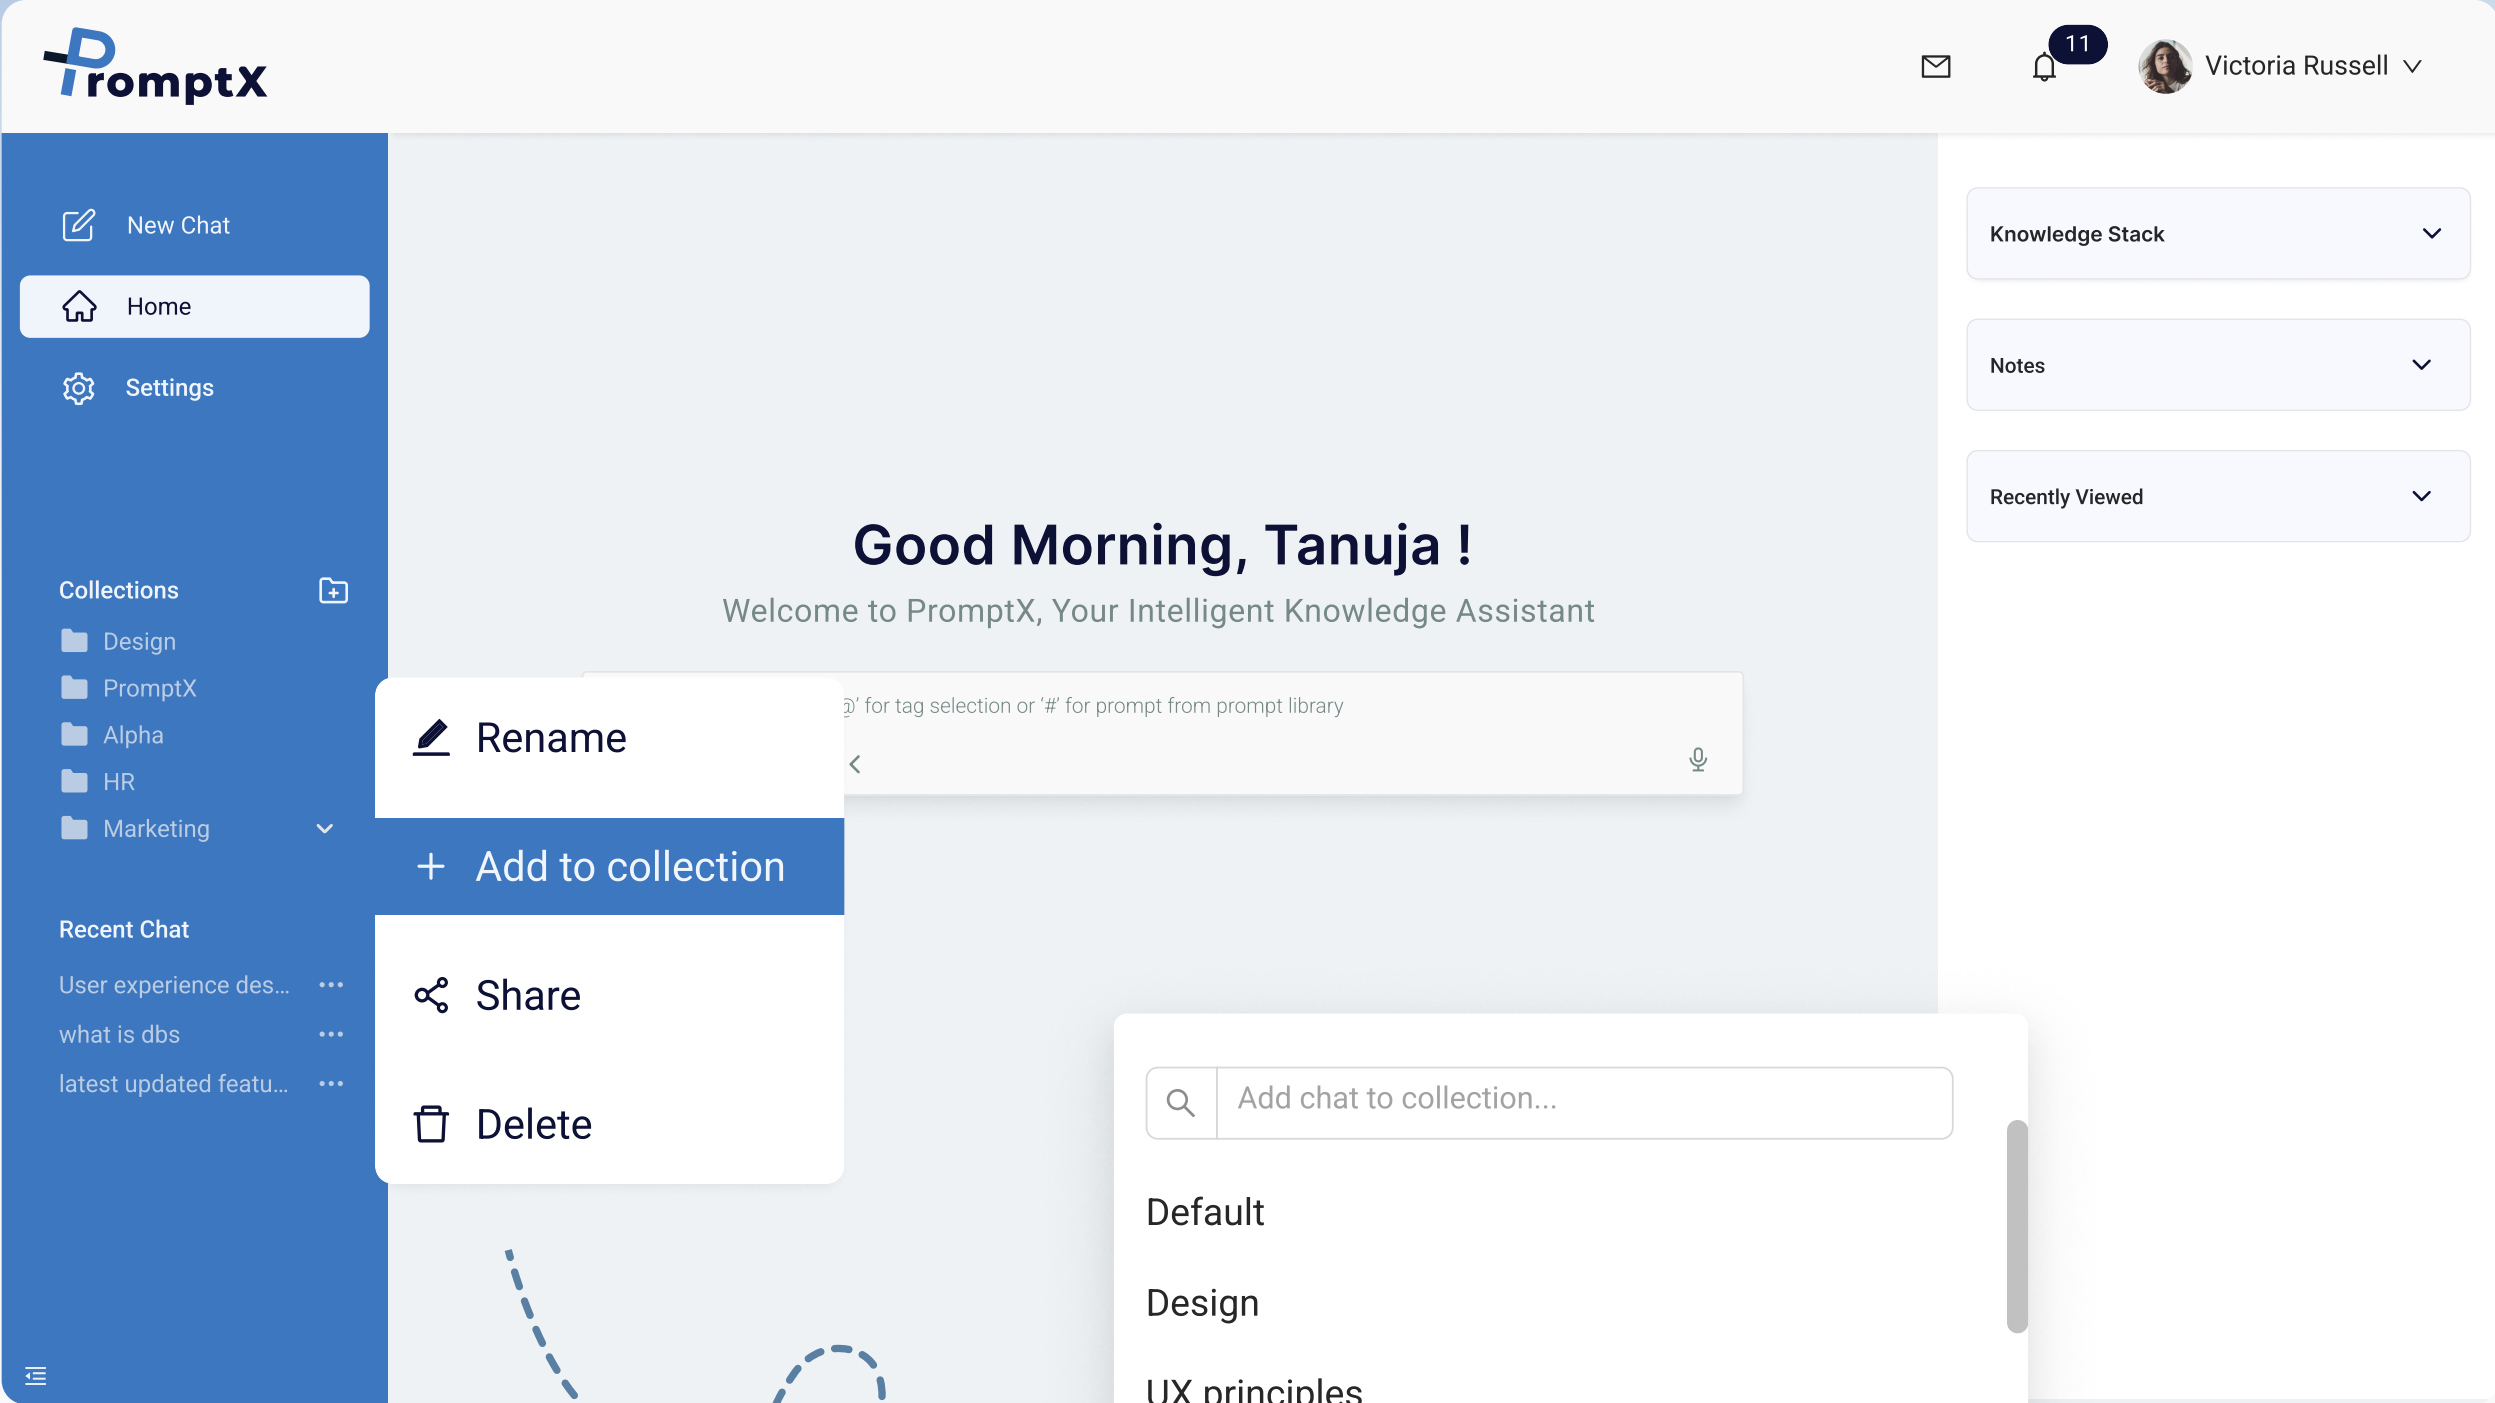

Effortless, intelligent, and precise—Search in Action transforms the way you find and use information.

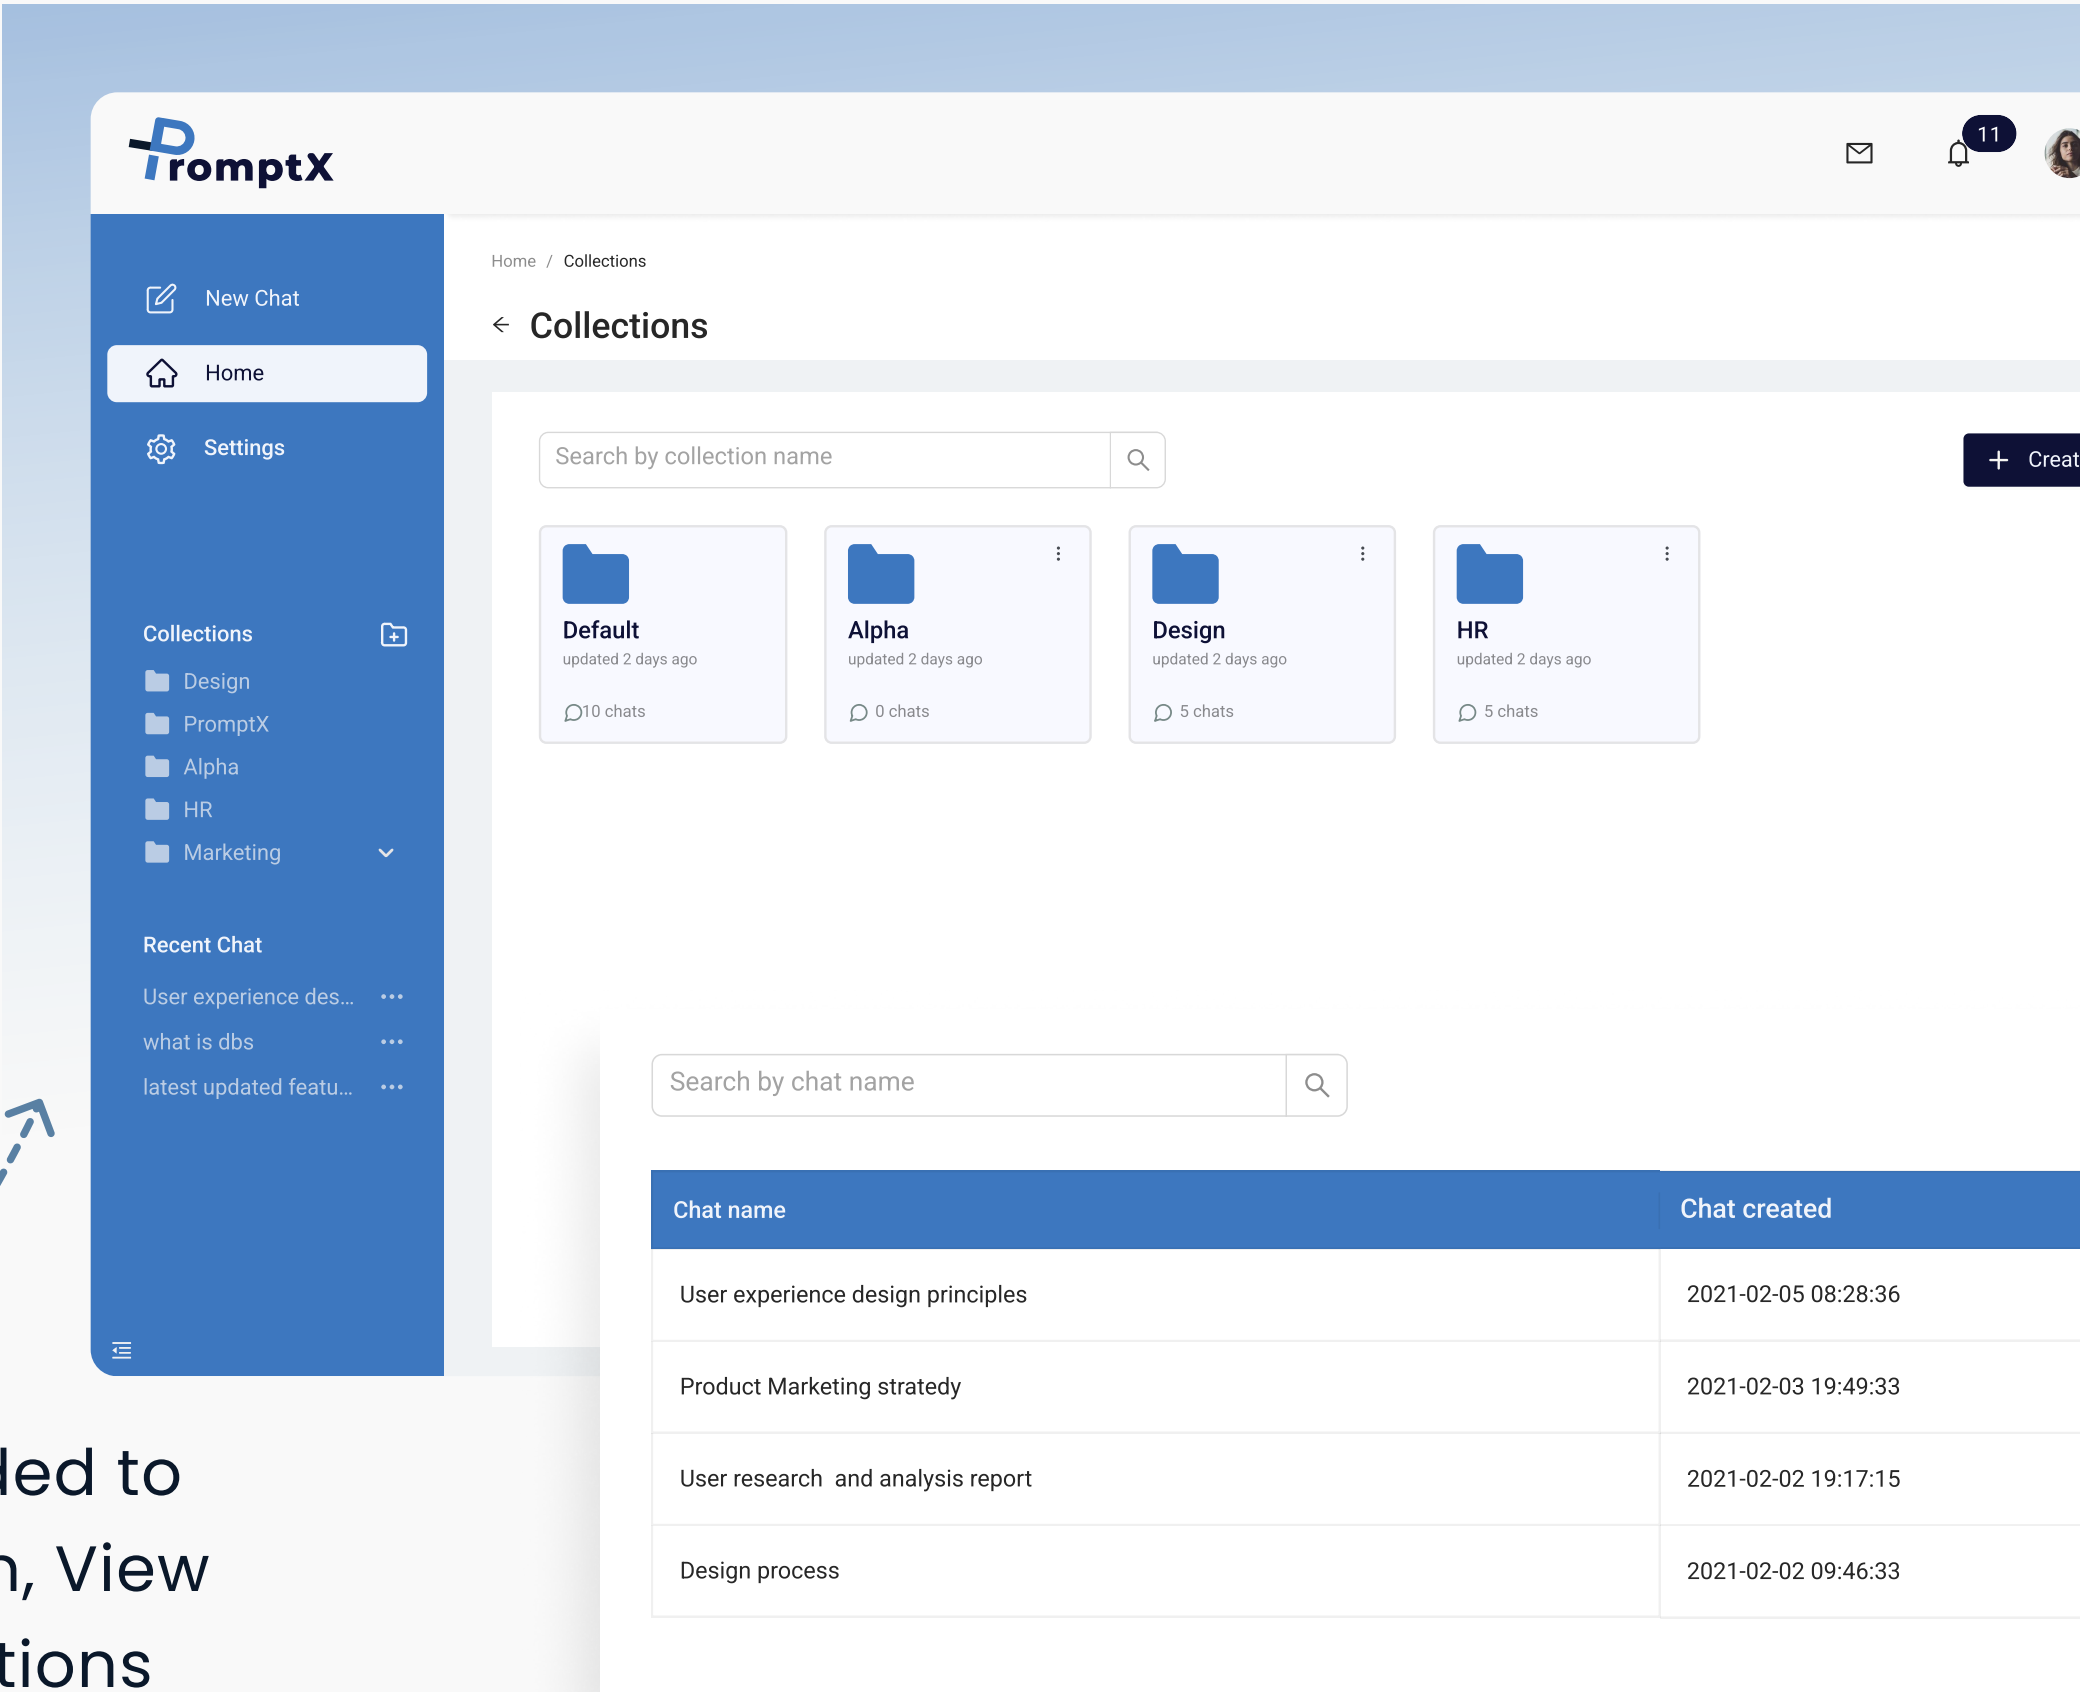

AI-powered insights extraction

With AI-Powered Insight Extraction, you don't just find information—you unlock knowledge.

A Guided User Journey To Demonstrate Value.

How PromptX Works

The PromptX Intelligence Stack

Customer Case Study

Energy Company Knowledge Fragmentation *bulb*

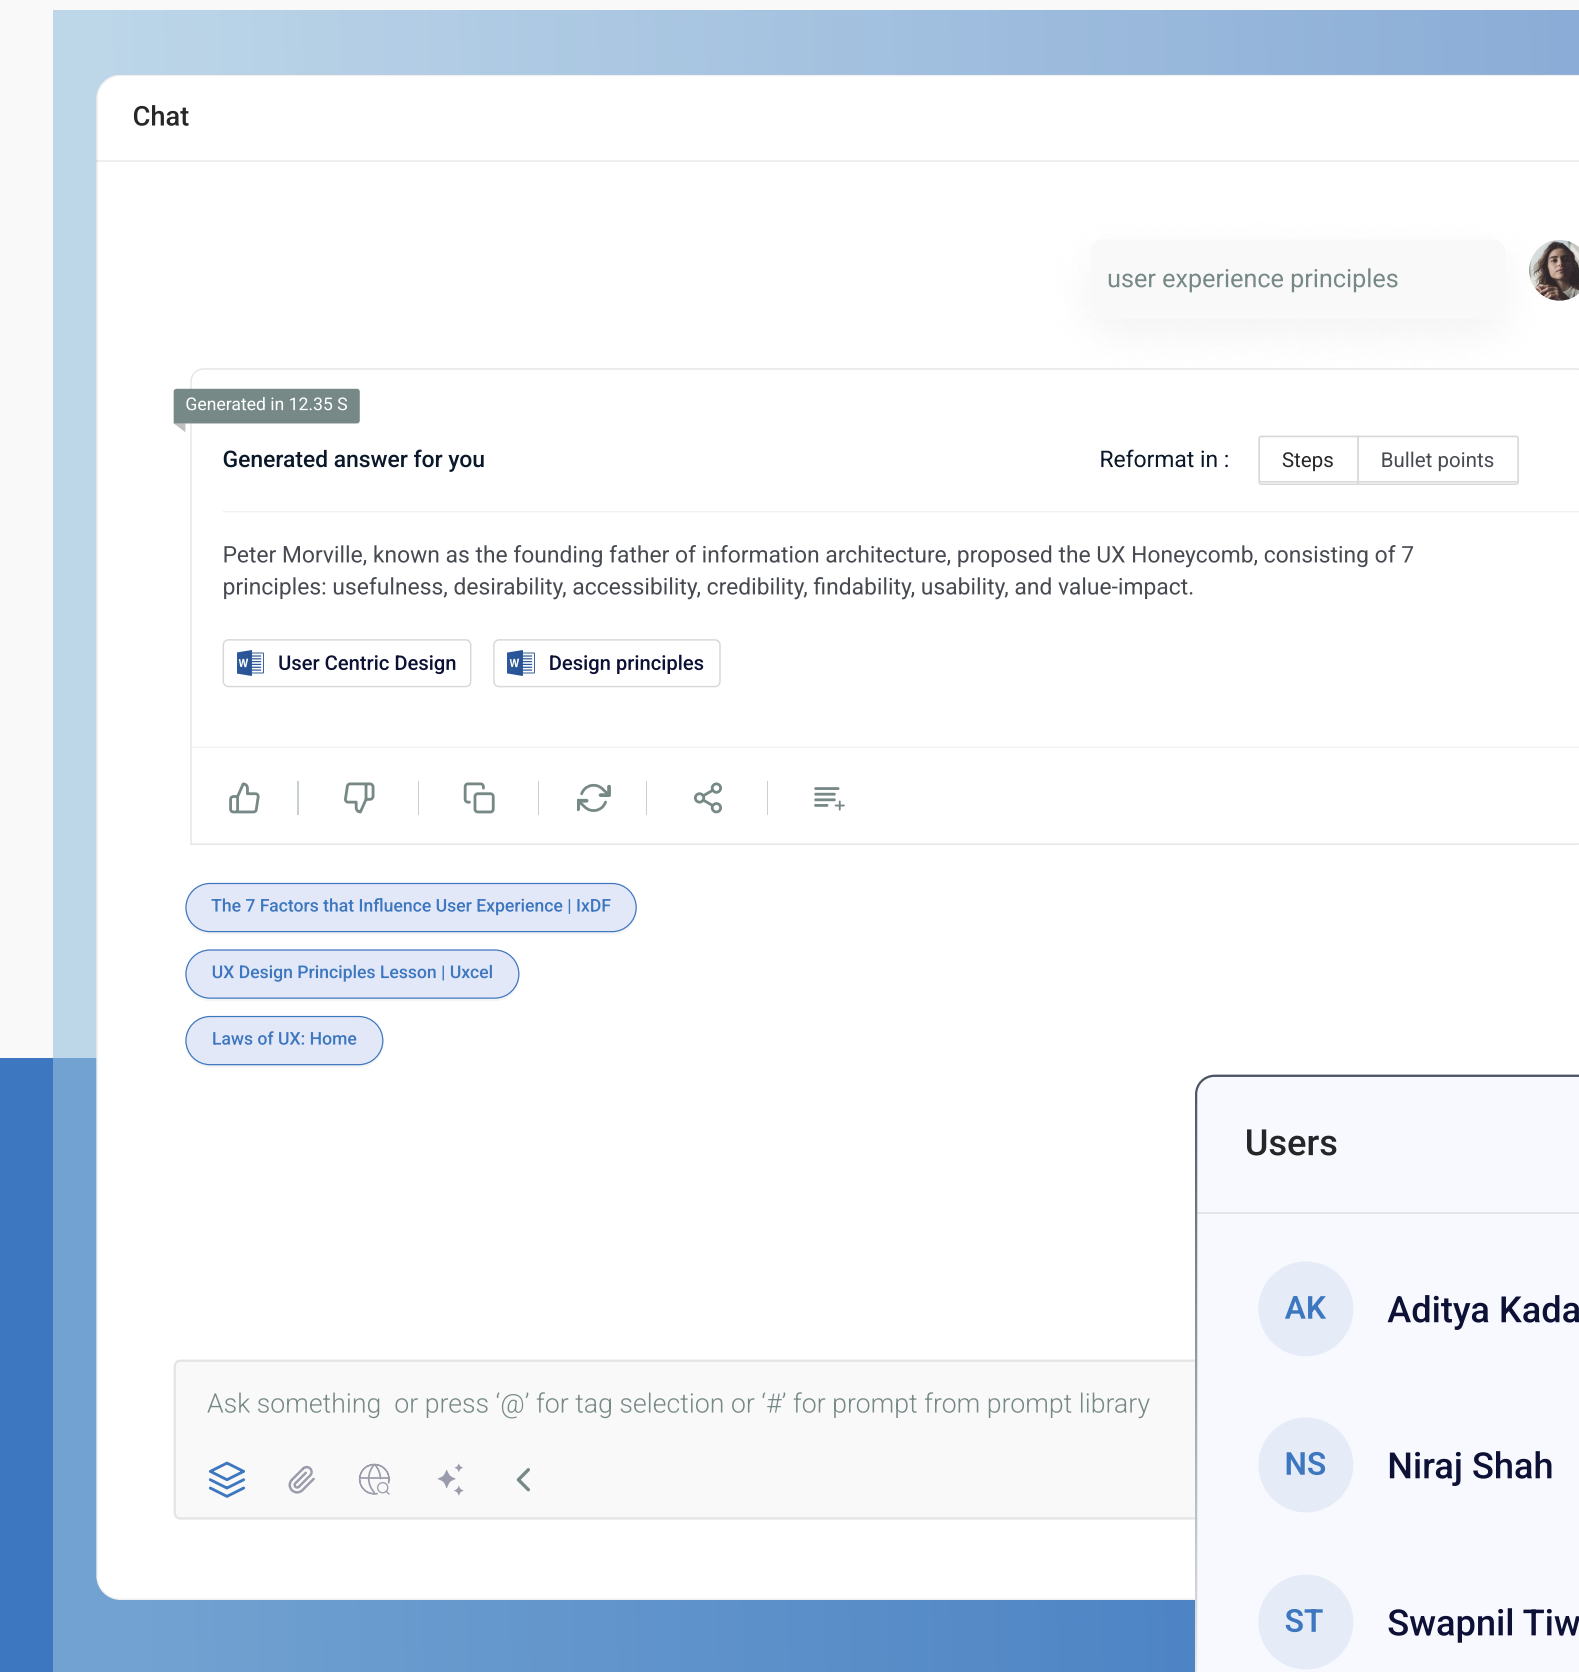

Challenges

- **Fragmented Knowledge Access**
Slow decision-making due to inconsistent access to relevant insights across teams.
- **Inefficient Research Process**
Time-consuming research leading to delays in providing data-driven recommendations to clients.

Solution

With PromptX's AI-powered search and contextual discovery, the consulting firm was able to seamlessly connect multiple data sources, enabling consultants to instantly access relevant insights tailored to their specific queries.

Outcome

- **Accelerated Research**

Research time was **reduced by 60%**, allowing teams to gather critical information more efficiently.

- **Faster Decision-Making**

Decision-making cycles were accelerated, enabling the firm to deliver faster, data-driven recommendations to clients.

Leading Financial Institution's Regulatory Document Retrieval

Challenges

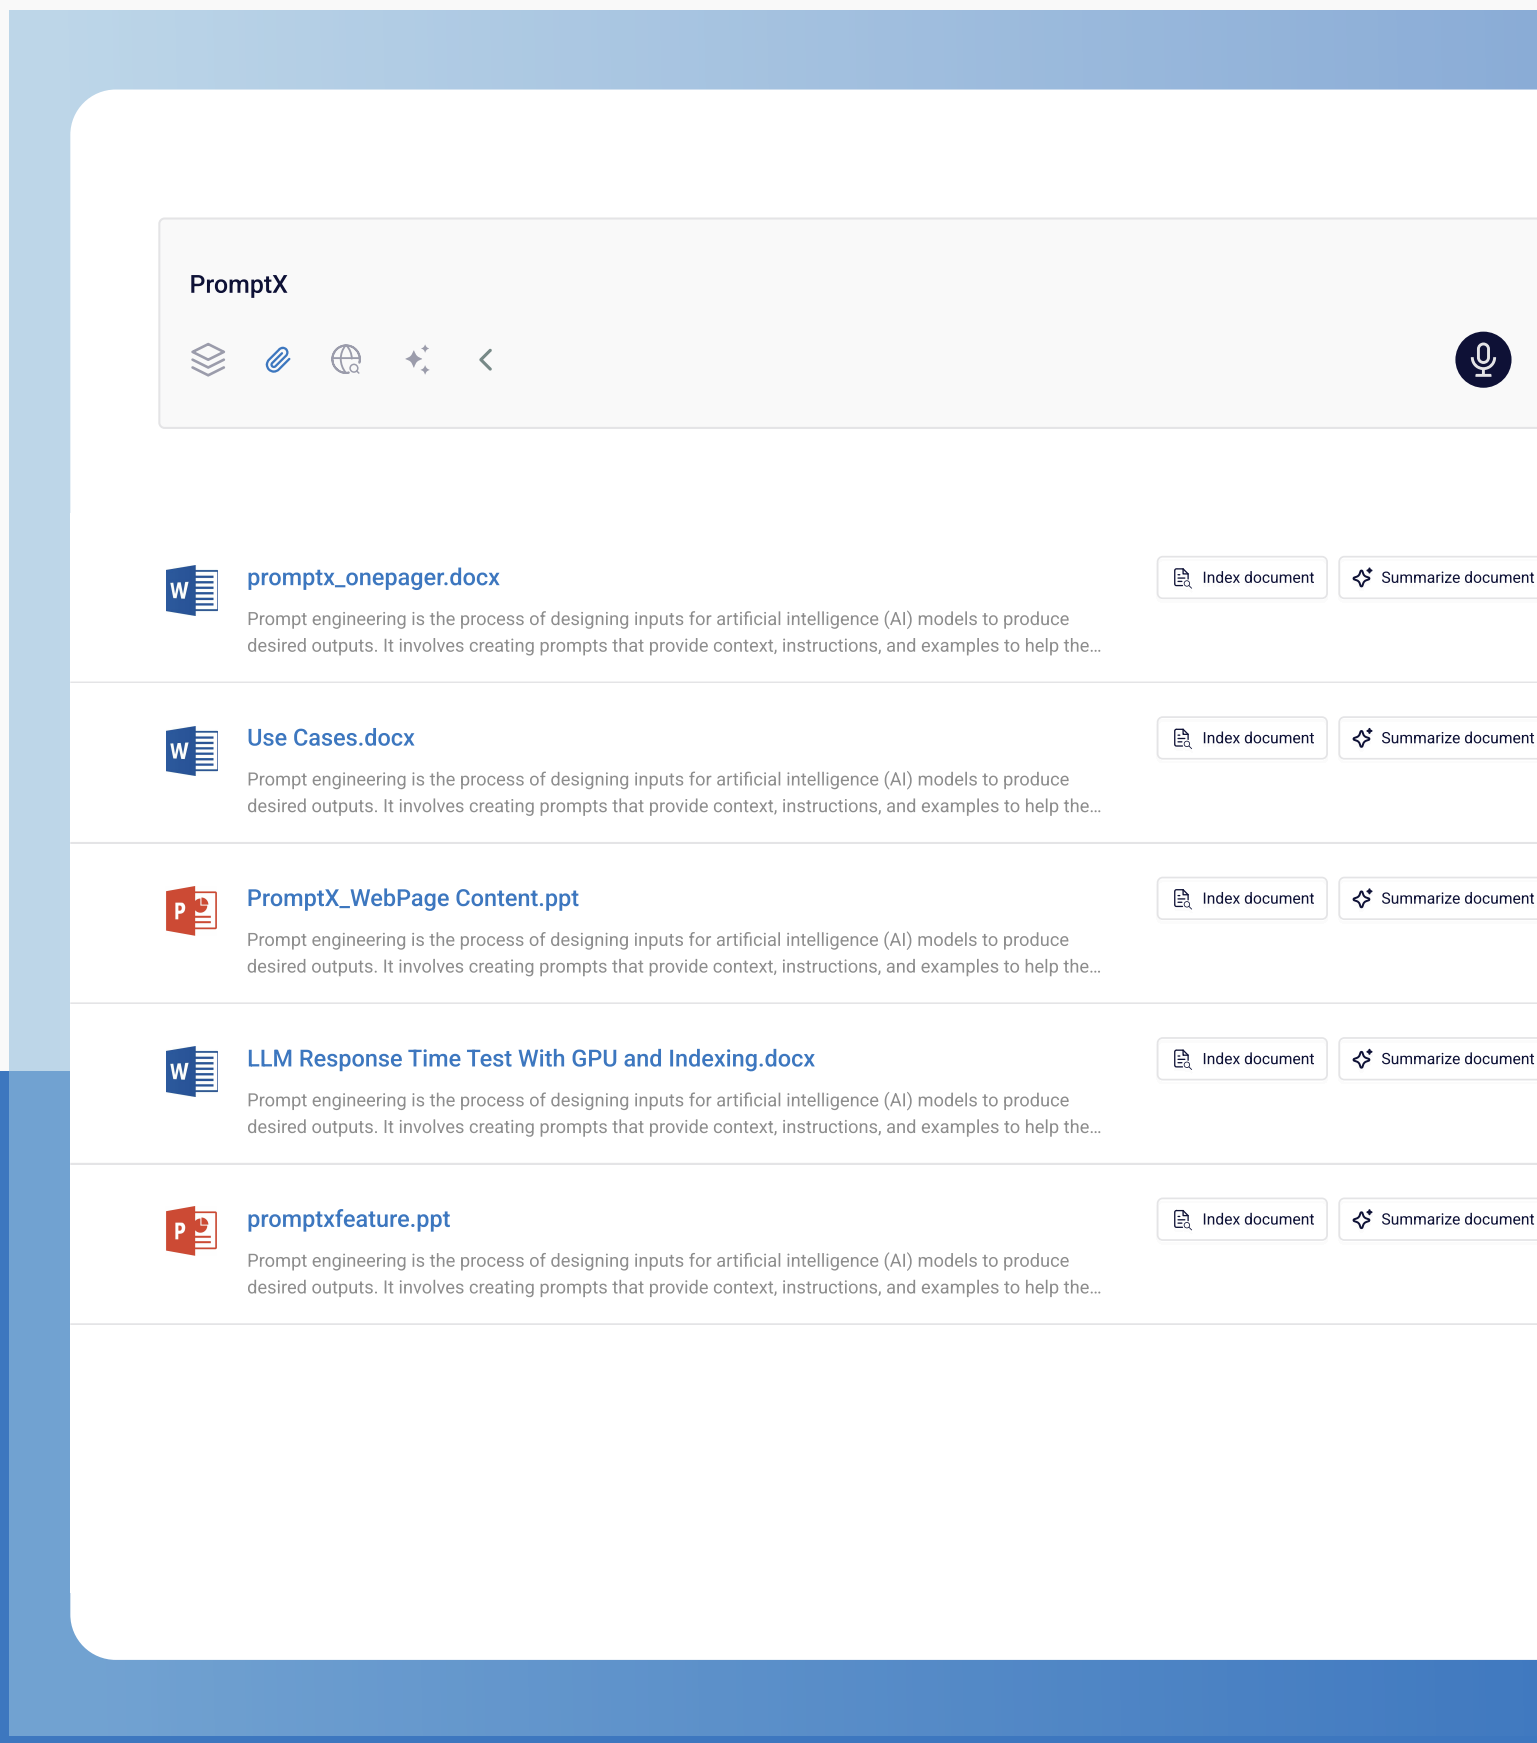

- Inefficient Document Retrieval**
Employees struggled with inefficiencies in retrieving critical regulatory documents, leading to delays.
- Compliance Risk**
Time spent searching for the right information increased the risk of missing important compliance deadlines.

Solution

By implementing PromptX's AI-powered natural language search, employees were able to quickly find relevant regulatory documents, reducing search time from hours to seconds.

Outcome

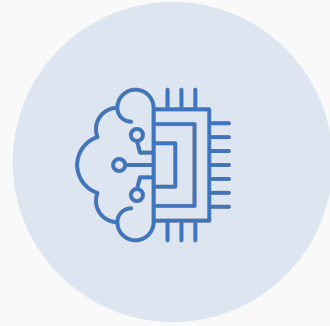

- Increased Efficiency**
Search time was **reduced by 70%**, significantly improving productivity.
- Faster Decision-Making**
The institution met compliance **deadlines effortlessly, reducing risks** associated with regulatory delays.

What makes it Different

The capabilities that turn information into enterprise intelligence

AI-Powered, Human-Like Search

Conversational, semantic search that understands user intent—not just keywords. Supports typo tolerance, synonym matching, and entity-aware results across structured and unstructured content.

Contextual Discovery with Verified Citations

Every response is grounded in source documents with inline citations, version metadata, and traceable logic—ideal for regulated industries or audit-ready operations.

Semantic Enrichment & Knowledge Structuring

Unstructured content is enriched through automatic entity recognition, semantic tagging and classification—converting documents, emails, URLs, and chats into knowledge objects.

Automated Summarisation & Smart Annotation

Long content is compressed into explainable summaries. Users can annotate, highlight, and add contextual notes that persist as searchable, shareable intelligence within knowledge stacks.

Multi-Modal Ingestion Engine

Ingests from diverse sources—PDFs, Office docs, websites, emails, chat logs—then applies consistent metadata, tagging, and object creation. Includes URL crawling and email-connected answer agents for live data acquisition.

Cross-Platform Knowledge Federation

Access and query knowledge across siloed systems—SharePoint, Google Drive, Slack, CRMs, file systems—without data duplication. PromptX acts as the intelligence layer above your ecosystem.

Agent Framework & Role-Based AI Assistants

Supports creation of scoped AI assistants (e.g. HRBot, ComplianceBot) tailored to departments, workflows, or roles. Each agent has memory boundaries, access controls, and escalation logic—turning PromptX into an intelligent workforce extension.

Adaptive Prompt Libraries & Domain Templates

Guided querying with function-specific prompts, sector-aligned vocabularies, and continuous learning from user interactions—helping users ask smarter questions and get better answers.

Workspace-Driven Collaboration & Curation

Team workspaces allow collective curation of knowledge—via saved chats, shared collections, role-based notes, and entity threads—enabling knowledge reuse and distributed enrichment.

Cloud-Agnostic, Model-Flexible Architecture

Deploy PromptX on AWS, Azure, GCP, hybrid, or on-prem. Integrate any LLM (e.g., ChatGPT, Claude, Gemini) and configure internet search fallbacks (Google, Bing, DuckDuckGo) for real-time insights.

Enterprise Security, Governance & Compliance

Fine-grained permissions, SSO/IdP integration, GDPR and ISO 27001 alignment, immutable audit trails, and scope-aware answer boundaries protect sensitive data and enforce compliance.

Self-Improving System with Observability

Learns from feedback, evolves with usage, and continuously optimizes enrichment, prompts, and responses. Dashboards track hallucination rates, entity coverage, and search effectiveness to drive system evolution.

Robert – Compliance Manager In Healthcare

Challenge

Robert, a compliance manager at a leading healthcare network, must review NHS clinical policies to ensure staff adherence to best practices. These policies are scattered across EHRs, PDFs, emails, and reports, making manual tracking time-consuming and error-prone.

Solution with PromptX

PromptX streamlines Robert's workflow by providing AI-powered search and contextual discovery. He can instantly access and extract relevant policies from both structured and unstructured data, ensuring accuracy and efficiency.

Business Impact

With PromptX, Robert reduces manual search time by 70%, enhances compliance oversight, and mitigates regulatory risks. Faster access to up-to-date policies improves efficiency, supports staff adherence to best practices, and ultimately enhances patient care while reducing legal risks.

Nirav – Corporate Legal Executive At A Top Bank

Challenge

Nirav manages thousands of contracts across multiple platforms—Google Drive, SharePoint, emails, and CRM records. Retrieving key clauses, tracking renewals, and ensuring compliance across jurisdictions is time-consuming and error-prone, increasing financial and legal risks.

Solution with PromptX

PromptX's AI-powered contract intelligence enables Nirav's team to:

- Extract key insights from PDFs, emails, and CRM records using natural language queries.
- Extract key insights from PDFs, emails, and CRM records.
- Generate AI-powered contract summaries, reducing manual review time.

Business Impact

By reducing contract search and review time by 70%, PromptX ensures timely renewals, minimizes legal risks, and enhances efficiency—helping the bank stay compliant while avoiding financial penalties.

Runa – Team Leader At A Manufacturing Company

Challenge

Runa struggles to streamline collaboration between design, production, research, and quality teams. With knowledge scattered across different platforms—CAD files, research papers, and production logs—teams work in silos, causing inefficiencies and delays.

Solution with PromptX

PromptX enables seamless teamwork by:

- Centralizing project data for easy access across teams.
- Using AI-powered search to retrieve relevant insights instantly.
- Facilitating real-time collaboration with context-aware AI prompts.
- Automating updates and notifications to ensure alignment.

Business Impact

With PromptX, time spent searching for documents dropped by 60%, improving collaboration, accelerating project timelines, and enhancing product quality—leading to faster time-to-market and greater operational efficiency.

Deployment & Integration

Your Stack. Your Models. Your Control.

Effortlessly integrate with enterprise systems and deploy in any environment, ensuring secure, scalable, and adaptable AI-driven workflows without disrupting existing infrastructure.

Key Features

- ✓ API-first architecture for easy integrations
- ✓ Compatibility with CRM, ERP, HRMS, and other enterprise systems
- ✓ Plug-and-play connectors for popular business applications
- ✓ Secure data exchange with minimal setup
- ✓ Deploy on AWS, Azure, GCP, on-prem, or hybrid environments
- ✓ Support for OpenAI, Mistral, Claude, or internal AI models
- ✓ Integration with existing identity providers (Google, Azure AD, Okta)
- ✓ No data migration required—PromptX works with your existing data

Compliance & Security

Built for Trust

Highlights

GDPR, ISO 27001, NHS DSPT

Zero-trust model readiness

Full audit trails

Role-based access at document level

Ready to Transform Your Enterprise Knowledge?

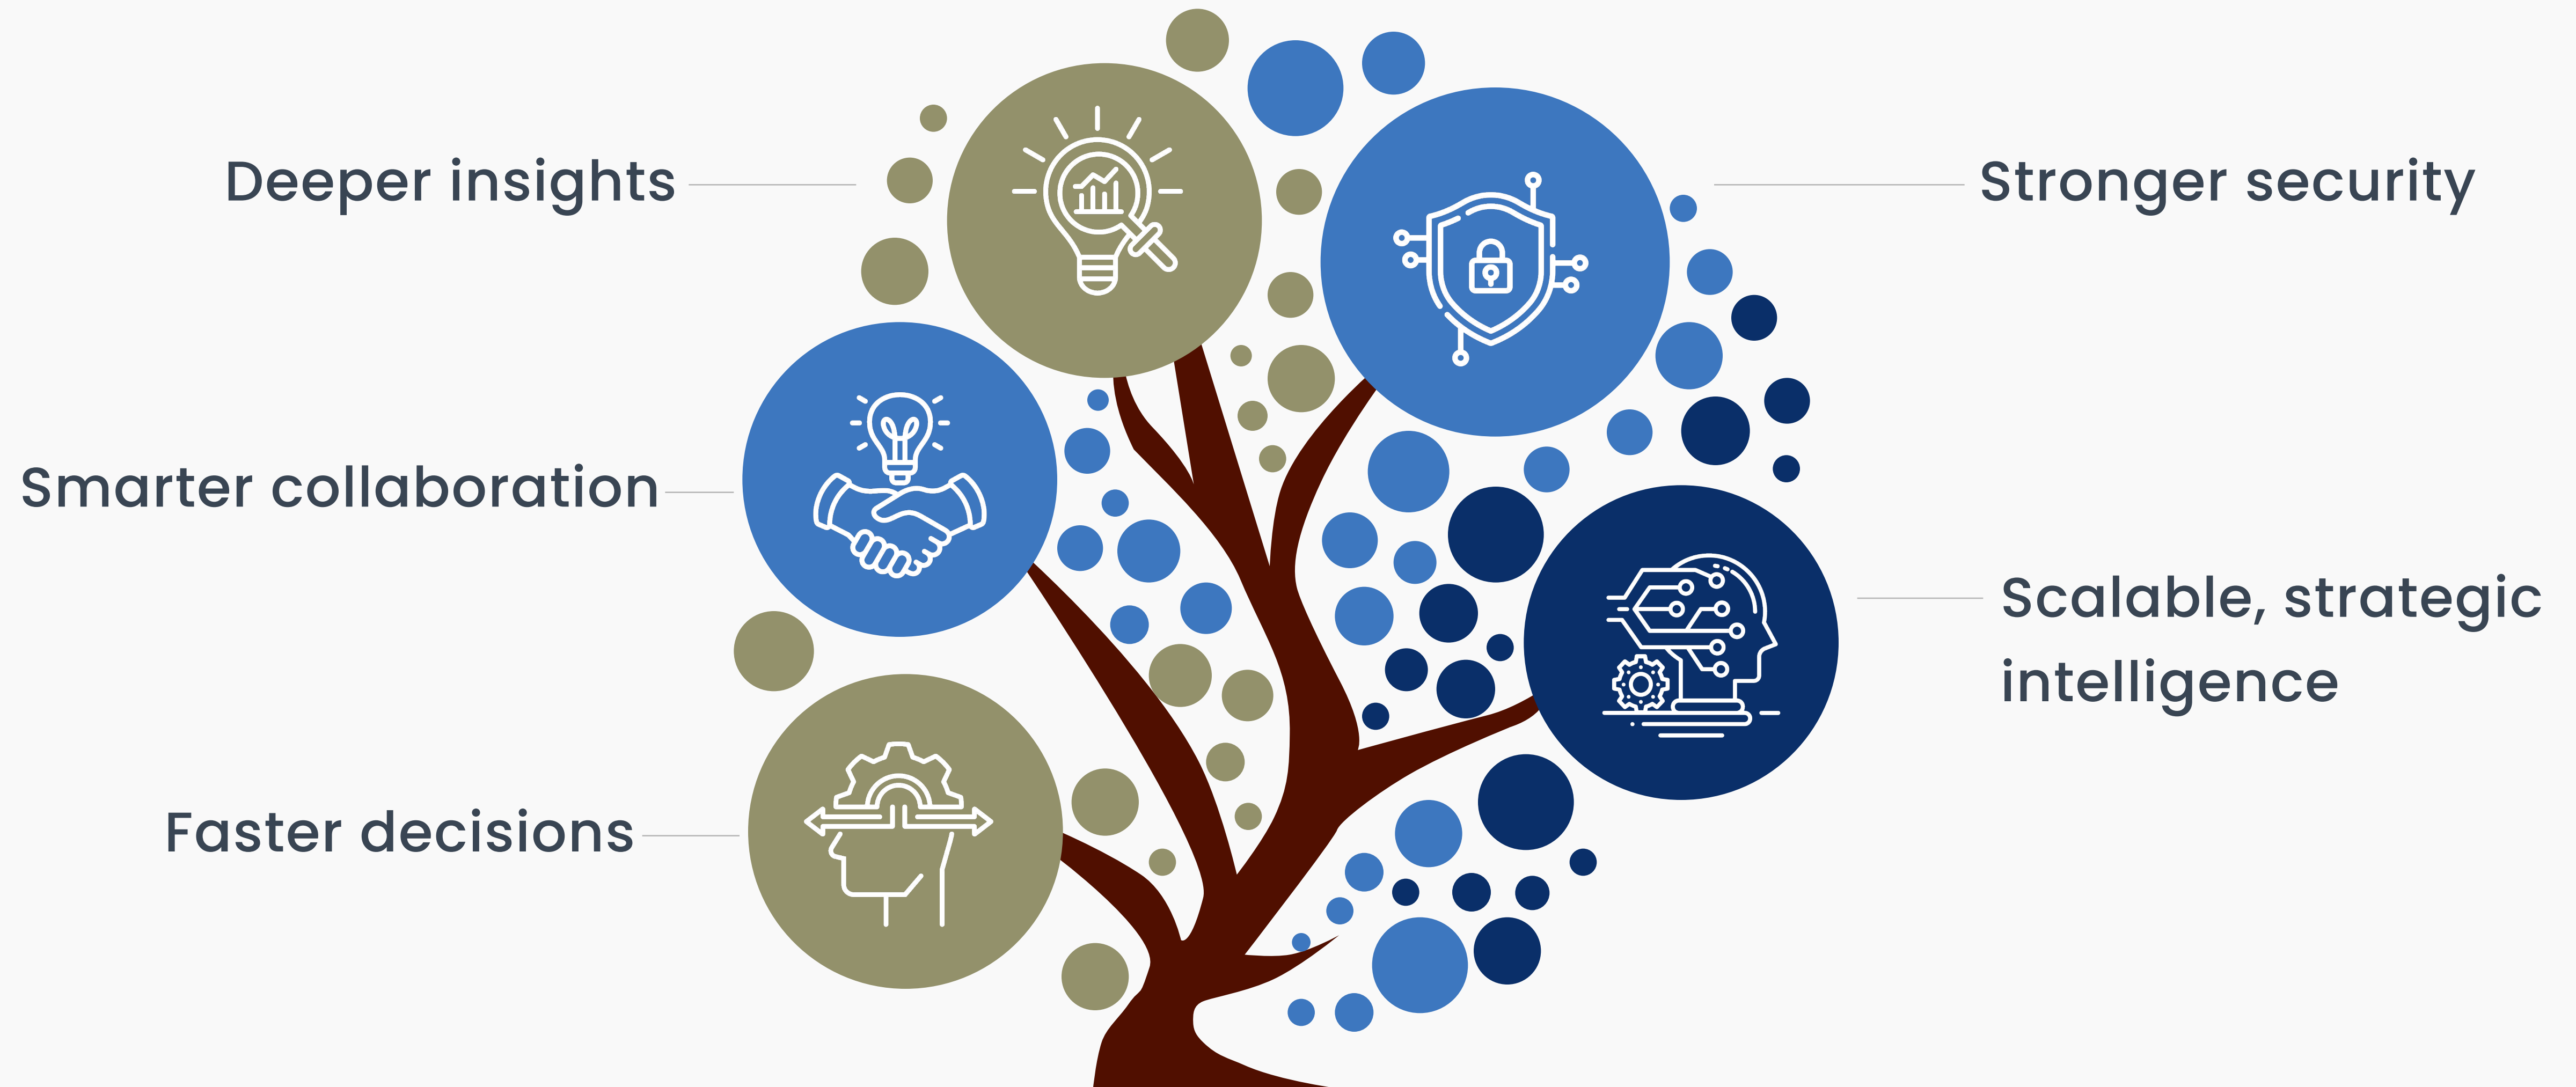

PromptX delivers measurable enterprise value through a structures implementation approach designed for rapid time-to-value.

Whether you are navigating thousands of contracts., enabling customer-facing or surfacing deep institutional knowledge, PromptX turns fragmented data intoenterprise intelligence. Deploy it anywhere . Customize it for anything. Trust it with everything.

Ready to deploy PromptX? Let's build your intelligent knowledge ecosystem- together

PromptX Delivers...
