

Microsoft Fabric Deploy & Adopt

Realise the potential of your data with Version 1 and Microsoft Fabric

Version 1 invite you to partner with us to realise the potential of your data and leverage Microsoft Fabric, a powerful Microsoft service enabling you to reshape how your organisation accesses, manages & acts on data and insights.

This program of work helps your organisation to begin your journey towards becoming truly data-driven by assessing your needs and establishing your goals around data accessibility, empowering employees, implementing strong governance, realising cost effective scale and analytics maturity.

Version 1's path to adoption of Microsoft Fabric provides you with an overview of what Fabric is and why it's so powerful, followed by assessing your current posture and planning your future state across 6 key pillars, supported by Version 1 SDLC practices.

Delivered in an agile approach, this program delivers a tailor made data strategy and roadmap, solution design documentation, a data governance approach and plan and an MVP implementation including enablement to empower your organisation to continue to develop and mature on the Fabric platform.

Objectives

- Understand what Fabric is and why its so powerful
- Create an adoption path for the successful use of Fabric
