Analytics

Highest Level of  
Security

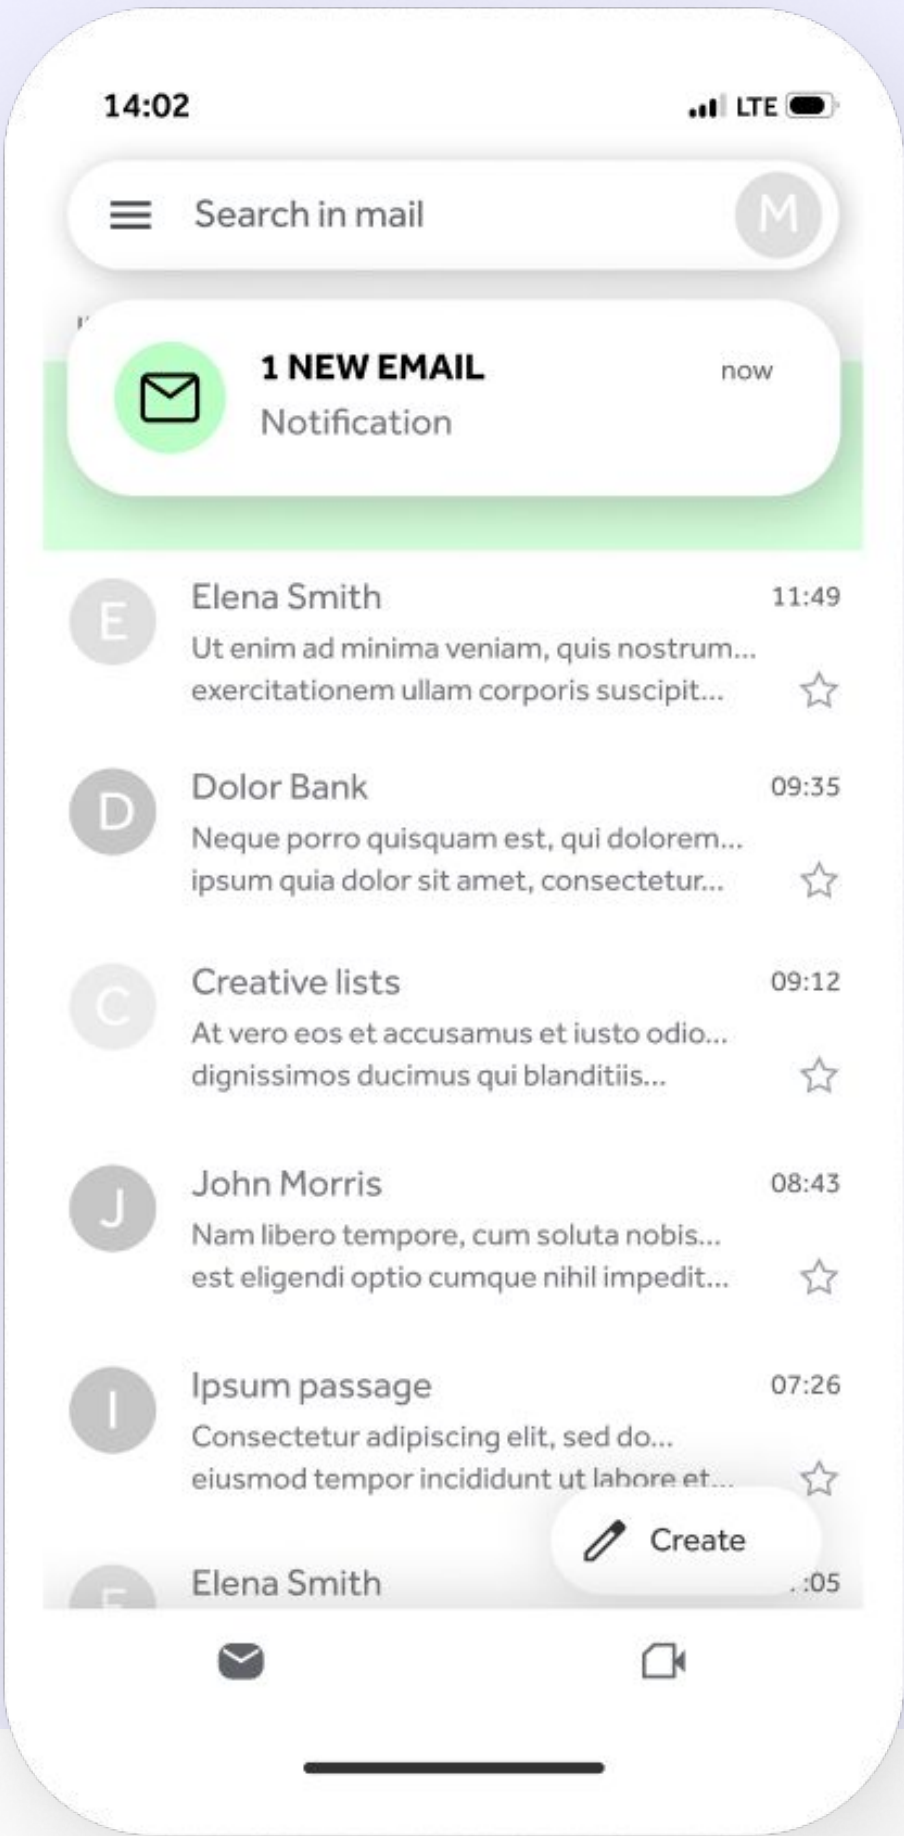

Comprehensive  
Support

## Your emails delivered where they should be, thanks to MessageFlow Email API

As a **Microsoft Azure** user, you can now take advantage of **MessageFlow Email API** – a scalable, fast, and secure solution for mass email delivery. MessageFlow is a modern RESTful API designed for businesses that require high **deliverability**, advanced **analytics**, and the highest level of **security**.

## Key Benefits for Your Business

- ✓ **Billing within the Azure Budget** – Use the available funds in Microsoft Azure without additional formalities.
- ✓ **Fast and Reliable Delivery** – The average message delivery time is just 0.16 seconds.
- ✓ **High Deliverability** – Achieve a message deliverability rate of 99.98%, thanks to partnerships with key mail providers.
- ✓ **Real-time Monitoring and Analytics** – Track delivery metrics and campaign effectiveness.
- ✓ **Dedicated or shared IP** – Choose dedicated IP addresses or high-reputation shared IPs.
- ✓ **Data Security** – GDPR compliance, **ISO 27018, ISO 27001, ISO 22301, CSA** certification and **BIMI** standard, advanced **anti-phishing** protection, and servers located within the EEA.
- ✓ **Comprehensive Support at Every Stage** – From integration and onboarding to ongoing technical support. No generic responses – we focus on your needs, offering personalized advice and quick solutions.

## Use Case Examples

### Marketing and Promotional Emails

Effective customer communication and sales growth.

### Transactional Emails

Purchase confirmations, account creation notifications, and password change alerts.

### Mass Email Deliveries

Throughput tailored to the scale of the delivery without queuing.

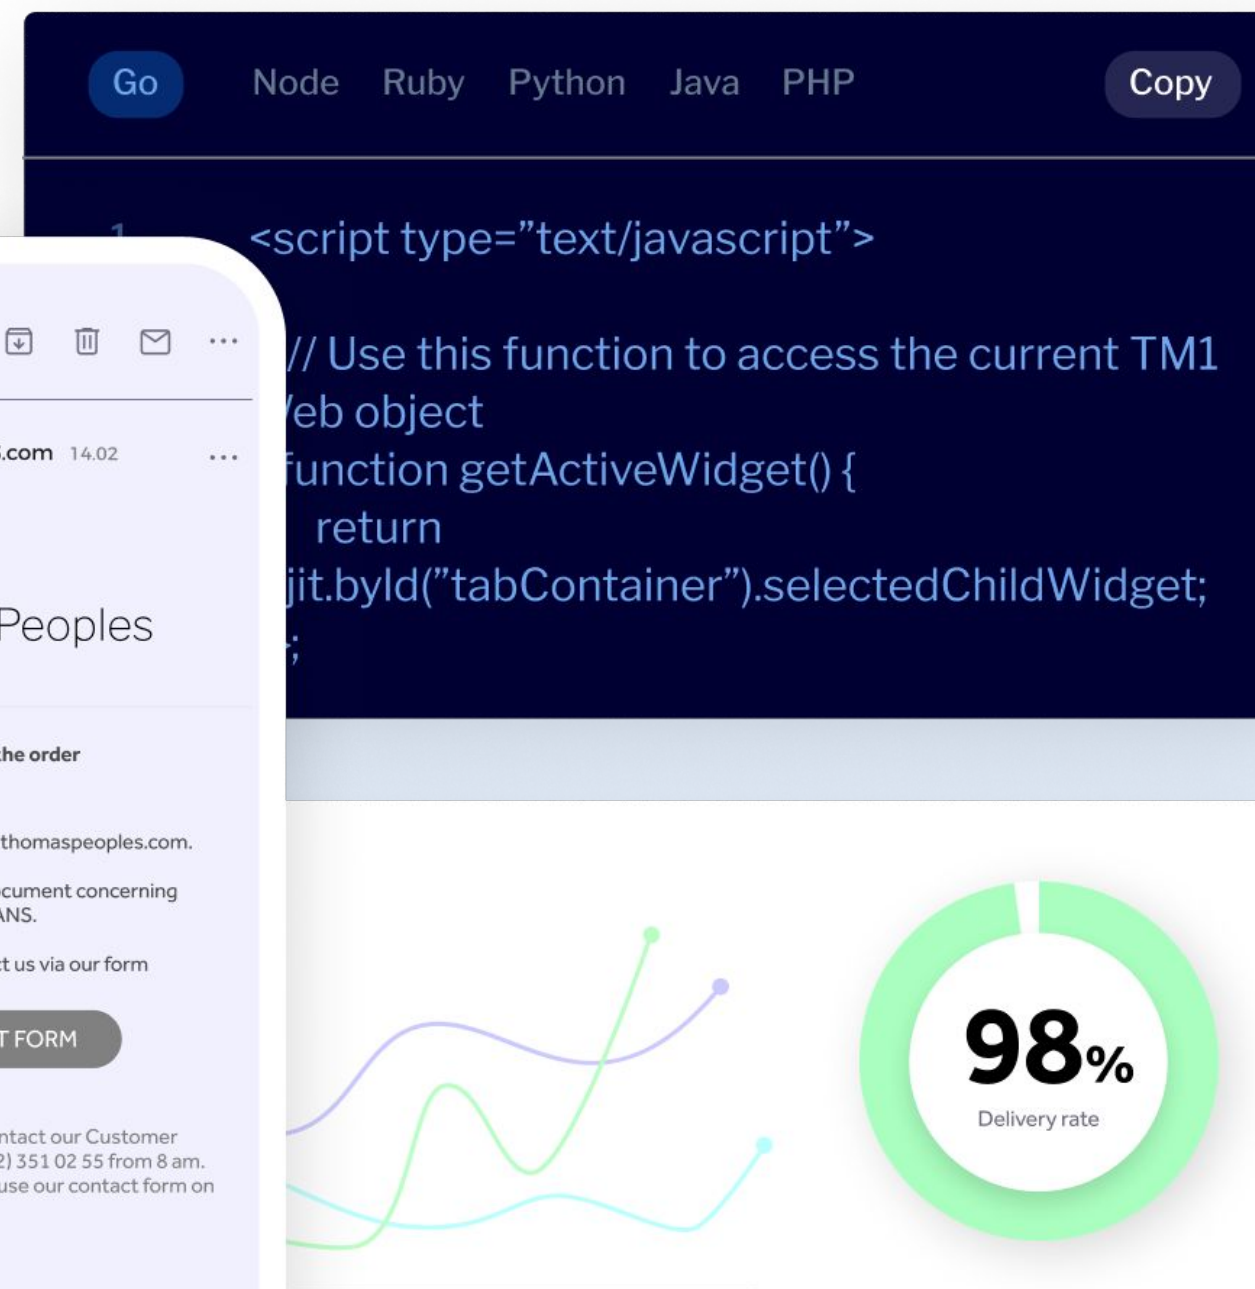

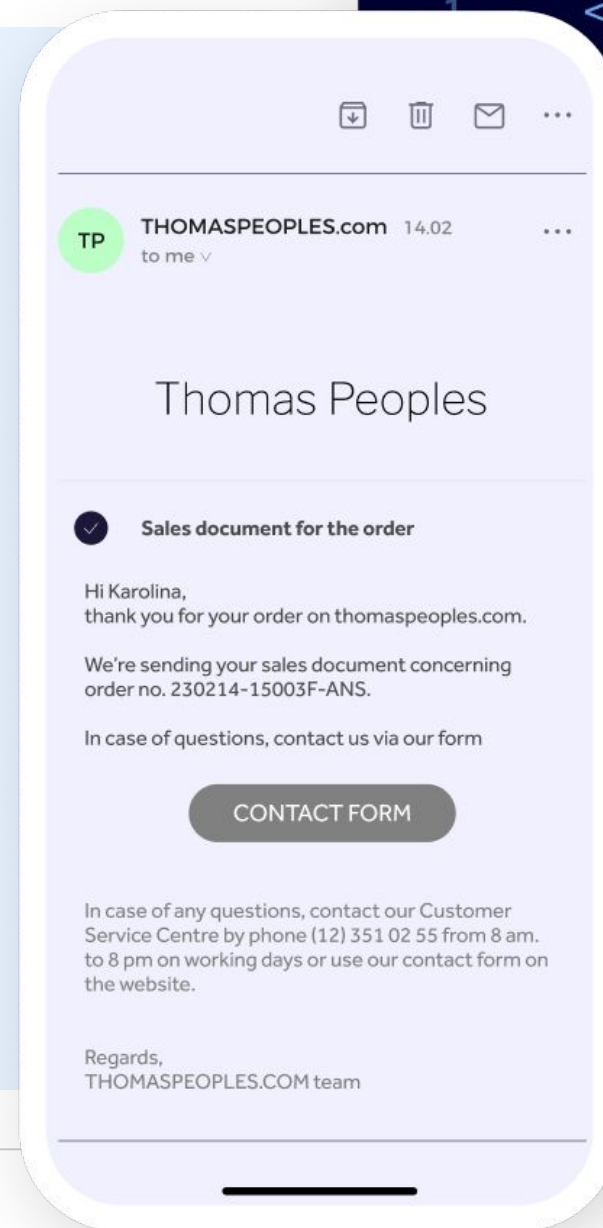

### Critical Messages

Fast and secure delivery of critical messages (2FA, OTP).
