

# NXT eNET

**NXT eNET: Streamlining e-Invoice Management for SAP**

## **Introducing NXT eNET: A new era in e-invoice management**

NXT eNET, a pivotal component of **NXT EDGE** for SAP, revolutionizes e-Invoice management. It enables corporate buyers connecting their SAP system natively with more than 30 national e-Invoice networks – through a single access point.

Sending and receiving compliant electronic invoices directly from standard SAP transactions.

## **SEAMLESS INTEGRATION ACROSS THE WORLD**

NXT eNET integrates with the global e-Invoice access point of our partner **Unifiedpost**. A single connection provides access to over 30 national e-Invoice networks, simplifying the receipt and processing of e-Invoices across different markets.

## **KEY BENEFITS OF NXT eNET**

### **Unified Connection:**

A single connection serves all company codes and markets, simplifying e-Invoice management.

### **Compliance Assurance:**

Each invoice is validated for compliance, ensuring adherence to regulatory standards.

### **Auto-Parking:**

Achieve 100% auto-parking of supplier invoices, the foundation of straight-through-processing.

### **Pro-Forma Invoice Images:**

In the absence of invoice images, NXT eNET generates pro-forma images to maintain process consistency.

## PREPARING FOR E-INVOICE MANDATES

Many markets have mandated or are planning to mandate e-Invoicing for B2G and B2B transactions. NXT eNET positions businesses to be future-ready, adhering to these mandates seamlessly.

### LIST OF MARKET MANDATES

MANY SUPPLIERS ARE READY TO SEND "PERFECT" ELECTRONIC INVOICES

| COUNTRY    | NETWORK               | MANDATED B2G | MANDATED B2B | INBOUND IN SCOPE |
|------------|-----------------------|--------------|--------------|------------------|
| AUSTRALIA  | PEPPOL                | -            | -            | YES              |
| AUSTRIA    | PEPPOL                | YES          | -            | YES              |

Many more networks are connected through roaming agreements

## COMPLIANT PROCESSING OF HYBRID E-INVOICES

Standards like ZUGFeRD (Germany/Switzerland) and India's e-Invoices are hybrid, combining image-based and data elements. NXT eNET ensures these invoices are processed in full compliance, leveraging its advanced capabilities.

## TRANSITIONING TO E-INVOICING: COMPLETELY TRANSPARENTLY

Corporate buyers benefit most from electronic invoicing: It is a fully automated data exchange that ensures compliance and streamlines invoice processing. NXT EDGE integrates electronic- and image-based invoices (e.g, PDF) and achieves 100% auto-parking, substantially improving productivity in accounts payable. Customer invoices are sent directly from SAP SD.

## NXT eNET: One single solution to enable global e-Invoice management

Embrace the future of invoicing with NXT eNET – where compliance meets efficiency.
