

Advanced Distribution for SMB

Why our solutions can add value to you?

Our Advanced Distribution solution is an enterprise grade cloud solution at an affordable price. This solution addresses common inventory, warehouse and light manufacturing needs for small to midsize distribution and manufacturing companies. Our solution is based on the Business Central platform which includes out of the box and enhanced features we have created to address your specific challenges.

Packages

Silver

Starting at a Onetime cost of \$2,499

This package allows companies to evaluate the **Dynamics 365** Business Central solution in a detailed but low cost/low risk way. You will be provided with the information needed to make an informed decision before fully committing to such an important decision and investment.

Gold

5 User Systems - Starting at \$2,999/month

This package addresses the needs of distribution companies that do not need advanced warehouse, supply planning, or manufacturing functions.

Platinum

10 User Systems - Starting at \$4,999/month

This package is for distribution companies that also have advanced warehouse, supply planning, and/or light manufacturing needs.

What is included in each package?

Implementation costs are waived for the Gold and Platinum Packages

Silver:

- Up to 3 Requirements meetings to understand your current state and needs
- Includes a tailored sandbox environment with representative data and setup to match your needs
- Receive a Solution Design and Walk-through of key processes
