Hybrid Windows for a Hybrid World
Windows 365

Virtualization service to secure your streaming experience!

Windows 365 also known as Cloud PC, is the **Microsoft's first DaaS (Desktop as a Service)** offering within Microsoft 365, that helps you embrace flexibility on how, when and where you work.

Instead of buying new hardware and hosting the operating system and applications locally, using up both storage and compute resources, Windows 365 lets users stream their apps, data, and settings to any device – including those that run on **macOS, Linux or Android**.

Windows 365 Main Components

User Connectivity

Microsoft Endpoint Manager Integration

Azure AD

Storage

Identity Services

Virtual network connectivity: Azure Network Security Groups; User Defined Routing; Azure Firewall; Network virtual appliances (NVAs)

With this solution you will get:

- Integrated management and security with everything in the cloud
- Opportunity to stream your apps, data, content and settings from the Microsoft cloud to any device
- Support for Azure Active Directory (Azure AD) Multi-Factor Authentication (MFA) and Microsoft Authenticator for secure access to Cloud PCs
- Easy set up and scale.
