Fast-track Material & Chemical visibility across your products

2025

Orlando Perez | Head of Sales

✉ orlando@viridium.ai

Why take action

Manufacturers are under immense pressure and are facing escalating financial, regulatory, and supply chain risks driven by tightening global mandates, increasing compliance penalties, and critical gaps in supply chain visibility.

Why now

Material and chemical knowledge is the foundational data Manufacturers need to proactively navigate and effectively mitigate incoming headwinds. Without it, they risk falling behind.

Why Viridium AI

Viridium AI's proprietary software fast-tracks access to material and chemical intelligence, ensuring manufacturers have real-time, ongoing visibility into their product portfolios.

Viridium AI

Immediately solve
today's challenges

Future Proofing
For what's to come

Configurable
To meet your specifications

The need for material visibility across nested supply chains has never been more critical

Public Health & Environmental Concerns

Growing Awareness & Research **Geopolitical Tensions, Tariff Battles**

Litigation & Financial Risks Product Survival

Innovation Opportunities **Regulatory Pressure**

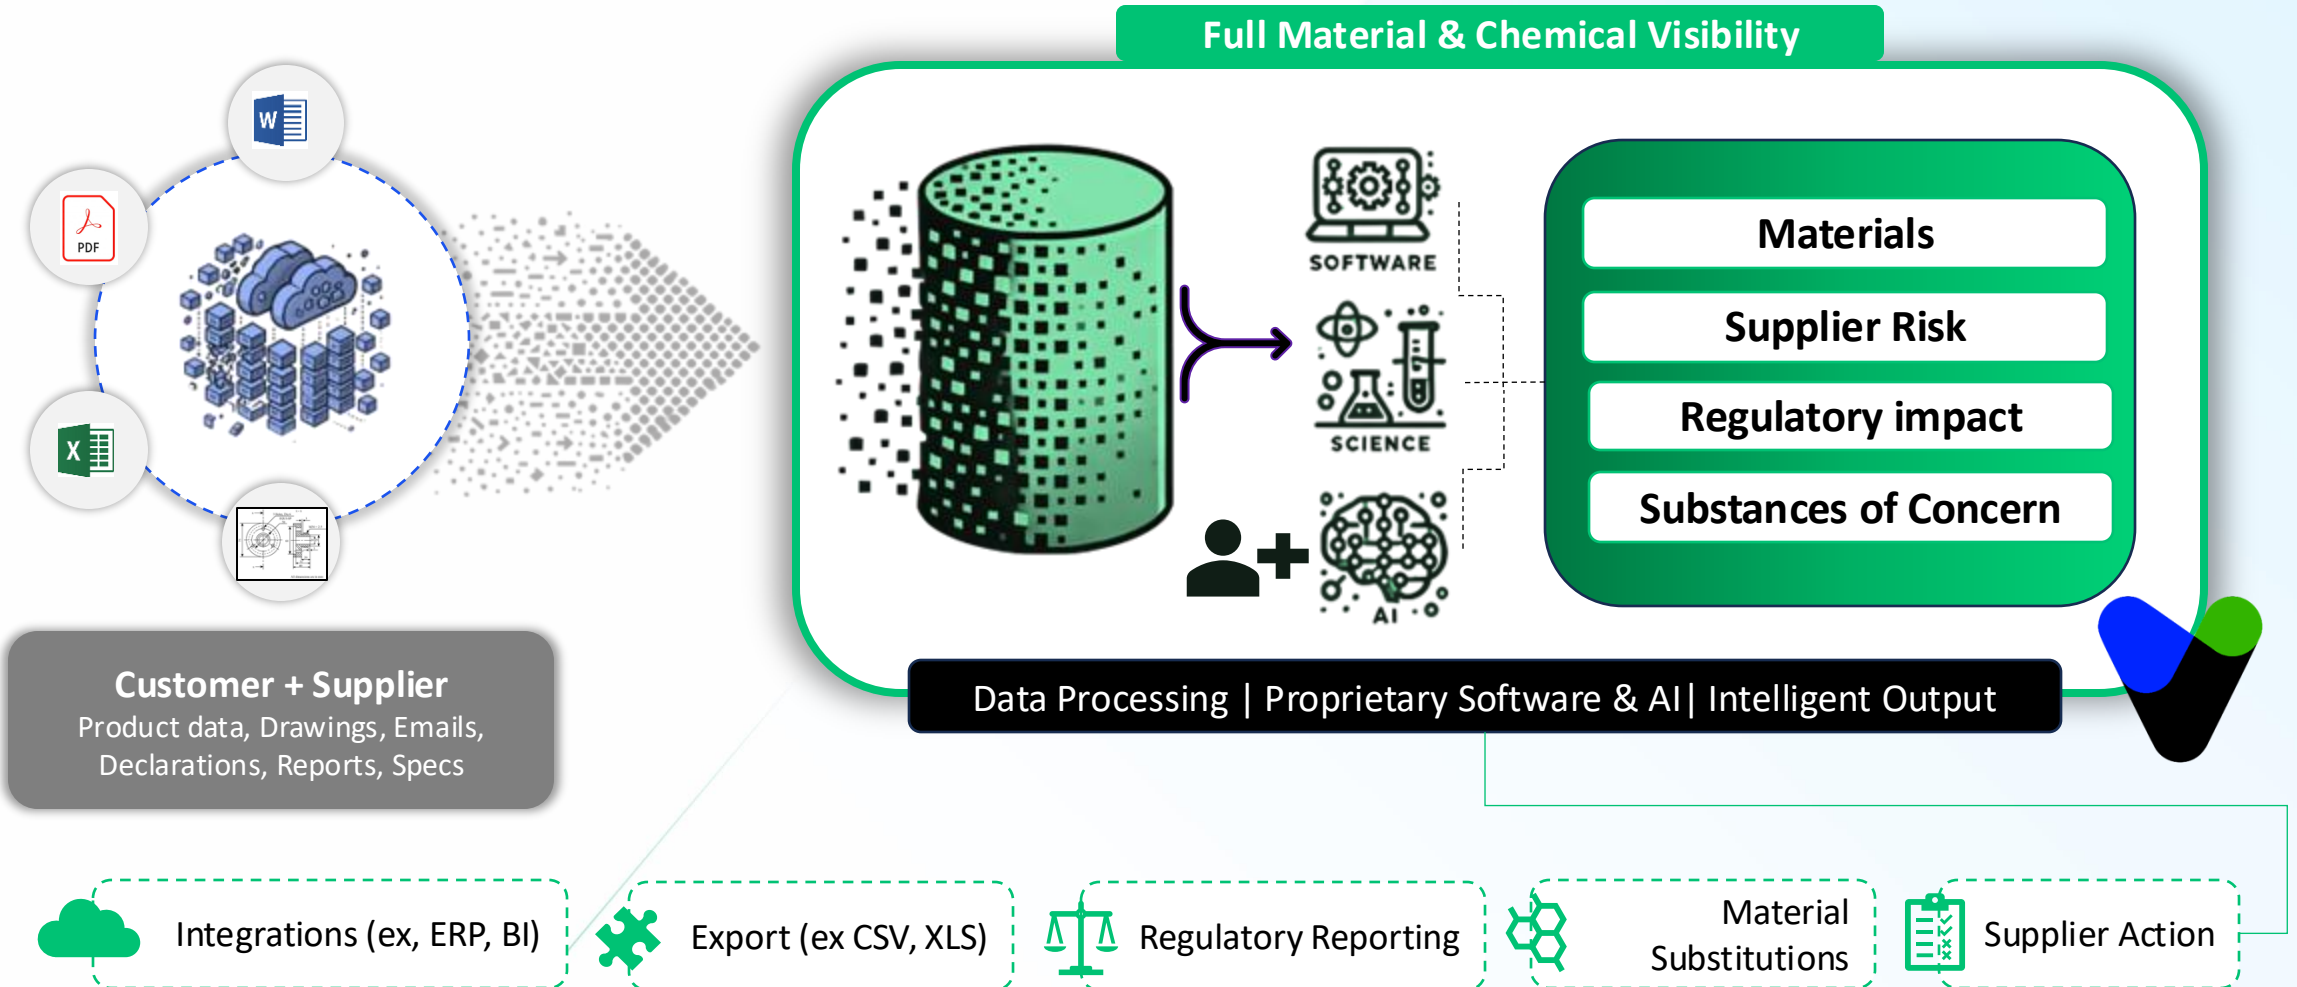

Supply Chain Pressures

Product Liability Insurance

Material & Chemical intelligence is crucial to react to incoming headwinds

Meet Viridium AI: Science-based software to help Manufacturers quickly uncover material & chemical in their products

Platform Benefits Drive Stakeholder Gain

Business Objectives

Improve Data Readiness: Data onboarding & enrichment

Rapid SoC mitigation and tracking framework that's extensible for future at-risk materials

Streamlined ongoing regulatory, compliance, and impact assessment reports

Single view of Material Knowledge, materials of concern Data to cross-functional needs

Set the foundation for safe material substitutions and material innovation

Ongoing Value to Stakeholders

Avoid Regrettable Negligence & Substitutions

Supply Chain

Cut mitigation from **years to months**, optimize **smart supplier outreach** and save \$MM

Regulatory Affairs & Compliance

Cut reporting times by **50%** by automating mundane and repetitive tasks

R&D

Extend market leadership and **competitive differentiator** with an early start to Material Substitutions

IT

Purpose based **Pre-built tools**, shortens runway and saves \$M. **One platform** for all stakeholders.

Scrubbed Product BOMS

Material pinpointed, Identified, Classified

Site-Product-Component-Material-Reg Mapping

Data/Insights beyond MoC

Let's get in touch
