Why is a governance strategy important?

How does a Governance Strategy create value in your organization?

Does your organization experience a growing number of business applications being developed on the Power Platform? Then you should consider some important decisions in order to support your digital transformation.

The power of governance

The point of governance is to streamline and structure how your organization makes decisions, without resolving to frequent, chaotic, and ad-hoc escalations to senior leadership. An effective Power Platform governance allows your business groups to solve problems efficiently while complying with IT and business compliance standards.

What is our approach in VENZO?

At VENZO we believe in co-creation. We know that every organization is different: therefore, we work closely with our clients to explore their specific needs and ensure that VENZO's governance strategy is **customized** to your organization.

At VENZO we follow an agile approach based on workshops and sprint sessions to quickly and effectively gain an insight into the needs of your organization as a basis for creating and implementing a Foundation and Governance Strategy tailored specifically to your organization.

Reap the value of a well-structured Power Platform governance strategy

Drive your transformation vision

Effective decision-making allows for high-value projects to be prioritized by aligning the organization's Power Platform strategy and investment decisions with the organization's broader goals.

Deliver value faster

A governance strategy will help your organization get work done faster by providing clear direction and a structural process for teams that implement or want to implement projects on the Power Platform.

Minimize technical and business risk

Governance is key in defining and applying technical best practices to minimize risks and maximize the platform's potential.

Our approach

Phase 1: Workshop

➤ Conceptualization of governance.

➤ Identifying the most essential topics for governing the Power Platform.

➤ Defining the architectural, technical, and data principles.

Phase 2: Sprints with client

Creation of user stories and understanding of client needs for;

➤ Creating a 'Documentation Wiki' covering the governance setup, and the process for creating projects on the Power Platform.

➤ Possibility of implementing a Power BI Dashboard to create insights for the client into the adoption of the platform related to governing, securing, and identifying usage patterns on the platform.

Phase 3: Delivery and implementation

✓ Presentation of the Power Platform Foundation and Governance Strategy,

✓ Documentation 'Wiki'

✓ Power BI Dashboard

We tailor our approach to match the needs of your organization.

A Tailored Solution

✓ One size doesn't fit all, and VENZO always tailors the solution and our approach to your organization's specific situation.

✓ Our IT consultants are equipped and prepared to help you scope your goals and needs.

A Managed Service

✓ We will always challenge you if we discover something that can be improved, and our various teams are ready to also support you in e.g., automation of processes, data-driven insights and organizational change management.

Case example

We use our best-practice experience and expertise to create value with your organization.

Ascendis Pharma
Ensure efficient organizational governance structure for the Power Platform

Do as the Danish pharmaceutical company Ascendis Pharma: Equip yourself to make the right decisions on the Power Platform and accelerate the understanding of your organizational challenges by investing in governance.

Challenge

Ascendis Pharma experienced an increasing demand on the Power Platform due to an increasing number of citizen developers and hence also applications and business flows being developed on Ascendis Pharma's Power Platform.

This called for a review of the governance structure.

What we did

To embrace and accommodate the positive development, VENZO assisted Ascendis Pharma by developing a strong, compliant and secure Governance Structure Strategy for Ascendis Pharma.

The Process

VENZO facilitated a three-day workshop covering essential topics for governing the Power Platform - establishing specific boards on the platform and defining architectural, technical, and data principles.

Then, two sprint sessions was conducted to create user stories and to ensure addressing the specific needs of Ascendis Pharma, its stakeholders and tenants.

Value provided

Governance Strategy for the Power Platform.
Documentation Wiki - covering the governance setup, and the process for creating projects on the Power Platform.
Power BI Dashboard — that provided an insight into Ascendis Pharma's adoption of the platform to help them govern, secure, and identify patterns on the platform.

Thank you.

We look forward to our next touch point!
