## Information Protection & Compliance by VENZO

# 7-week discovery assignment: Information Protection & Compliance

VENZO's 7-week assessment offers your organization an overview of your unstructured data (both cloud and on-premises) to map your data maturity level and identify next steps in your data protection journey. The final extent and duration of the assessment depends on your organization's starting point, scope as well as size of data cluster.

# 7-week discovery assignment

## Information Protection & Compliance

### The procedure

VENZO offers tailored solutions for your entire journey towards compliance, whether you are at the beginning or already have made progress towards a sustainable compliance.

Our assessment follows these steps:

- Kick off workshops
- Confirmation of defined pre-requisites
- Setting up online and on-premises scanning, and completing scan
- Assessment of gathered results and report writing
- Cooldown workshop and further planning

### Prerequisites

People and processes:

- Project Owner, DPO involvement, CISO involvement as well as System Owner.

Rights and accesses:

- O365 scanning: Security Administrator & Compliance Administrator (both Azure AD roles)
- On-premises file scanning: Azure Information Protection unified labeling scanner prerequisites ([visit here](#))

Licenses:

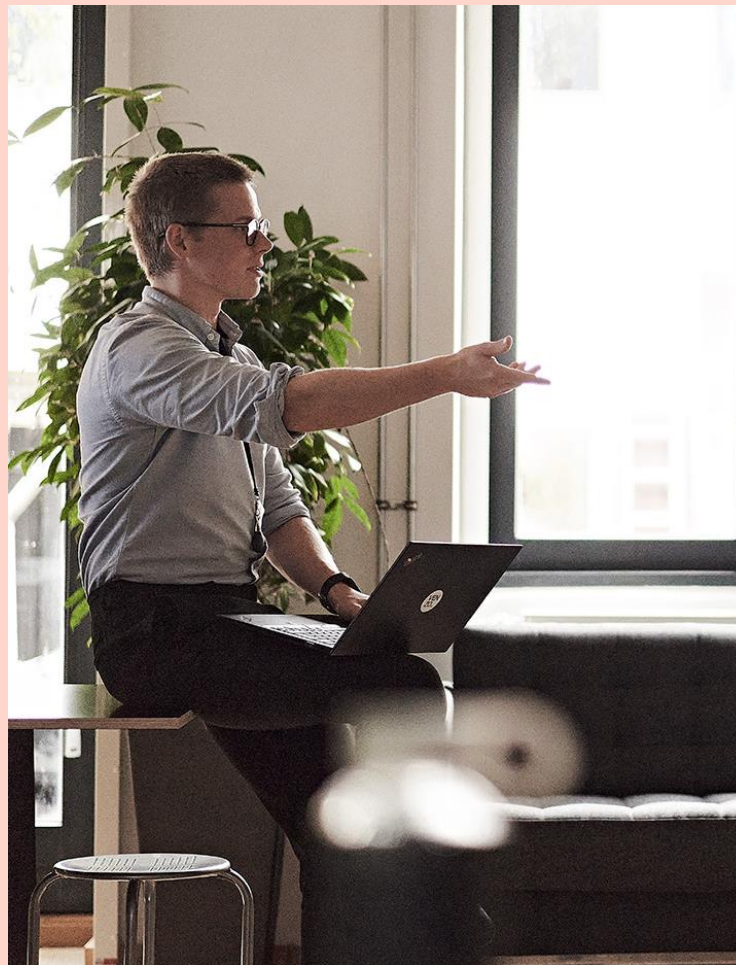

- E5 Enterprise mobility and security + E5 Compliance

### Expected outcome

- Initial overview of your organization's sensitive data landscape
- A findings report highlighting the data situation in relation to types, locations, contained sensitivity and sharing.
- Recommendations for immediate actions due to threats.
- Recommendations for further steps and projects to start building preventive measures, ensuring control and creating the foundation for secure use of data in a modern technology context.

# 02

## Presentation

# Are you equipped to protect and govern your unstructured data to be compliant?

Compliance and Information Protection by VENZO

# Compliance and Information Protection

In today's digital society, it is essential that organizations know their data, protect it, prevent data loss and govern their data. VENZO's end-to-end services help you accomplish and anchor these practices in your organization, no matter where you are in your compliance journey.

# Compliance and Information Protection.

## Overcome your struggles

- Compliance and Information Protection is increasingly becoming part of the global agenda for organizations. However, it has not always been a priority for many. Therefore, organizations struggle with deciding the starting point and operationalizing compliance policies.
- Most organizations produce and compile vast amounts of data daily and will therefore expose themselves to fatal risks if no efficient compliance strategy is in place.

## Avoid being exposed to fatal risks

- The risks faced by organizations who fail to prioritize compliance and having an effective compliance strategy can result in multiple consequences including:
- Fines and bad publicity caused by GDPR breach
- Lack of compliance evidence for internal and external regulators
- Loss of trade secrets and customer/sales data to competitors
- The consequences of these risks can have immense impact on organizations.

## Let VENZO support you. End to end.

- At VENZO we offer tailored solutions created for your entire journey towards compliance. This approach allows us to act as end-to-end partner for your organization.
- We can assist your organization whether it is at the start of the journey, or already has made progress towards a sustainable compliance. In this way VENZO can always stay relevant for your organization as a compliance partner, and help you achieve your compliance goals.

# Our approach

We offer tailored end-to-end solutions created for your entire journey towards compliance. We can assist your organization whether it is at the start of the journey, or already has made progress towards a sustainable compliance. In that way, we remain relevant for your organization as a compliance partner, and help you achieve your compliance goals.

## Assessment

- Through a discovery workshop and data scanning, we outline where your data is located, who that has access to it, and how it is protected.
- We provide you with an overview of your organization's unstructured data, whether it is in the cloud or on-premises.
- In that way, we highlight immediate dangers and recommend actions needed to safeguard your data.

## Empowerment

- Being compliant does not necessarily mean that you are secure. We ensure that you get the full value of becoming compliant – and not
- just on paper.  
We empower you to live after the processes and security, and not simply enforce your employees to follow a checklist that does not fit their daily workflow.
- We educate your organization's employees, so they feel safe working from everywhere and certain that they protect your data secrets.

## Advisory & Implementation

- Drawing on the insights from the assessment, we advise you on relevant tool or feature implementations to accommodate for discoveries and risks.
- We help you meet your needs and goals, whether they are regulatory specific, protecting business secrets or creating overview and control of data streams.
- We provide you with an operational way of identifying the type of data, its location and its accessibility utilizing cutting edge technology

## Compliance Control

- We ensure that the implemented technologies remain to meet your shifting requirements, workflows and regulatory changes.
- We help you keep an eye on your data streams both internally and externally to gain an overview and control the information produced and shared.
- We continue to highlight immediate dangers such as greater unmanaged occurrences of sensitive information, in order to sustain the mitigation.

# Why choose VENZO?

## Microsoft Gold Partner

We are among the best in class when it comes to Microsoft security as we:

- Are acknowledged by Microsoft as a Gold Security Partner.
- VENZO is the Microsoft Denmark Partner of the Year 2021 and 2022 within Security. As such, we are best in class partners.

## Security Specialists

- VENZO have profound experience in assessing and implementing security and compliance solutions for some of the largest organizations. Therefore,
- We have the ability to understand and consider all perspective within the data protection world.
- VENZO is a unique information protection and compliance partner.

## Organizational Insights

- At VENZO we value impact, and we know the importance of communication when it comes to ensuring successful threat protection. Therefore,
- We speak the language of c-level leaders, system administrations, data protection officers, and CISOs to make all levels play together in an effective data protection strategy.
