

# Cloud Migration Implementation by VENZO

Let us facilitate a smooth and successful migration

# Benefits of Moving onto the Cloud

# 02

# Are you ready to take advantage of the cloud?

## Prepare for the Future

Our cloud migration assessment and implementation services help your company prepare for the scope and scale of the future by bringing server infrastructure to the cloud. We help you to take advantage of all the benefits and opportunities related to migrating workloads to the cloud.

## Our Approach

We analyze your environment, evaluate your readiness, recommend a targeted strategy and migrate in phases to ensure minimal disruption and reduce risks.

# The benefits of moving to the cloud that our customers see.

- **Save money:** Many customers experience savings on hardware purchases and maintenance when they move from on-premises data centers.
- **Pay-as-you-go model:** With Microsoft's flexible pay-as-you-go model, you only pay for the cloud capacity used in Azure.
- **High protection and accessibility of workloads:** Whether working remotely or at the office, your workloads are accessible and protected.
- **Energy efficiency:** Moving to Microsoft's sustainable data centers not only helps you to save money, it's also more energy efficient and sustainable in the long term.
- **On demand:** Migrating to the cloud also enables you to respond to changes in needs and wants based on scale applications and workloads on-demand solutions.

# A trusted partner for Microsoft Cloud Technologies

We can help you achieve better scalability, security, and versatility with a cost-effective and more sustainable solution in Microsoft's cloud service.

- VENZO's Azure certified architects provide the data, insights, and recommendations your organization need to make informed migration decisions.
- Our approach to cloud migration is designed to help your organization take full advantage of all the benefits and possibilities of the cloud.
- VENZO is a trusted partner for all Microsoft cloud technologies and can assist all stages of your journey from plotting the right strategy, to designing, planning and operationalizing your new environment.

# Microsoft Azure by VENZO

## One Pager

# 01

# Effectively transition your workloads to Azure.

We can advise on a full or partial transition project, cost optimization, and governance. Together we can plan, design, configure, and automate the best future-proof solution for your organization.

# Our Approach.

Whether your organization seeks a full or partial cloud transition VENZO always tailors the implementation specifically to your needs.

## Assessment of Current IT Infrastructure and Future Needs

To identify and collaboratively decide what it takes to move to the cloud and hence identify the specific workloads for cloud migration, we assess your current infrastructure to discover its quality, investigate the design of the technical environment and usage of applications.

## Advisory of Azure Migration

We make a migration plan that includes workload specific transformation and migration strategies. This we do by planning the project roll-out, by creating a road-map, conducting training workshops, and system design. We also configure the technical foundation with other systems or solutions.

## Establishing a Landing Zone

Depending on the assessment, your needs, organizational goals, and Microsoft best-practice approaches, the technical implementation will result in either building a new landing zone for migrating everything or modifying your existing environment.

## Performing a Phased Migration

We perform the migration in phases designed to your specific infrastructure to reduce risks and secure business continuity in the process. Afterwards, we help you get most out of the many new opportunities that are enabled by your new, cloud-based infrastructure.

**Case example**

**03**

# Complete reconstruction of a secure and modern IT-architecture after extensive hacker attack.

## The Challenge

### Breakdown of IT-infrastructure

In 2020, ISS was hit by a severe hacker attack that resulted in loss of control of large parts of the IT-infrastructure. The daily operations of the business were greatly affected.

An incident of such comprehensive and business critical nature pushed the agenda on IT-security and the digital strategy in the company.

## Our Solution

### VENZO contributed on the entire journey

When the incident took place, VENZO took responsible of rebuilding the IT-architecture from the scratch with a great focus on security. As part of the process, in depth analyzes of the business requirements for digital use were performed. The requirements were linked to best practices for secure IT, and 10 tracks were created to start the reconstruction of a secure and modern IT-infrastructure.

## The Result

### Now, ISS is at the forefront of IT

During the journey towards a modern IT-infrastructure, VENZO has helped ISS link their digital business requirements with a secure IT-infrastructure.

Given the critical nature of this project, ISS has in short time matured their digital business, and will in the future have the possibility to utilize their digital maturity to develop their business on a global.

**Thank you.**  
**We look forward to our next  
touch point.**
