Cloud-based virtualization

Windows Virtual Desktop (WVD) is a desktop and app virtualization service based on Microsoft Azure. The service provides a fully managed desktop virtualization solution in the cloud, designed to offer a more secure and efficient way of performing desktop virtualization. The service can function with all apps and devices, and supports access from Windows, Mac OS, iOS, as well as Android.

With WVD you can...

- Complete initial configuration within days (depending on your current Azure setup)
- Offer a full desktop to your employees
- Offer both dedicated desktops and shared desktops
- Offer access to individual applications
- Access using any HTML5-based browser
- Access through a Remote Desktop app
- Provide full access to your internal resources
- Add or remove users, desktops or applications, as needed, within minutes
- Normal management of the virtual desktops with your current Endpoint Management tool
- Fully integrate with FSLogix to redirect user profiles and Office data
- Deliver the only multi-session Windows 10 virtual desktop experience
- Enable optimizations for Office 365 ProPlus
- Migrate your Windows Server remote desktops and apps to Azure
- Offer a more secure and productive virtual desktop experience on Azure with Microsoft 365
- Offer WVDs for dev/test environments
