Enable a Modern Digital Workspace
by delivering apps and desktops to any device.

Get an easier path to modernising your environment by creating a more mobile and productive workforce through Azure Virtual Desktop (AVD).
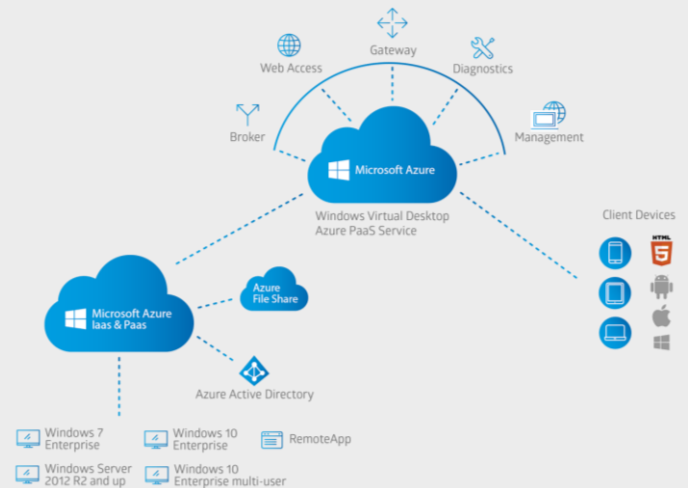

ENGAGEMENT ROAD MAP

This **free** two-hour workshop leads to our implementation engagement and is designed to help organizations get an easier path to modernizing their environment and creating a more mobile and productive workforce through AVD.

ENGAGEMENT BENEFITS

During this session we explore the overall AVD solution and how it can be implemented for maximum benefit. We provide expert recommendations for your workloads, how to achieve security and compliance, and cost economics for organizations to accelerate delivery with confidence. We showcase how Veracloud can add value through our AVD Manager which is designed to manage and auto-scale AVD deployments, all through an intuitive user interface.

NEXT STEPS

Contact us today to learn more about our offering and take the next steps to launch your virtual apps and desktop environment.
