

Azure Synapse Set Up & Migration in 8-10 Weeks

Streamline, Synchronize, and
Scale Your Data Ecosystem
with Azure Synapse

Visionet's Azure Synapse Setup and Migration Offering

Visionet's Azure Synapse Setup and Migration offering integrates Dynamics 365 and legacy AX2012 data into a single platform, providing real-time insights, enhanced analytics, and streamlined reporting for improved decision-making and business growth.

Benefits of Synapse Link

Business Benefits

Unified enterprise-wide data for consistent decision-making

Real-time analytics and reporting for actionable insights

Seamless integration with downstream and upstream applications

Improved customer, supplier, and inventory management

Technical Benefits

Consolidated, scalable data architecture

Real-time synchronization of Dynamics and legacy data

Simplified data integration with Azure Synapse

Optimized performance for handling large data volumes

Synapse Link 8-10 Weeks Migration Roadmap

Streamline Dynamics 365 and AX2012 data with Azure Synapse through staged steps: Assessment, Planning, Implementation, Testing, Hypercare, and Go-Live

Environment Assessment

Comprehensive evaluation of the current environment to identify readiness for synchronization & consolidation

- Readiness and Gap Analysis Report
- Identification of Key Data Challenges
- Customized Consolidation Assessment Checklist
- Initial System Integration Readiness Score

Implementation

Execute the synchronization and consolidation of Dynamics 365 and AX2012 data into Azure Synapse for a unified data layer

- Implementation Blueprint for Data Pipelines
- Configured Azure Synapse Link for Real-time Sync
- Comprehensive Integration Documentation
- Development of Data Validation and Reconciliation Framework

Hypercare

Provide dedicated post-implementation support to resolve issues promptly and ensure operational continuity

- Incident and Issue Management Logs
- Bug Fix Reports and Continuous Monitoring
- Tailored Training Materials for Users
- Workshops and Q&A Sessions for Stakeholders

Data Sync & Consolidation Planning

Develop a robust strategy tailored to unify Dynamics 365 and AX2012 data using Azure Synapse

- Detailed Consolidation Strategy
- Defined Milestones and Phases for Data Integration
- Project Plan with Timelines and Deliverables
- Risk Mitigation Plan for Integration Challenges

Testing & Validation

Ensure seamless, accurate, and continuous data flow post-consolidation & synchronization with robust testing processes

- Automated Testing and Validation Scripts
- Unit and Integration Testing Reports
- Reconciliation of Legacy and Modern Data Sources
- Performance Optimization Checklist

Go-Live

Complete the transition to a unified, scalable data ecosystem with Azure Synapse

- Final Migration Activities and Go-live Execution
- User Training and Knowledge Transfer Sessions
- Post-consolidation Support and Monitoring Framework
- Continuous Performance Optimization

The Synapse Link Impact

Seamlessly sync and consolidate Dynamics 365 and AX2012 data into Azure Synapse for a unified, scalable data ecosystem.
