

Hybrid Cloud | High Level Design

Leverage the depth of Vigilant.IT's expertise in Microsoft computing and networking to develop your optimal Hybrid Cloud design. Adopting new cloud technology can be time consuming, our design workshop will short circuit common pitfalls to ensure your successful deployment.

What you get

A 2-Day face to face workshop covering:

- The latest Azure Stack HCI release,
- Security in identity, internet protection and network,
- Using Azure services for a resilient Hybrid Cloud architecture,
- Data protection and system recovery,
- Application migration, clustering and balancing,
- Objectives & Design trade-offs, and
- Considerations for transition and implementation.

Agenda

Day 1:

- Align stakeholders on Business Objectives,
- Assess Hybrid Cloud future state, and
- Explore differing journeys to Hybrid.

Day 2:

- Narrow strategic options with TCQ, and
- Assess implementation trade-offs.

Final Briefing:

- Confirm recommended approach,
- Walk-through design document, and
- Review implementation considerations
