Virtusa's Data and Analytics offerings on 🙏

Modernize | Maximize | Monetize

Engineering

Our Helio Data agents powered by 🙏

Building the next generation data platform on *Fabric* using AI agents

Data discovery	Data architecture & modeling	Data engineering	Data governance	Data assurance	Data Ops & monitoring	Data consumption
Exploration Requirement consolidator agent Autonomous data gathering Automated insight generation Experimentation & PoCs	Analysis Data modeler agent Automated data model standards enforcement agent Data discovery profiling agent	Build ETL code generation agent Code optimizer agent ETL code review agent	Extract Automated policy extraction from document Automated data classification	Test artifacts Test plan generation Test scenarios creation Synthetic data generation	Deploy & launch Automate creation and execution of CI/CD pipelines Automated enforcements of security & compliance	 Business intelligence Automated dashboard creation Conversation report generation Automated report classification Report optimization and rationalisation
	Generate design documents Design API framework Data design and summarizing agent	Migration& modernization Data pipeline orchestration agent Meta data extraction agent Schema and data mapping generation agent	Implement Automated policy enforcement Automated data sharing Automated data cataloguing & lineage	Test execution Test script generation agent Output data validation agent	Automated data/ platform monitoring & performance tunings
