# Cyber Pilot

Cybersecurity Platform for SMEs

Manage your cybersecurity from diagnosis to execution with the Cyber Pilot platform by Visiativ.

Cyber Pilot allows IT departments to take control of their cybersecurity by launching a diagnostic and following the resulting remediation plan thanks to clear indicators, recommendations from our experts and innovative technologies.

- A single, unified view of all your essential data and insights

- Outsourced CISO expertise

- Best technologies on the market to protect your assets.

Smart indicators

- Gather and track all the critical vulnerabilities of your IT system in a single cockpit

- Set your roadmap according to your priorities

Benchmark

- Get a quick and complete benchmark of your security level with your peers

- Prioritize your actions according to your weaknesses

Toolbox

- Access our awareness training, website protection, phishing test or pentest tools directly in the platform.

The best Cyber solution for SMEs

With Visiativ Cyber Pilot we understand our weaknesses, our strengths and what we need to implement in order to build sustainable Cyber resilience. It is an effective and understandable solution for an SME.

- Elise Meyer, COO, Socaps

SOCAPS
TALENTED INDUSTRIAL SOLUTIONS

Take action by performing a quick diagnosis and implementing corrective actions in one single cockpit

A platform to rule them all

- Capture the main data from your security
- Organize your Cyber roadmap
- Get a full dashboard and KPIs of your website defense
- Work with your internal teams, your service providers and our experts directly from the Cyber Pilot
- See your security scores in real time

The Cyber toolbox

- Send fake phishing email campaigns
- Make your employees aware
- Test your defenses with our network penetration tests
