The vNEXT App Modernisation Plan

Legacy applications and infrastructure are the backbone of many organisations, yet they are hard to update, maintain and scale. The vNEXT App Modernisation Plan will help you innovate faster, improve reliability, reduce costs, and realise the full benefits of the Microsoft Azure platform.

Assess

1 week (\$10,000)

We work with you to understand your business needs and the current constraints of your applications. We assess your applications and provide a plan to leverage the benefits of Cloud Native features such as resiliency, availability, and security.

Deliverables include a migration assessment with potential apps to migrate, cost savings, list of dependencies, and high-level Azure Solution architecture.

Assess & Plan

2 weeks (\$20,000)

In this phase, we dive deeper and engage with your team to plan and design your solutions on Azure including applications, infrastructure, databases, and connectivity. We help you see the future and envisage a plan to modernise and migrate to Azure

Deliverables include a detailed migration plan along with a solution architecture document. These include timelines, costing, risks, delivery approach and potentially a PoC solution.

Assess, Plan & Deploy

4 weeks (\$40,000)

We help you build, and deploy a full Azure environment to migrate your application. We take care of the application, infrastructure, database, connectivity, cost controls, and automated, repeatable and reproducible way to deploy your apps and services.

Deliverables include a fully-automated deployment of the target application, along with its databases, and related services. We also help you set up monitoring, automated testing, cost and security controls.

Why vNEXT App Modernisation Plan?

We work with customers to reimagine what is possible with Microsoft Azure. We bring battle-tested strategies and methodologies along with proven tools and artefacts to deliver to market faster. Most importantly, we listen and seek to understand your specific challenges and concerns. Together, we will innovate and breathe a new life to your applications and infrastructure.

What our Customers are saying

"I am really glad that we engaged vNEXT at the right time to help us deliver a very complex solution. We managed to develop a world-class solution for Utilities".. Salah Rubaie (Senior Manager – South East Water)
