VERSION 1

DevOps Maturity Assessment

Azure-Aligned DevOps Maturity Assessment

Accelerate your DevOps transformation with a bespoke assessment designed and delivered by Version 1's expert consultants. Our approach is aligned to industry best practices and the **DevOps Research and Assessment (DORA) model**, ensuring measurable improvements in delivery performance.

What We Deliver:

- Comprehensive review of your organisation's DevOps culture, processes, and technology.
- Workshops, surveys, and benchmarking to identify gaps and opportunities.
- Actionable recommendations and a clear roadmap for DevOps maturity.

Why Azure?

Our assessment is tailored for organisations leveraging Azure services such as Azure DevOps, GitHub Actions, Azure Monitor, and Azure Kubernetes Service (AKS). We help you:

- Accelerate cloud-native automation and AI-driven operations.
- Optimise pipelines for Azure-based workloads.
- Improve security and compliance using Azure-native tools.

Benefits:

- Faster time-to-market and improved release cadence through Azure DevOps best practices.
- Reduced operational costs by eliminating inefficiencies and manual processes.
- Enhanced code quality and reliability via continuous integration, testing, and security scanning.
- Improved collaboration between IT and business teams.
- A tailored roadmap for DevOps maturity aligned to your Azure strategy.

Engagement Options:

Delivered as a standalone engagement or as a precursor to broader Azure DevOps or cloud transformation initiatives.

Highlights

- A comprehensive, expert-led DevOps assessment tailored to your organisation and Azure strategy
- Benchmarked against industry best practices and the DORA model
- Delivers actionable recommendations for automation, quality, and cost reduction using Azure-native tools
- Accelerates DevOps maturity and AI adoption with proven frameworks, Azure services, and tooling

Also, from Version 1:

- Azure Discovery & Assessment Service
- AI Readiness Assessment
- Version 1 – Decipher
- ASPIRE Managed Services
