

MOSAIC · BY VIZLAKE ANALYTICS

Talk to your **Power BI** data.

The AI-native workspace for BI Centers of Excellence.

Vizlake Analytics

ISO 27001 · Microsoft Partner

mosaic.aidi.ai

Mosaic is where your **BI Center of Excellence** asks, builds, and ships answers — together, in one AI-native workspace. Stop swivel-chairing between Power BI, documentation tools, and chat. **Built on Microsoft Entra, Power BI, and Azure**, with end-to-end Row-Level Security and ISO 27001 compliance.

FOUR PILLARS

Ask in plain language

Dynamic NLQ + voice. The agent finds the dataset, writes the DAX, and runs it under your Entra identity.

Build the agents you need

Custom agents for your team: Variance Commentary Writer, Sales Pulse, Board Pack Drafter, DAX Reviewer, and any role you define.

Embed all of Power BI

All seven embed types live as document blocks: Reports, Pages, Visuals, Dashboards, Tiles, Q&A, Bookmarks. Inline DAX with collaborative editing.

Govern every step

Microsoft Entra-only auth, tenant isolation enforced at every layer, full AI session audit trail, RLS preserved end-to-end.

PROOF — TWO USE CASES

UC-01 · FP&A

"Why is the number wrong?"

An **FP&A analytics team at a mid-market insurer** writes the same kind of variance commentary every cycle. Mosaic's **Variance Commentary Writer** agent searches the catalog, runs the DAX, drafts prose. Analysts review, refine, pin to a shared page.

Hours back per commentary cycle · senior analysts on forward-looking work

Illustrative outcome — based on internal modelling.

UC-04 · SELF-SERVE

"DAX without the DAX"

A **retail business analyst** knows the data but doesn't write DAX. Asks Mosaic in plain language. The DAX subagent generates, fails, retries with a fix, succeeds — under the user's Entra identity, RLS preserved. Pins the working query.

BI ticket cycles compressed · BI team becomes platform owners

Illustrative outcome — based on internal modelling.

CERTIFIED PUBLISHER

BYOL

POWER BI + LLM

Bring your own licence. Mosaic plugs into your Power BI capacity (Microsoft Fabric / Premium / PPU / Embedded) and your LLM capacity (Azure AI Foundry recommended, or Anthropic / OpenAI API key). Inference and data stay in your tenant. Mosaic does not include or resell Microsoft licensing or AI tokens.
