

CASE STUDY

Consultation

Azure (Virtual Networking and SQL)

Vigilant provided guidance and consultation on setting up and deploying Azure SQL and the necessary Virtual Network components to support the environment from a secure on premise location.

Vigilant continues to provide consultation and advisory support.

Challenges Resolved

Reduced need for on premise infrastructure

Cost saving & procedure improvements

Reduced Time to Ramp and Scale

Services Provided

- ✓ Cloud Resell, Architecture, & Setup
- ✓ Ease of Management
- ✓ Security Compliance
- ✓ Training and Development Assistance
- ✓ Alerting
- ✓ High Availability
- ✓ Scalability
- ✓ Virtual Networking
- ✓ Azure SQL(PaaS)
- ✓ VPN Tunnels(IPsec)
- ✓ Azure Active Directory Management
- ✓ Database Maintenance
- ✓ Replication and Disaster Recovery

Inogen was founded based on our conviction that oxygen therapy technology was not keeping pace with the desired lifestyles of patients who depended on it to live longer, more fulfilling lives.

Their compact, lightweight and travel-approved portable oxygen concentrators are designed to free patients from heavy tanks, managing tank refills or being tethered to stationary systems. We believe our products allow [oxygen therapy](#) patients to reclaim their freedom and independence so that life can be lived in moments, not in minutes left in an oxygen tank. With each step we take to improve our products and service, our customers take another step toward more freedom.
