AI-Assisted Health Chat with Speech Service

Navigate Your Health: Smarter, Faster, Better

Purpose

HouseVizit is designed to fundamentally transform patient-doctor interactions, ensuring individuals can effortlessly find the right healthcare provider for their specific needs.

Solution

Utilizing a sophisticated AI healthcare assistant powered by **Azure Health Bot**, which incorporates Capita's medical intelligence, **HouseVizit** meticulously analyzes user-shared symptoms to facilitate an accurate match with the ideal healthcare professionals. As a mobile app, it offers unparalleled accessibility, allowing patients to seek medical advice on the go and enabling doctors to extend their reach beyond traditional settings.

Potential Impact

HouseVizit has the potential to markedly improve the efficiency of patient-doctor matching. It could empower patients with the confidence that they are receiving the right care, while healthcare providers may benefit from a streamlined process that brings relevant cases directly to them. This could not only enhance the quality of healthcare delivery but also optimize the utilization of medical expertise.

AI Speech

Next Milestones

- Explore the potential for AI to offer immediate prognosis of symptoms, providing crucial assistance to patients in urgent need.
- Enable the app to serve as a comprehensive Electronic Health Record (EHR), facilitating a more personalized and efficient healthcare experience.
