M365 Copilot: Streamline onboarding and boost productivity with Virtusa

Ready, set, Copilot!
Expert readiness assessment and adoption strategies

Organizations seeking to unlock the full potential of Microsoft 365 face a challenge: maximizing the impact of AI-powered assistant, Copilot, requires strategic planning and seamless integration. Successfully navigating this process involves addressing key challenges: **Security and compliance, data privacy, integration with existing systems, and user adoption and training.** Virtusa offers a comprehensive solution to overcome these hurdles: our **M365 Copilot readiness assessment** identifies risks and opportunities and recommends optimal deployment strategies. We also provide a **bespoke Copilot adoption plan** and pre-built scripts for faster onboarding, leveraging the Copilot Studio.

What to expect: Deliverables

Technical readiness scorecard:
Evaluate strengths and areas for improvement

Custom Copilot adoption plan:
Customized to your organization's needs and goals

Evaluation report and setup for non-Microsoft data sources:
Upto two data sources will be evaluated and set up

Pilot agent:
Implement one AI agent to enhance out of the box M365 Copilot experience

What to expect: Benefits

Faster time to value:
40% faster Copilot implementation

Enhanced user adoption:
Improved user experience and ensuring consistent outcomes through reusable prompt library

Foundation for AI enablement:
Establish a robust base for future AI initiatives

Benefits

Improved productivity:
Boost organizational productivity by 35%

Reduced costs:
Optimize licenses for efficient Copilot usage

Seamless integration with non-Microsoft data sources:
Safely integrate and access insights from non-Microsoft systems

Access to data within the Microsoft ecosystem:
Utilize agents for safe access to Microsoft data

Why choose Virtusa:

Award-winning Microsoft partner:
We bring unparalleled expertise in delivering innovative solutions using Power Platform. Microsoft has recognized our excellence by awarding us the Partner of the Year award for Power Automate and App Modernization

Deep domain expertise and cutting-edge AI capabilities:
Our deep domain knowledge, combined with cutting-edge AI and generative AI capabilities, enables us to drive transformative outcomes for our clients, empowering them to achieve operational excellence and unlock new growth opportunities

Power Platform specialists:
Virtusa offers comprehensive offerings, including services, adoption workshops, and strategic initiatives to help your enterprise accelerate digital transformation using the Power Platform and leverage the benefits of advanced Microsoft low-code / no-code technology. This expertise is crucial for seamless Copilot integration and customization

Bespoke solutions:
We tailor our approach to your unique business needs, ensuring a Copilot implementation that aligns with your goals and workflows
