Graduate of Columbia

Pravin Chandrasekaran  
Formerly Citigroup, London  
Graduate of Harvard

VETRI

**VETRI** Platform incorporates four key components in its decision making system of which two are user driven and the other two are robotic. User driven components include a) Client's budgetary strategy b) Client's pricing policies. Robotic components include a) Data selection b) AI/ML Methodology. The combination of these four components yields a customized decision system for the client.

How does a client use VETRI

**VETRI** platform can be used in one of two ways.

- 1) Client licenses VETRI technology and builds their own internal strategies, forward curves, budgetary algorithms etc. The license is renewable on an annual basis and is available for unlimited users and unlimited assets.
- 2) Client pays a nominal fee for the use of final index (a customized sale or purchase strategy). Client can scale the allocation of purchases or sales depending on performance of the index.

Benefits

As an example, customer must buy 100KT of Sugar in 2023 subject to corporate policies. VETRI will help the customer to decide when to buy and how much to buy any time and beat the budget benchmark by say 20% (Check [www.aillandindices.com](http://www.aillandindices.com) for live performance). The benchmark and target is decided by the client, VETRI offers the performance.

Coverage

**VETRI** platform currently covers 2 main markets Commodities and FX across all the major industries such as Basic Materials, Food & Beverage, Industrials, Utilities etc. VETRI platform is available across all major markets with focus on both exchange listed and cash assets.

Summary

**VETRI is**

- ✓ An technology platform
- ✓ A timing system to help clients purchase and sell better and differently
- ✓ Designed to offer customized purchase and sales strategies

**VETRI is NOT**

- ✓ An execution platform
- ✓ A price forecaster
- ✓ A data provider
- ✓ An AI Model
