V Net unites the ART and SCIENCE of optimizing inventory…

Microsoft Azure

V Net utilizes the Azure Intelligent Cloud to provide a nimble and scalable inventory management platform, transforming it into a customized solution, solving the specific inventory management challenges of your business.

WHAT WE OFFER

Transform raw data from multiple sources into actionable insights that allow for on the spot, fact-based decision making. Make agile business decisions based on impact analysis.

Leverage the scalability, speed and intelligence of MS Azure Cloud to enable an AI / ML forecasting engine that selects the best performing models at a store / sku level.

A "fit for purpose" toolkit that transforms your legacy inventory platform into a customized solution catering for the specific nuances of your product segments.

Data driven planning and replenishment functions that allow you to control strategic forecasts and tactical orders during ever-changing real-world constraints.

WHAT OUR CUSTOMERS ARE SAYING

"The JB Buying Team in partnership with V Net facilitated the management of our inventory during the current volatility associated with COVID-19. The V Net crew drove the system to accommodate the multiple "what if" scenarios required to resolve our daily inventory adjustments during a time of significant change that we needed to make, allowing us to continue supporting our customers who had to made rapid adjustments to their lives associated with working and educating from home " **Cameron Trainor, Managing Director JB HI FI Australia.**
