VERSO™

WHAT IS VERSO?

VERSO is a portal running on the Microsoft cloud, with flexible workflow configuration and data management capabilities. VERSO uses seamless transactions to manage talent request for all participating parties in a HR staffing ecosystem.

HIGH PERFORMANCE RECRUITING

The VERSO recruiting management portal improves the end to end recruiting and staffing process for companies of all sizes, enabling participation among clients, internal staff, recruiters and subcontractors.

VERSO:

- Reduces cost of managing recruiters and subcontractors.

- Streamlines talent request assignment – reducing time and effort

- Organizes recruiting workflow by customer as preferred

- Enables customers to submit talent request directly – improving satisfaction and customer engagement

- Monitors pace of candidate submission and response – using KPI alerts

- Creates candidate database for easy access for future needs

- Enforces communication of mandatory candidate requirements

- Visualizes recruiting trends and subcontractor performance

- Simplifies process for subcontractors – improves communication and encourages participation

- Integrates with Slack and Office 365 for easy and documented communication

- Predicts trends using Microsoft machine learning
