Visionet's D365 F&SCM license compliance readiness

License clarity | Risk mitigation | No more surprise lockouts

Be ready before enforcement begins

Microsoft is tightening its license compliance for Dynamics 365 Finance & Supply Chain Management (F&SCM). By November 1, 2025, users without valid licenses will be locked out of Finance, SCM, Commerce, HR, and more.

Visionet's license compliance readiness helps you get ahead of these changes with assessments, optimization, monitoring setup, and advisory support, so your business runs smoothly, uninterrupted.

Built for organizations that can't afford license-related disruption

From finance to operations, every team depends on D365. This offering ensures you stay compliant, avoid costly audits, and keep your ERP fully accessible to every licensed user.

Whether you're a CIO, an ERP admin, or a compliance lead, Visionet equips you with clear visibility, accurate assignments, and bulletproof governance.

How it helps

Feature	What it means for you
License audit and role mapping	Identify unlicensed users and ensure every role is correctly mapped to a license. This is critical to avoid soft blocks (starting Sept 1) and hard blocks (starting Nov 1) as Microsoft begins enforcement.
Power Platform & admin setup	Use the Power Platform Admin Center and Microsoft 365 Admin Center to monitor license usage, track unassigned users, and generate audit-ready reports.
More control with granular budgeting	Maintain budget discipline when assigning licenses. Leverage Excel-based imports and Power BI dashboards to align license spending with actual usage.
Proactive assignment planning	Prevent disruptions by assigning licenses before enforcement dates. Visionet can help forecast needs and automate assignments to avoid user lockouts.
Governance guidance	Access clear rules, role-to-license mapping templates, and best practices to stay compliant. Visionet's advisory services help you prepare for audits and optimize license spending.
Budget governance without bottlenecks	Centralized dashboards and alerts ensure that license compliance doesn't hinder operations. Built-in controls help you stay ahead of Microsoft's enforcement curve.

Ideal for

CIOs and IT leaders needing audit-ready compliance visibility

ERP administrators managing user access across Finance and SCM

Security and governance teams focused on reducing license-related risk

Key outcomes

Reduce license waste
Reduction in redundant or over-assigned license

Boost visibility
Understand license usage patterns, security role overlaps, and risk exposure

Improve governance
Stay ahead of Microsoft audits and enforcement while ensuring ongoing compliance

Why it matters

From confusion to clarity
No more guessing. Visionet gives you the tools and insights to manage licenses with confidence.

Built-in compliance
Integrated with Microsoft tools like Power Platform and LCS to help you monitor and act quickly.

Expert-led guidance
We don't just audit, we walk you through the rules, exceptions, and best-fit strategies for your environment.

How it works

Discover
Identify license gaps and assess current assignments

Optimize
Streamline role-based access and minimize license bloat

Monitor
Enable dashboards via Power Platform and D365 admin center

Govern
Establish rules, alerts, and knowledge transfer to ensure long-term compliance

Ready to simplify D365 licensing and stay ahead of Microsoft's changes?

Let's get your team compliant with clarity, confidence, and control.
