

PowerWorker
powered by **velrada**
AN NRI COMPANY

One Platform, Unlimited Possibilities

POWERWORKER BY VELRADA

Modules of PowerWorker™ for Assets

PowerWorker is designed with modular components that seamlessly integrate. Configure by mixing and matching to meet specific business needs or implement the full suite for comprehensive functionality.

WHY VELRADA?

Velrada is a multi-award-winning, globally recognised Microsoft partner. They are a Microsoft cross-platform organisation, working with Power Platform, Dynamics 365, Azure, Modern Workplace, Fabric, Copilot, and their own IP to deliver outcomes to their customers. Presence, operations & active engagements across Australia, Europe and North America with support from over 275 experienced staff. Their fast growing AI practice focuses on delivering Microsoft Copilot solutions. Velrada are renowned for their innovative solutions, including the development of PowerRoster™, their own workforce management solution, built on Microsoft Power Platform, extending Dynamics 365 Field Service and Teams.

PowerWorker™
for Assets

Accelerate your Integration Journey

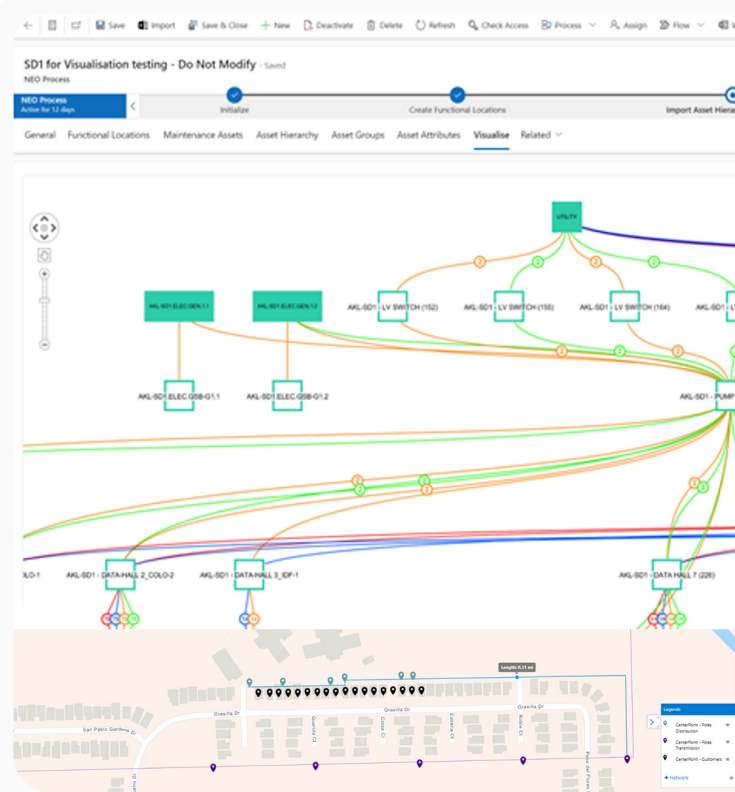

Connect your Enterprise Asset Management Systems to Your Field

PowerWorker™ for Assets solves everyday challenges with:

- ✓ **Pre-Configured Efficiency:** Avoid over-configuration with a solution that's pre-configured, compressing delivery time
- ✓ **Ready to Deploy:** All the groundwork is done, saving you time and ensuring a smoother integration.
- ✓ **Industry-Standard Approach:** Implemented using endorsed mechanisms, best practices, and industry-standard integrations.

Getting the best experience from Microsoft Dynamics 365

Accelerate your integration journey. Avoid over-configuration and over-customisation and gain the most value of Microsoft's out of the box capabilities

- Asset & Resource Management
- Contracts
- Maintenance Planning
- Reactive Maintenance
- Work Scheduling
- Field Mobility
- Procurement & Inventory
- Minor & Major Works
- Cost Capture
- Billing

Quicker time to value

- ✓ Enable teams to realise value from the platform in a shorter timeframe

Extending the Microsoft Platform

- ✓ Get the most out of connecting Microsoft Dynamics 365 Finance, Supply Chain, and Field Service together. Then utilise the advanced reporting capability to provide dynamic reporting dashboards.

Configuration over Customisation

- ✓ Overcome time, skill, and budget constraints with a pre-configured solution ready to go.

PowerWorker™ for Assets is an advanced accelerator designed to enhance customer value, expedite delivery, and optimise the integration of their workforce with business systems.

Maximise value for money by leveraging the unique strengths of each application and unifying them into a cohesive process. Effortlessly integrate Microsoft CoPilot for enhanced functionality.

Achieve faster results with a readily deployable solution, allowing teams to concentrate on critical priorities.

Adopt an industry-standard approach that follows best practices, adheres to industry standards, and is endorsed by Microsoft.
