VISIONET

A Robust Data Foundation is Essential in Building a Digital Enterprise

The role of a data platform is becoming more and more crucial as organizations gather an ever-increasing volume of data from multiple internal and third-party sources

Visionet's Modern Data Platform Accelerator can help you overcome these challenges

Visionet's Modern Data Platform Accelerator Features

Transform data into action with Visionet's Modern Data Platform accelerator, designed to accelerate business growth

Plug-and-play data platform designed to support quick configuration and faster time-to-insights

Pre-built connectors for faster data ingestion from various first and third-party applications

Provides a unified data repository for seamless data consolidation from disparate sources

Robust data processing and cleansing capabilities to provide a single source of truth

Customizable & scalable data platform with enhanced governance & security

Ready-to-run solution for out-of-the-box analytics

Delivers a broad range of sales, inventory & customer analytics dashboards and reports

Advanced analytical capabilities support data-backed decision-making for business users

Here are some of the **outcomes** our clients have experienced as a result of our Data Modernization solutions:

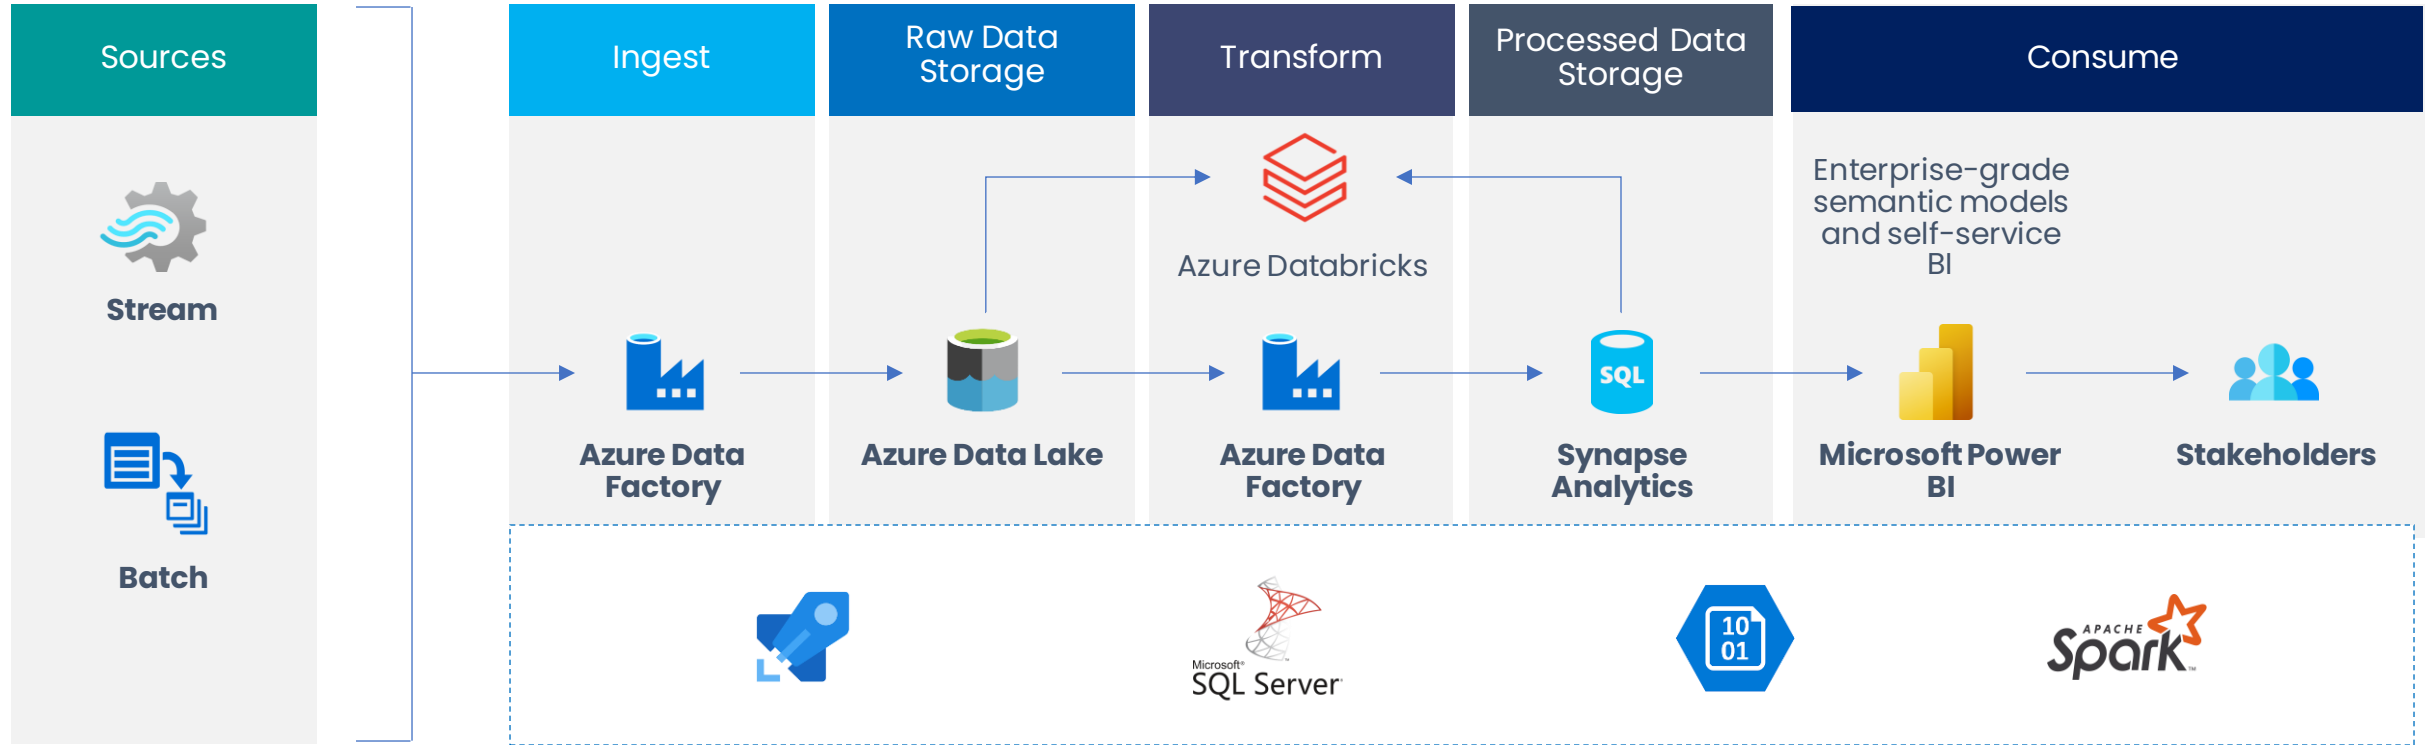

Up to 80%
Reduced Operational Costs

Up to 50%
Increased Operational Efficiency

Up to 30%
Reduced Time-to-market

Up to 85%
Reduced Job Execution Time

Our Data Modernization Implementation Offering

Our implementation package includes:

Define business & data objectives

Discovery sessions

Use case formulation with stakeholders

Reports gap-fit analysis

Demo of pilot use case outputs

Proposed architecture design blueprint

Implementation roadmap & strategy

Data modernization implementation

Sales & inventory out-of-the-box analytics & reporting

Data Source: **D365** Timeline: **6 weeks** Cost: **USD 80,000**

Success Stories

Leading US-Based Apparel Retailer

Challenges

- Siloed data
- No data platform
- Lacked single source of truth
- Required BI capabilities

Key Outcomes

- Consolidated data repository
- Trustable, single source of truth
- Timely availability of data for strategic decision-making

Luxury Department Store in Europe

Challenges

- Outdated data platform
- Lack of standardized & unified data
- Inability to incorporate a sound CRM platform
- Hindering customer insights extraction

Key Outcomes

- Up-to-date & unified data platform
- Improved scalability and transparency
- Real-time analytics
- Enhanced customer experience

Renowned Apparel Manufacturer & Retailer

Challenges

- Decentralized data infrastructure
- Inconsistent & unreliable data
- Lack of interdepartmental transparency
- Inadequate reporting capabilities

Key Outcomes

- Unified & trusted data warehouse
- Enhanced visibility across departments
- Improved operational efficiency
- Real-time reporting & faster report generation

Largest Leading US-Based Tools Retailer

Challenges

- Absence of a unified data repository
- Complex data pipelines
- High maintenance costs
- No alert mechanisms

Key Outcomes

- Robust & resilient data platform
- Efficient data management
- Improved cost savings
- Reliable data available for informed business decisions
