

Vince enhances workflow operations with Azure Virtual Desktop

VINCE.

Migrate from VDI to AVD

- Downgraded performance of existing RDS solution running on Azure VMs
- Environment had complex applications and a disjointed infrastructure
- Poor end-user experience especially during peak utilization period
- Challenge of managing O365 app settings & LOB applications connectivity

35%

Productivity improvement

40%

Cost reduction

300+

Team size

70+

Squads

- Modernized the virtual desktop environment with AVD on Azure Cloud
- Leveraged existing Microsoft 365 licenses
- Enhanced application connectivity, image & user profiles management for high-performing sessions
- Improve security of corporate data when users work remotely (COVID-19 pandemic)
- Optimized the new environment for cost and growth

Secure and productive on Azure with AVD
