

PowerRoster

Optimise Employee Scheduling

Making rostering easier by automating your workforce allocation

The image displays two views of the PowerRoster application. On the left is a mobile app interface for 'My Roster' for Sam Smith, showing a weekly schedule for June 28-4. On the right is a desktop interface for 'On Call Roster' for 'Refrigerant Mechanic' and 'Multi-skilled Technician' roles, showing a grid of employee assignments for Sam Smith (SS) and David Conti (DC) from June 28 to July 4.

Mobile App View: My Roster (Sam Smith)

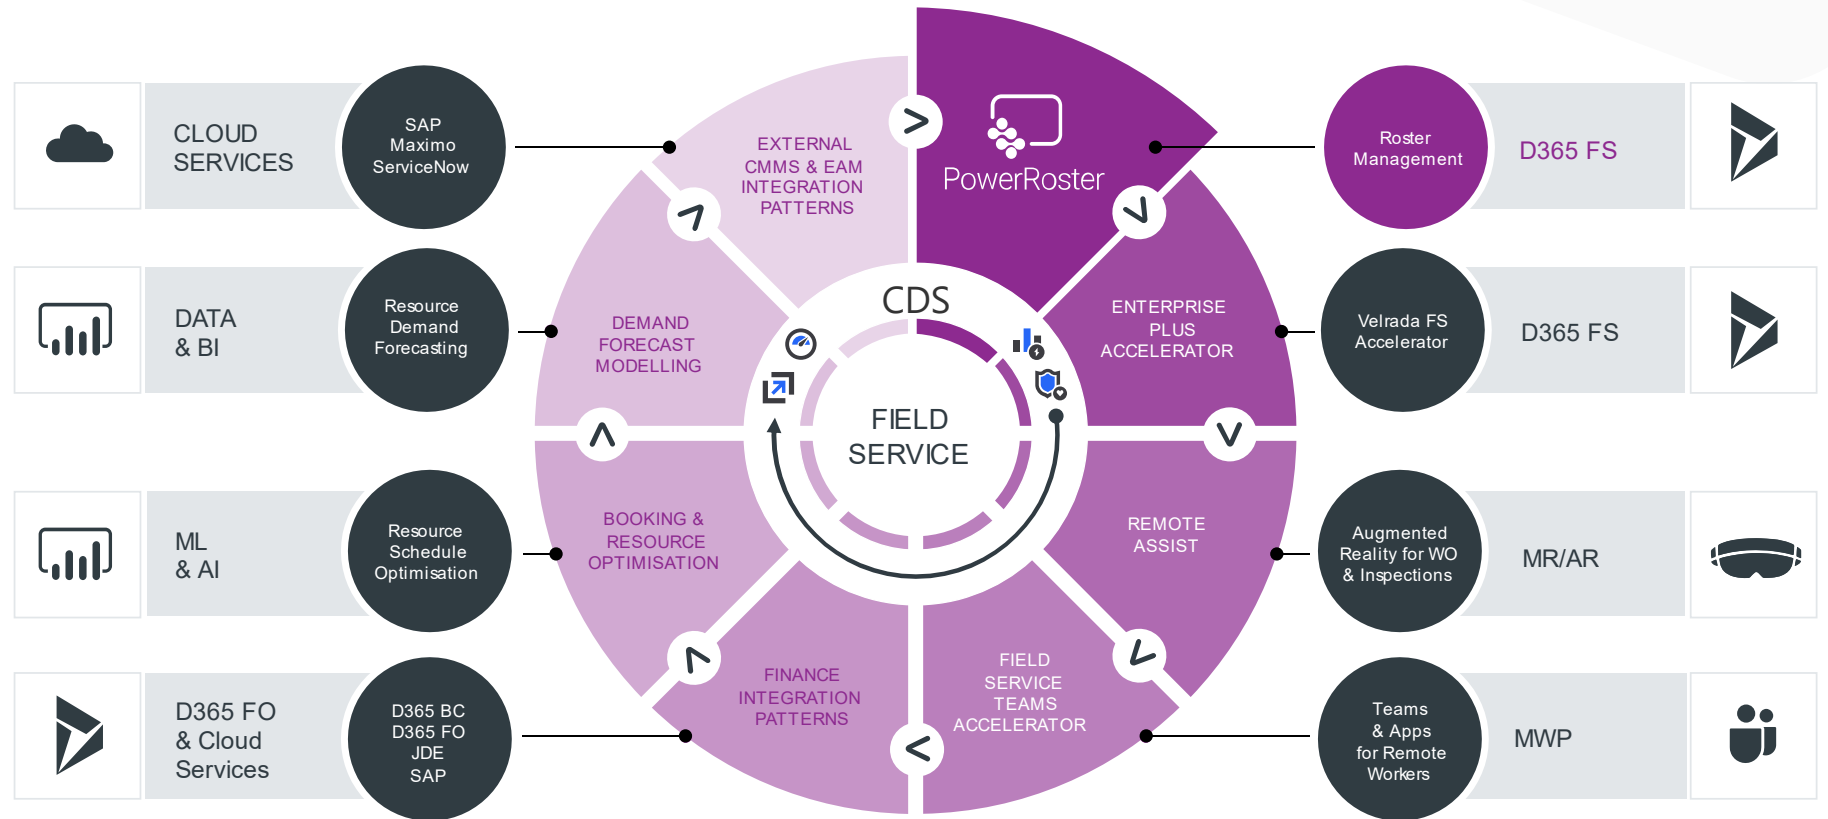

- Period: 28 June - 4 July
- Week view: 28 - 4 (June - July)
- Monday 29 June: 18:00 - 6:00 Night
- Tuesday 30 June: 18:00 - 6:00 Night

Desktop View: On Call Roster

Employee	Hours	28 Sun	29 Mon
Refrigerant Mechanic			
Sam Smith (SS)	84 hrs	18:00 - 6:00 Night	18:00 - 6:00 Night
David Conti (DC)	84 hrs	18:00 - 6:00 Night	18:00 - 6:00 Night
Multi-skilled Technician			

Velrada – Delivering Field Services to the Enterprise

Velrada are experts in delivering innovative mobility and service executions solutions to organisations with diverse and distributed Field Service teams. Whether the organization is large or small scale, Velrada have a depth of expertise and IP that allows clients optimize resource utilisation and improve service delivery. This Velrada IP extends the D365 Field Service capability while also seamlessly integrating with legacy architecture.

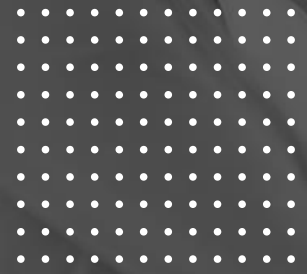

Simple, Efficient and Powerful

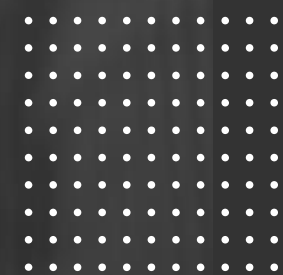

Microsoft Field Services customers possess the power to optimally dispatch the right resource at the right time to the right place. Their biggest challenge now is making sure they have the staff available to meet the demand of work that is then scheduled. This is where Power Roster comes in.

Power Roster extends the Universal Resource Scheduler in your D365 Field Services solution and through an intuitive User Interface, gives you full visibility into resources and staff availability to ensure you are never short staffed and that you have the right resources available at the right time in the right place.

Search resources...	8:00am	9:00am	10:00am
Jennifer Ng. 0:00 ⌚ 0% 	Work order - 00029 Duration: 7hrs 30mins		
Allison Dix. 0:00 ⌚ 0% 	Work order - 00026 Duration: 3hrs 30mins		
Abraham M. 0:00 ⌚ 0% 	Work order - 00026 Duration: 2hrs 30mins		

Benefits

Making Scheduling Easier

Build Rosters In Minutes

Schedule the right staff, at the right times, across different roles or locations. Easily fill shifts based on employee availability, training, and working patterns.

Never Be Short Staffed

If someone calls in sick, find a qualified replacement without a single phone call or text.

Data Driven, Optimised Rosters With A Single Click

Use data to create the optimal roster for your business and then let your scheduling experts adjust for the nuances of your business, getting to a great outcome faster and for a lower cost.

Improving The Experience For Staff

Share Rosters Instantly

Send rosters straight to your team via desktop or mobile.

Fill Empty Shifts Quickly

Share available shifts with your team. Allow staff to apply for the shift, then pick the most suitable person for the job. Or simply fill the shift on a first-come, first-served basis.

Meal And Rest Break Compliance Made Simple

Roster multiple breaks and break types in a single shift. Our scheduling app frees your business from the worries of break compliance and coverage.

How PowerRoster works with Field Services

You provide your demand forecast.

PowerRoster optimises your roster and identifies the teams.

Field Services constructs your work schedule with that team.

Case Study

Optimising staff availability and removing complexity with PowerRoster.

Background.

The Department of Agriculture, Water and the Environment carry out thousands of safety inspections per annum. Their teams of inspectors carry out assessments around the country and across very diverse fields that include Biosecurity checks on incoming freight, environmental impacts of building works, flora ecosystem impacts of new farming methods, water assessments when new facilities are added or dams are to be built and changes to national parks and heritage sites to ensure those stunning natural areas remain for years to come. The teams cover a geography that spreads from the Cocos-Keeling islands to Norfolk Island. Ensuring they have enough team members to address this challenging need is key to the Departments success.

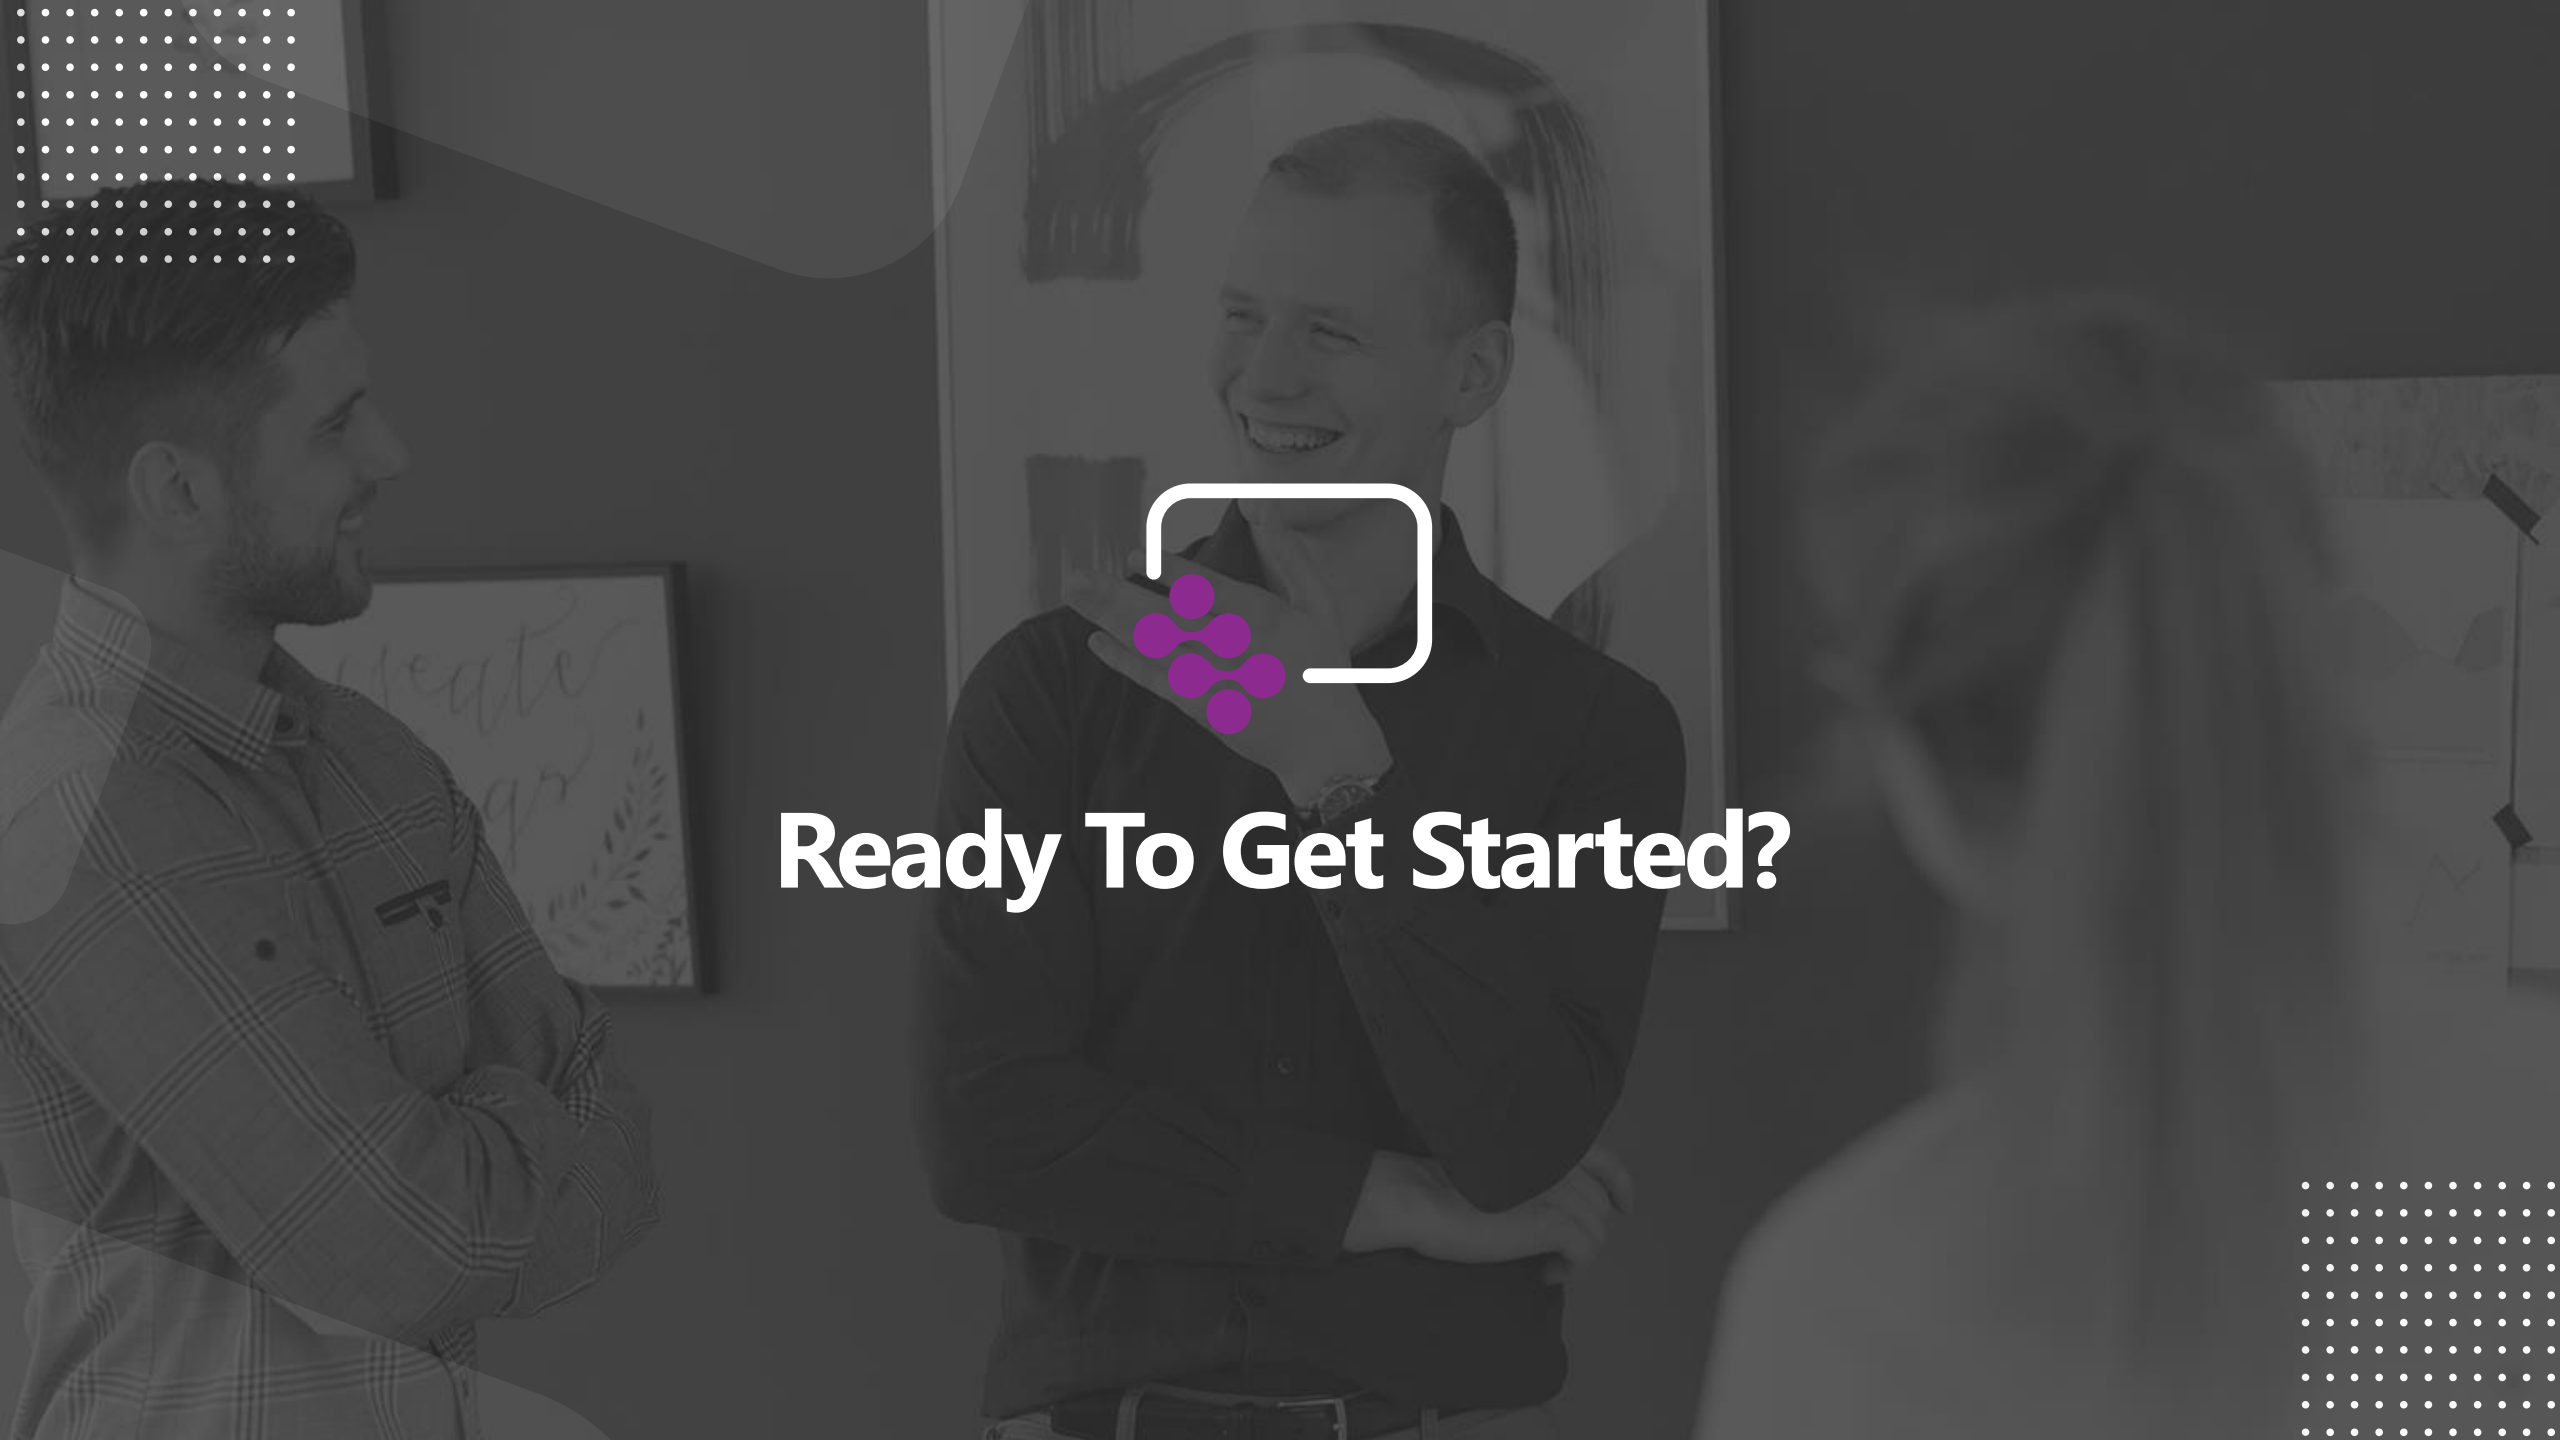

Solution.

Velrada were able to apply Power Roster to the solution to dynamically builds rosters for inspectors based upon their agreed working arrangements. Power Roster was simply overlaid on the Microsoft Field Services solution for the Department, allowing their scheduling teams to optimise staff shift allocation whilst meeting the ever increasing demand for inspections through the allocation of jobs within Field Services.

Technology.

Power Roster represented a great off-the-shelf solution for Department of Agriculture, Water and the Environment that was specifically built to address the Rostering gaps of Microsoft Field Services. The Department also gained a level of flexibility which they have since leveraged to customise the platform, tailoring it to their specific needs and gaining yet another leap of productivity.

Ready To Get Started?

Get started today

1

Download and run the solution as an add-on to D365.

2

Connect to your existing Field Services instance, to enhance the Universal Resources Scheduler

3

Access Power Roster through the D365 portal.

4

Add in all your different roster patterns and parameters that are important to you.

5

Let Power Roster design the optimal allocation based on the work demand pipeline.

6

Continuously improve accuracy and fit with PowerRosters BI tools and AI models.
