

From Global Cloud Chaos to **Azure** **Excellence**

**Do you want an easy way to
manage your IT estate while
ensuring your technology
investments are relevant and
up-to date?**

Your cloud should be more than a tool for keeping the lights on — it should be the engine that powers innovation, cost efficiency, and security. But with so many moving parts, you need the confidence that your Azure setup is delivering what your business truly needs to thrive.

The Viadex Azure Well-Architected Review will help you break through the barriers of cloud inefficiencies by aligning their Azure environments with best-in-class practices, ensuring they are always optimized for performance, cost, security, and operational excellence.

**This unique approach ensures that you aren't just in
the cloud — you're thriving in it.**

Unlock the full value of Azure

Businesses that thrive in the cloud are the ones that take a proactive approach, optimising their infrastructure to drive growth, efficiency, and security — while keeping costs under control. That's why we built Viadex the Azure Well-Architected Review.

Viadex's Azure Well-Architected Review is built on the foundation of five core pillars for optimising your cloud strategy.

By focusing on these pillars, we help you align your cloud infrastructure with your business objectives, ensuring security, performance, and cost-efficiency at every step.

Performance Efficiency

Viadex ensures that your Azure workloads are fully optimised, delivering faster response times, lower latency, and seamless scalability.

Reliability

We ensure a reliable Azure environment by building redundancy, enhancing fault tolerance, and optimizing disaster recovery protocols, eliminating downtime.

Security

Focusing on encryption, identity management, and access control, we implement best practices to secure data, protect applications, ensure regulatory compliance, and reduce breach risks.

Cost Optimisation

Cloud costs can spiral out of control without a clear strategy in place. Viadex focuses on the Cost Optimisation pillar to ensure you're getting the most value for your cloud investment.

Operational Excellence

Viadex optimises your Azure environment for seamless daily operations. From automated monitoring and alerts to streamlined processes for deployment and maintenance.

Viadex supports your growth

Viadex is a global managed services provider (MSP) with a proven track record and trusted service delivery.

Our Azure Well-Architected Review not only addresses the five pillars of performance, reliability, security, cost optimisation, and operational excellence — it does so with a level of expertise, insight, and ongoing management that transforms your Azure environment into a true business enabler. Here's how:

1. Fully Managed Azure Expertise

Viadex offers a fully managed Azure service that goes beyond optimisation. We ensure the best placement of workloads.

2. Global Reach, Local Support

With a presence across 18 countries and growing, Viadex's global team of experts ensures your cloud infrastructure is optimised for cost and performance, no matter where you operate, delivering seamless support across regions and time zones.

3. FinOps and Continuous Optimisation

Viadex provides in-depth financial operations (FinOps) and cloud optimisation reports, delivering continuous visibility into cloud costs.

This allows you to make data-driven decisions, maximise cost-efficiency, and ensure every cloud investment aligns with business objectives.

4. Tailored Optimisation Journey

Our bespoke optimisation journey ensures that your cloud environment is tailored to your unique needs. We don't offer a one-size-fits-all solution — we deliver ongoing optimisation that aligns cloud performance, security, and cost savings with your specific business goals.

5. Backed by Fulcrum IT Partners

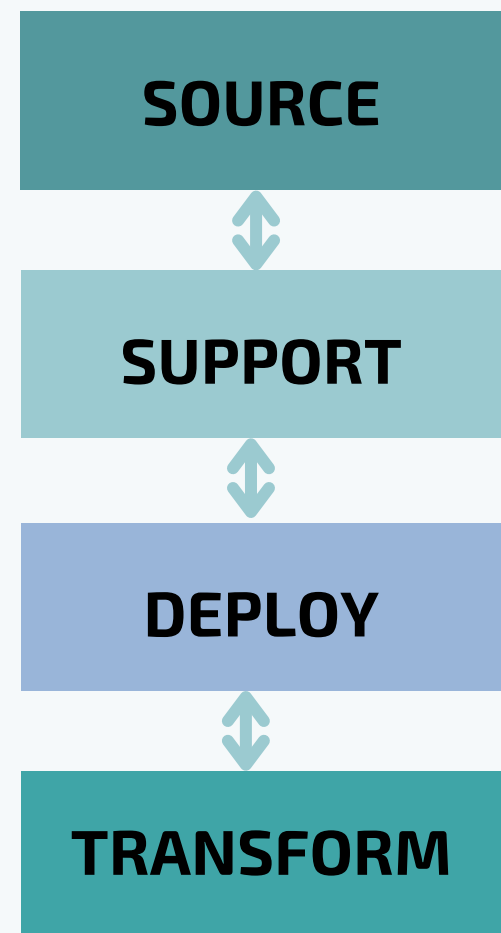

As part of Fulcrum IT Partners, Viadex leverages enhanced capabilities in cybersecurity, cloud, and managed services, allowing us to deliver comprehensive global IT solutions. This partnership ensures you're equipped for today's needs and tomorrow's growth.

ABOUT VIADEX

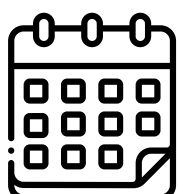

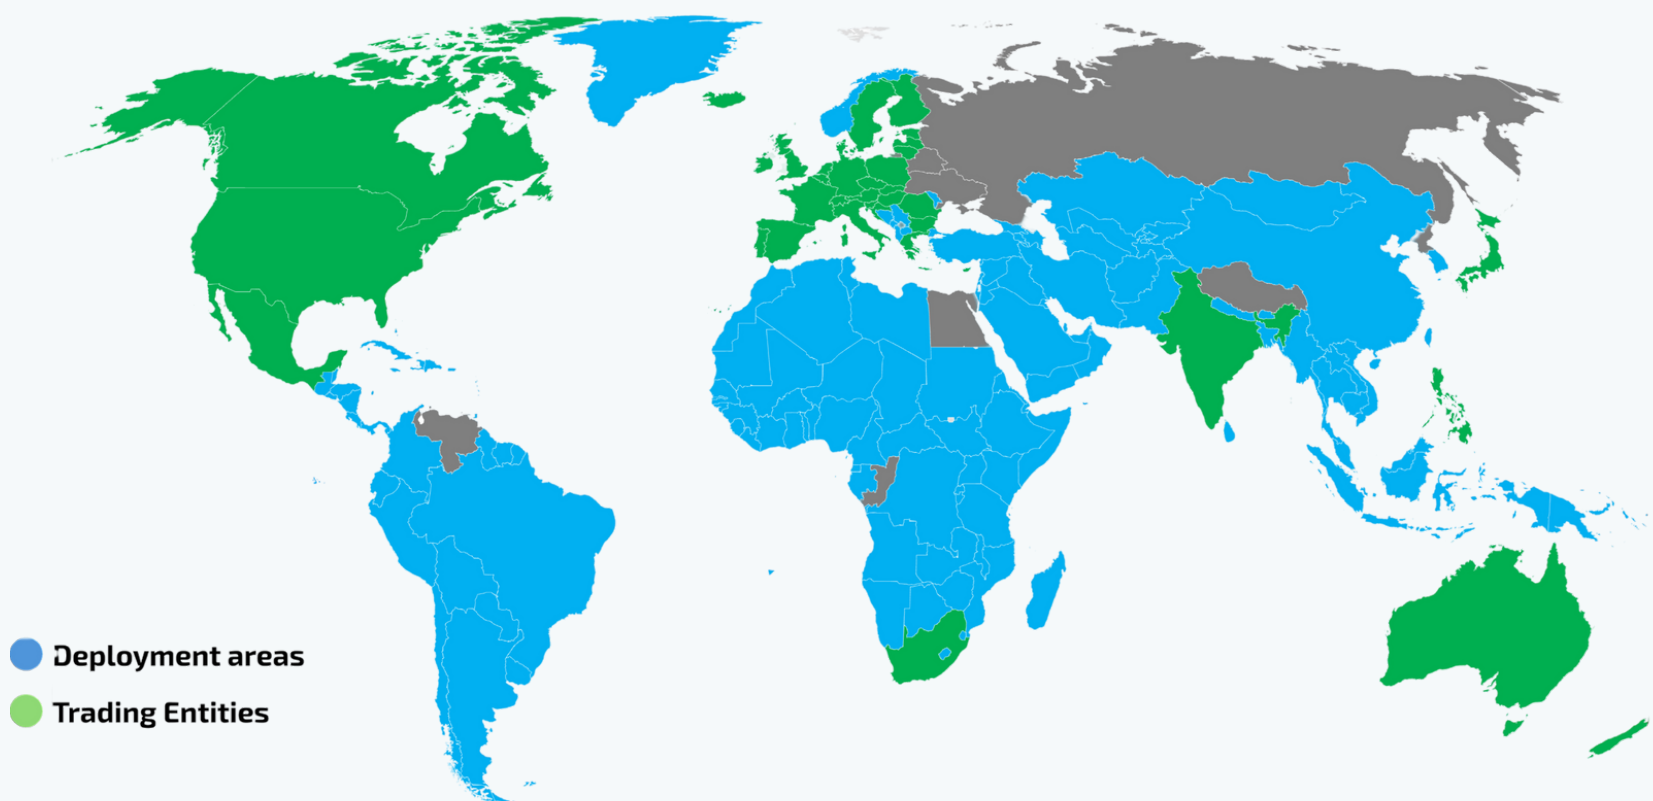

Viadex is a global managed services provider (MSP) with a proven track record and trusted service delivery. The FRAME methodology is our commitment to providing companies with a service that changes how you use and perceive your IT estate.

With Viadex, you get more than a managed service provider. You get a strategic partner that understands the complexities of global IT environments and provides tailored solutions that evolve with your business.

Whether it's optimising your Azure environment, securing it against new threats, or ensuring long-term cost efficiency, Viadex offers the tools, expertise, and continuous support that others simply don't.
