

Verified Orchestration

Full technology benefits;
ISV for Enterprise

Intuitive user
experience

Reduce the
burden on your
IT team

Is Verified Orchestration for you?

- Are you looking for identity management solutions for contractors, suppliers or third parties?
- Do you issue credentials to a member or association group?
- Are you looking to reduce cybersecurity risk?
- Are you looking to lower the cost of your current solutions?
- Is your IT or HR team resource or bandwidth constrained?

If you've answered yes to any of these, Verified Orchestration is there to help you

How we help

- We provide you with an ISV solution that empowers your organisation to issue and manage Verifiable Credentials in just a few clicks
- We uplift your current application stack and fit seamlessly within it
- We provide a control plane for your organisation, enabling governance, reporting and audit

Pre-requisites

- Microsoft Azure tenant
- Microsoft Authenticator end-user experience
- Our unique integration-first approach enables seamless integration across your application stack

Implementation approach

- We activate the Entra Verified ID within your tenant
- We have a flexible implementation approach, from no-touch to fully supported
- We can implement Verified Orchestration technology with you, and help you stand it up within your organisation
