

## VNEXT On-call 365 Solution

**Say Goodbye to Manual Scheduling and Increase Efficiency with Our On-Call 365 Solution.**

Are you tired of manual on-call scheduling and the chaos it brings? The constant back and forth communication between teams, missed shifts, and disorganized schedules can make on-call operations stressful and inefficient. But what if there was a solution that could revolutionize your on-call scheduling process? Introducing our custom On-call 365 Solution that combines the power of Microsoft Teams, Power Apps, Shifts, Power Automate, SharePoint, and can be integrated with other Microsoft Office 365 Applications or workloads.

### What do we offer?

---

The VNEXT On-call 365 Solution is a custom solution that combines Microsoft Teams, Power Apps, Shifts, Power Automate, SharePoint, and can be integrated with other Office 365 Applications or workloads. The solution addresses the effort required to manage on-call shifts and control availability, contact information, unexpected changes, workloads, workgroups, and how to keep and update all the data involved in the process.

### Benefits of the On-call 365 Solution

- Integrated with Microsoft Shifts and with multiple data sources in the Microsoft 365 environment.
- On-call shifts monitoring and scheduling.
- Access to real time availabilities and contact information to reach On-call employees easily.
- Mobile App and Web App accessible everywhere, even from Teams.
- Eliminate the manual tasks involved for administrative staff for creating or updating the on-call list.

## Today's on-call employees are hungry for better digital tools.

87% of employees believe pursuing digital transformation is more important now than ever before, but only half of them (54%) say they are among the decision makers when it comes to those efforts. (For BDMs that figure is 94%.)

Respondents say their teams would benefit most from solutions that help them be more agile (84%), make information more accessible across the organization (86%), and allow them to automate tasks (86%)—freeing time to focus on work that matters.

The tools don't integrate with day-to-day processes, which makes it difficult to collaborate across teams, according to 64% of employees, and nearly three out of four (72%) wish the tools they use to collaborate were compatible with one another, instead of being highly fragmented.

### Streamline On-Call Scheduling

The days of manual scheduling and the headaches it brings are gone. Our On-call 365 Solution streamlines the entire scheduling process, making it effortless for employees to manage on-call schedules in real-time. With the ability to quickly assign, swap, and approve shifts, there's no room for missed shifts or miscommunication.

### Improve communication and productivity

The On-call 365 Solution can be easily accessed by team members through Microsoft Teams, keeping everyone on the same page and informed in real-time. Teams can also receive notifications and updates through Power Automate, ensuring coordinated information sharing is covered.

### Leverage your existing licensing and integrate Office 365 Applications

Our On-call 365 Solution is not limited to just Microsoft Teams, Power Apps, Shifts, Power Automate, and SharePoint. It can also be integrated with other Office 365 Applications or workloads, maximizing productivity and efficiency.

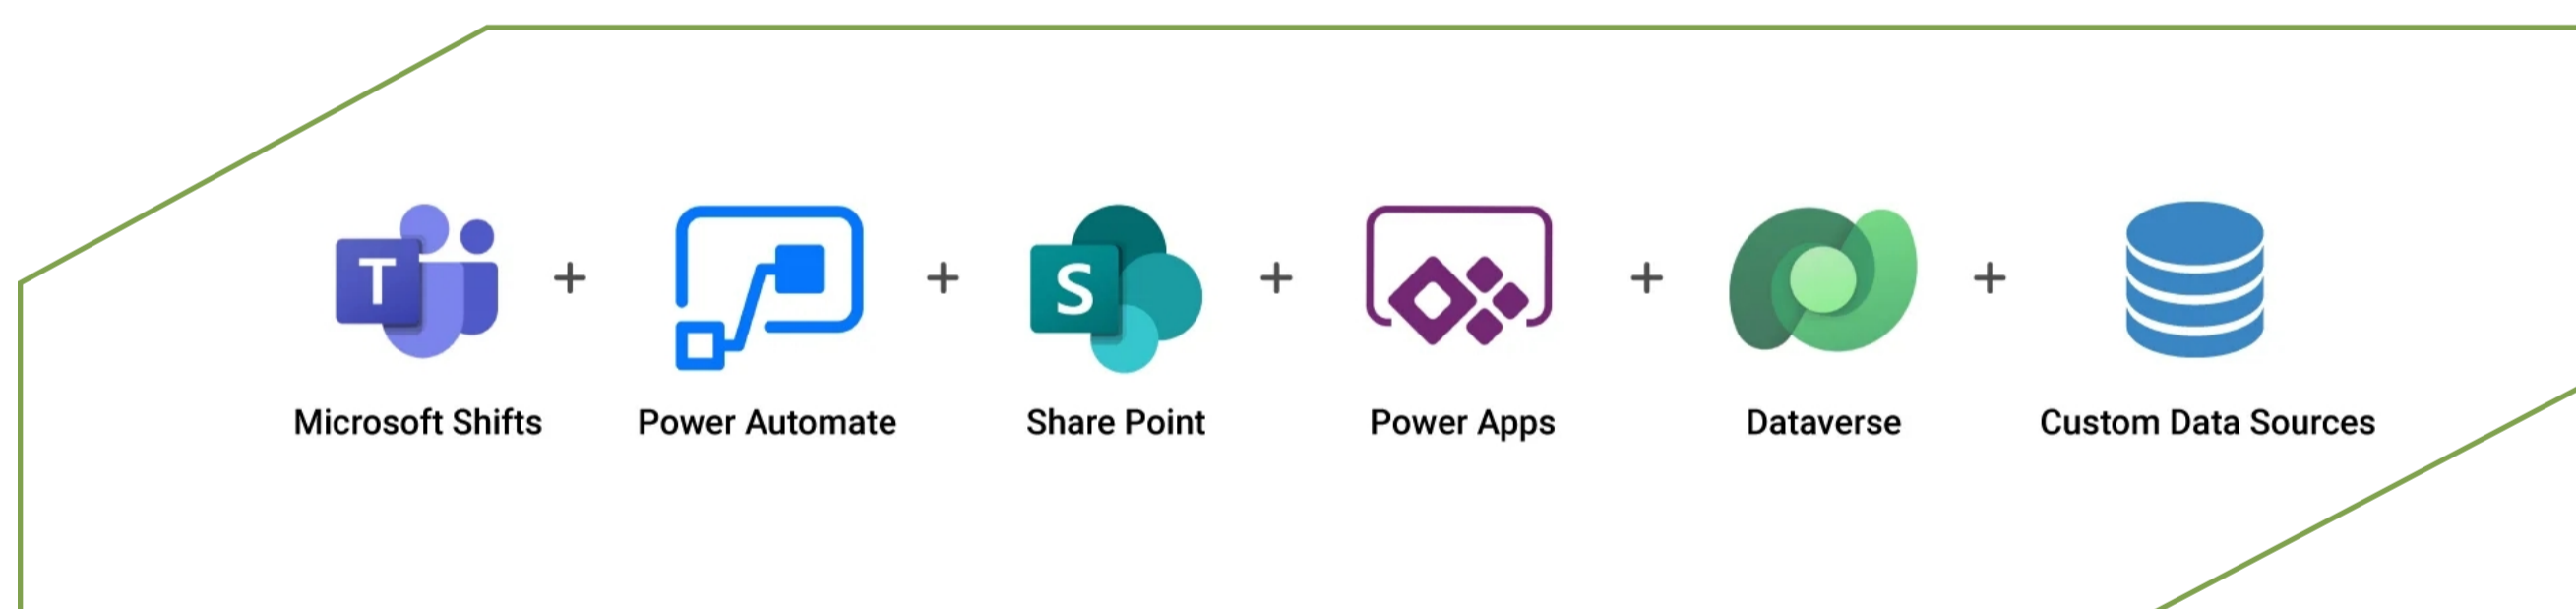

## What challenges and business needs the solution addresses?

This solution aims to help organizations automate and modernize employees on-call processes, as well as to help them manage communications through Microsoft Teams. In this way their operations have the digital capabilities for promoting business continuity and stability, while keeping patients, employees and all stakeholders connected and secured.

- Opportunity to leverage and make use of your existing licensing investment and Office 365 workloads.
- Respond to evolving conditions faster with coordinated information sharing and secure communication within Teams.
- Automate and modernize internal processes to increase productivity.
- Customizable and built based on specific needs for each organization.
- Work smarter and more efficiently by automating workflows.

Streamline scheduling, improve communication and collaboration while integrating Office 365 applications. It's time to revolutionize your on-call operations. So, what are you waiting for?
