

Remittance AI

Remittance AI uses embedded Copilot AI in Microsoft Dynamics 365 Business Central to automatically process inbound emails and attachments into transactions.

Replace Manual Processing and Entry

Do you receive remittance from your selling partners in multiple formats like PDF, Excel, email body and must manually review, reconcile and enter these? Stop wasting your time. Remittance AI uses embedded Copilot AI in Business Central to automatically process inbound remittance emails into cash receipt journals and applies it to your invoices automatically. Setup is easy. No need to map or train the system to understand the format of the incoming information. Just wire up your inbound email box and let Remittance AI take care of the rest.

Features

- Support for PDF, Word, Excel and Email body forms of remittance details.
- No mapping of received formats required. Data is automatically mapped using AI.
- Create Cash Receipts Journals and Applies details to invoices automatically.
- For Credits taken automatically by the selling partner automatically creates a credit and applies in BC.
