

Transforming **INSIGHTS** into
IMPACT

AI-powered, no-code analytics for real-time decision-making

Who We Are

Vizlake is a data intelligence company helping organizations transform raw data into real-time, actionable insights.

We combine deep domain expertise with modern analytics engineering to accelerate decision-making across industries.

Key Challenges We Solve

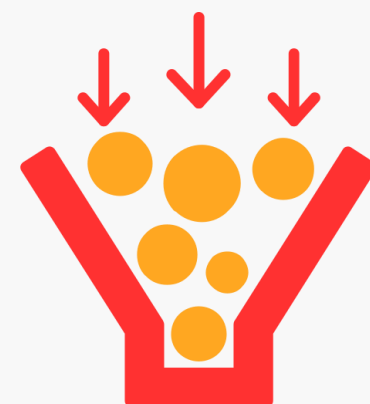

Delayed Insights

Missed windows for proactive decision-making

Manual Dependency

Inefficiencies, errors, and limited real-time capabilities.

Skills Gap

Lack of in-house technical expertise, especially for MSMEs.

SME Accessibility

High cost and complexity of advanced analytics tools.

Accelerate data value with Vizlake

Data copies and infrastructure inefficiencies

Limited interoperability

Data exposure & security risks

Vendor sprawl & high cost

Single, org-wide data lake that facilitates responsible data discovery and use

Unified source of data that integrates with databases for smarter decisions and scalability

End-to-end visibility and governance to reduce risk and maintain trust

Unified data platform that simplifies and centralizes management while reducing costs

The data platform for the era of AI

AI-powered analytics

Give your teams AI-powered tools for any analytics project in an optimized, no-code environment

Open data integration

Access your entire multi-cloud data estate from **170+ sources**, ready to power AI innovation

AI-enabled users

Empower everyone to understand data with AI-enhanced experiences and natural language queries

Mission critical foundation

Deploy with confidence: instant scalability, 24/7 availability, and built-in security compliance

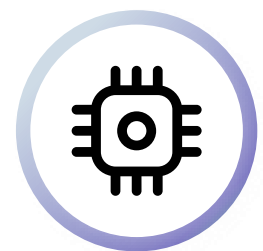

AI-Powered Analytics Platform

7

Give your teams the AI-powered tools needed for any analytics project

Fast Time-to-Value : Go live in minutes with a plug-and-play experience that requires minimal setup. Automatically optimized and integrated with your existing systems.

Empower All Users : From data engineers to business users, AI-powered tools help everyone get more done in less time with natural language queries.

Insight-Driven Apps : Create powerful analytics applications at scale with a simplified experience that unites transactional and analytical workloads.

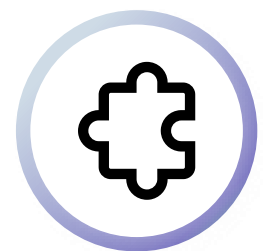

Open and AI-ready data integration

8

Access your entire data estate from a single platform, ready to power AI innovation

Unify multi-cloud and on-premises data with a single connection, reducing duplication and data movement

Ingest structured and unstructured data of any format with ERP-agnostic connectivity

Ensure everyone has access to the right data with intuitive management and discoverability tools

AI-enabled business users

9

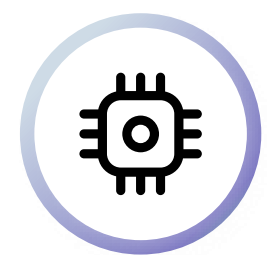

Empower everyone to understand data with AI-enhanced experiences

Real-Time Insights : Save time for analysts with real-time dashboards and up-to-date insights. No more waiting for reports or manual data refreshes.

Chat With Your Data : Empower business users to quickly answer questions using natural language. Ask in plain language or company jargon and get instant answers.

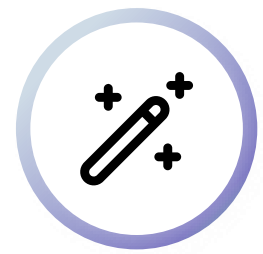

Embedded Analytics : Foster a data-driven culture by embedding insights into Teams, Excel, and everyday tools with native integration and mobile access.

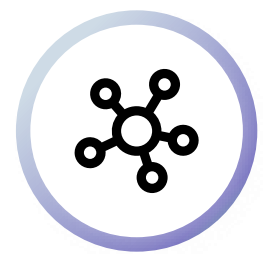

Mission critical foundation

10

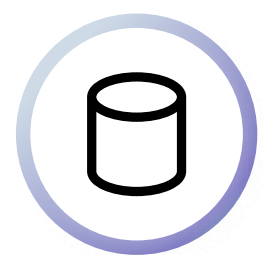

Deploy with confidence: performance, scalability, and enterprise security

Design mission-critical systems with a resilient foundation built on world-class infrastructure and built-in BCDR resilience tools.

Manage and govern data across a unified platform with industry-leading security and built-in federated governance tools.

Process massive amounts of data with industry-leading performance across analytics engines.

DESCRIPTIVE What happened

PREDICTIVE What will happen

PRESCRIPTIVE What to do

Key Capabilities

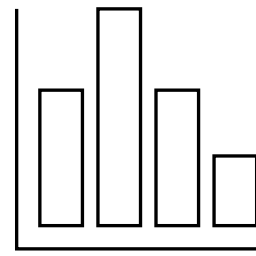

- Real-time, cross-filtered dashboards
- Natural-language “Chat With Your Data”
- Azure AI Foundry & MCP integration
- Self-service analytics for business teams
- Enterprise-grade security (RLS, OLS, MFA, activity logging)
- Web and mobile access.
- Plug and play solutions.
- Fast Time-to-Value

Use Cases

- Sales Performance
- Financial Reporting
- Forecasting and planning
- Operational efficiency
- Supply chain analytics
- Customer segmentation

Industries

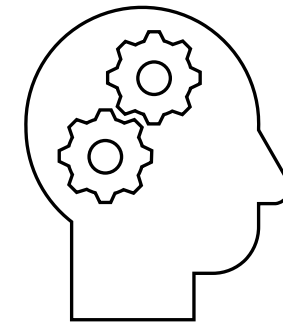

- Trading and Retail
- Manufacturing
- Transportation and Logistics
- Hospitality
- Financial Technologies

Real Time, Automated Decision Support System

Remove the challenges of multiple solutions

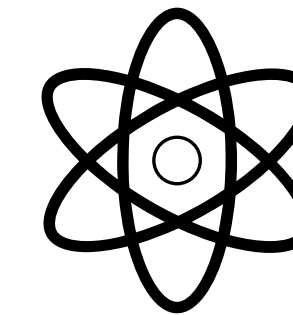

- **Real-time** KPI dashboards
- **Automated** solutions
- **Reduce cost**, complexity, and challenges of multiple analytics systems
- Advanced Security Features like **MFA & Conditional Access**
- **ERP-Agnostic** Platform

AI-Driven Insights & NLP

Reduce the amount of time spent wrangling data and spend more time getting answers

- Ask questions using **natural language** or company jargon
- Discover hidden insights
- **Voice Based Interactions**

No-Code, Plug-and-Play Analytics

Make sense of data and drive confident decisions without relying on specialized skills

- Turn-Key Solution : **Go-live in minutes**, not months
- **Plug 'n' Play**, No-Code reporting portal
- Fully customizable **white label** solution

Salient Features of our Dashboards

13

All dashboards will be highly interactive and user-friendly with the following features :

- > Cross Filtering
- > Drill-down and Drill-through functionality
- > Attractive and easy to understand visualizations
- > Option to download the underlying data into excel sheets
- > Option to Annotate and comment
- > Book-marking options for easy navigation
- > Option of self-service analytics for the users
- > Facility to perform intuitive analysis by the users with de-composition tree

All dashboards will be secured with the following features :

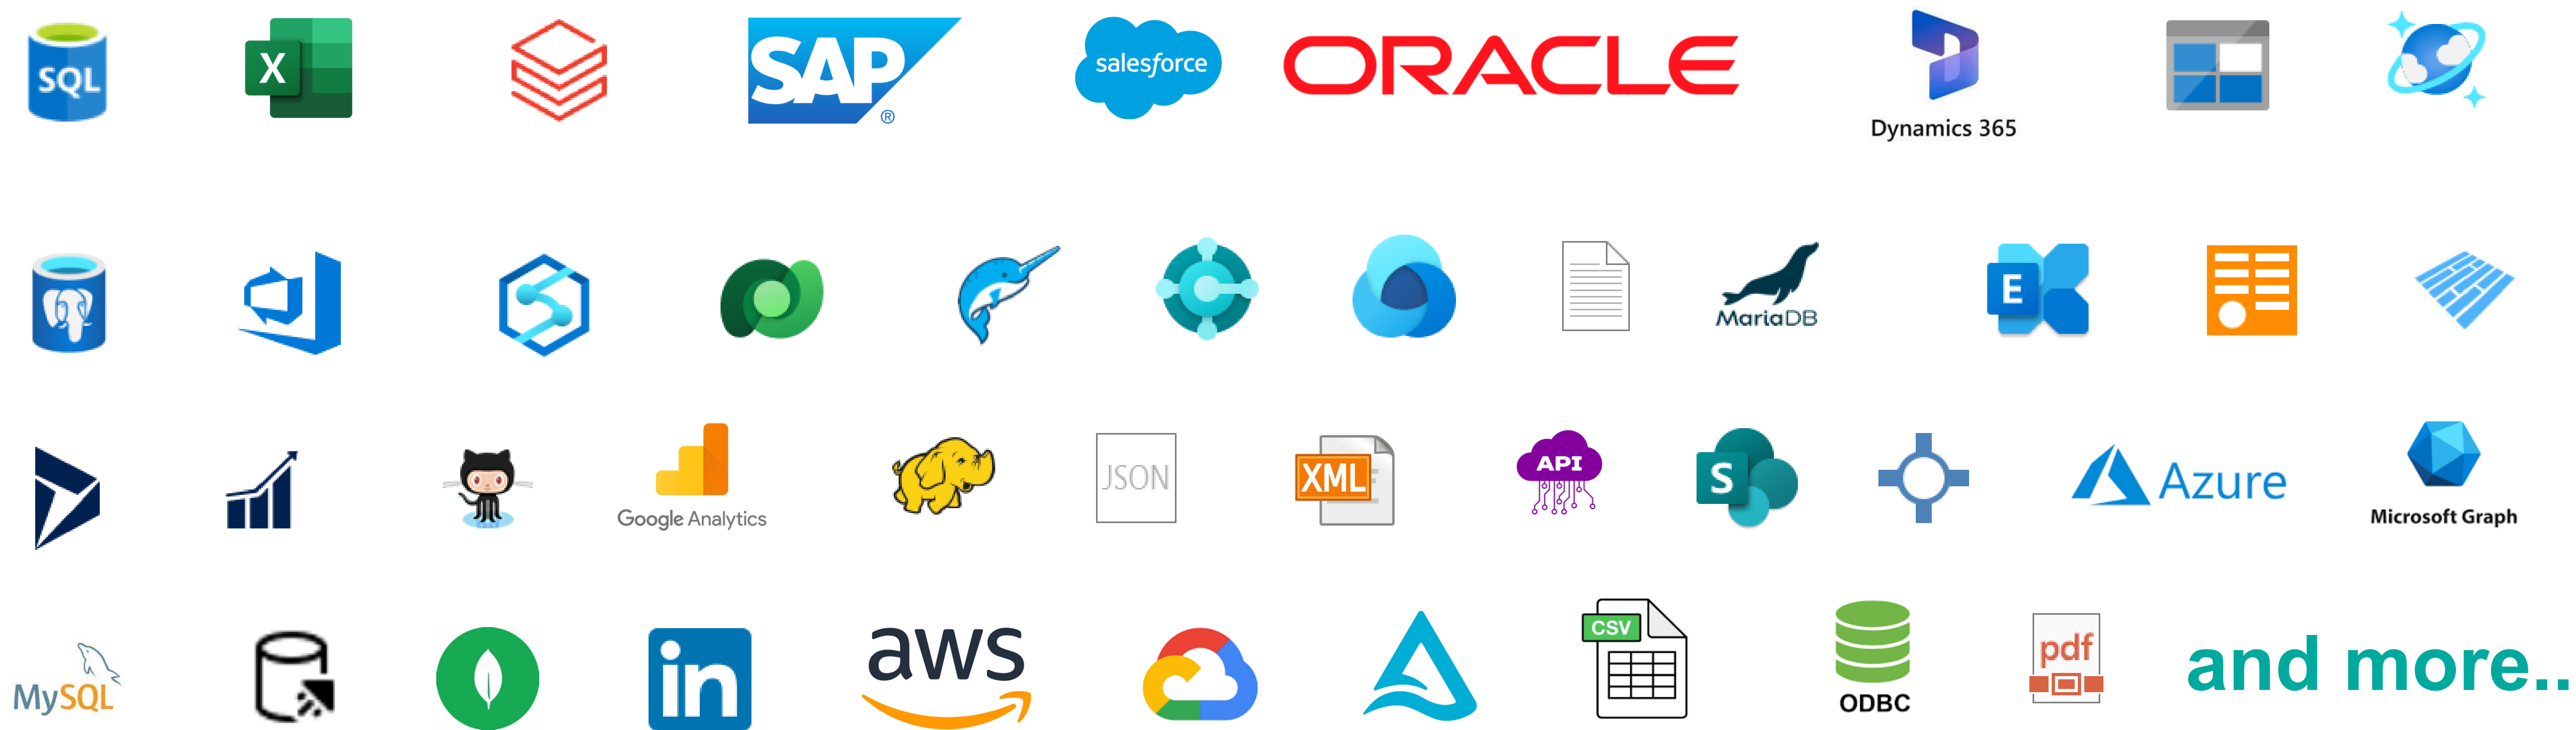

- ☑ Object Level Security (OLS) and Row Level Security (RLS) will be enabled to restrict the access of individual users based on the privileges.
- ☑ User log to capture the activities of users in the Power BI Dashboards
- ☑ Multi-factor authentication to control the access into the system
