

Windows Virtual Desktop

Version 1 WVD FastStart Proposition

WVD FastStart

“Version 1's Seamless WVD Implementation is typically a short-term, 2-week high-value engagement involving a core build, Office 365 and one custom app in a phased approach.”

Seamless Windows Virtual Desktop Implementation in Four Steps:

1. **Discover** – define scope, understand business context and discover pre-launch requirements such as licensing, Azure AD and design
2. **Enable** – provisioning and configuring a new WVD tenancy, or utilising your current tenancy
3. **Adopt** – upskilling your team and supporting complex queries, remote training and providing rich user training materials
4. **Enhance** – handover and help you plan for adoption, change management, custom solutions and support requirements
